**Point of Attack** John Yoo,2014-03-14 The world today is overwhelmed by wars between nations and within nations wars that have dominated American politics for quite some time Point of Attack calls for a new understanding of the grounds for war In this book John Yoo argues that the new threats to international security come not from war between the great powers but from the internal collapse of states terrorist groups the spread of weapons of mass destruction and destabilizing regional powers In Point of Attack he rejects the widely accepted framework built on the U N Charter and replaces it with a new system consisting of defensive pre-emptive or preventive measures to encourage wars that advance global welfare Yoo concludes with an analysis of the Afghanistan and Iraq wars failed states and the current challenges posed by Libya Syria North Korea and Iran

**Advancing Public Goods** Jean-Philippe Touffut,2006-01-01 This is a timely and thought provoking book which brings the discussion of public goods to confront the contemporary world economy where such goods have often a global nature and require super national provision and control Giovanni Dosi St Anna School of Advanced Studies Pisa Italy In this wide ranging selection of papers distinguished economists public policy advisers and political theorists contribute to the debate on public goods The studies cover topics in the conceptualization classification and stratification of public goods Also examined are public institutional design global economic institutions and partnership typologies Individual papers address the financing regulatory organizational and legal aspects relating to services of general interest in Europe The dynamics of global public good production including

monopolies patents scientific uncertainty and market failures are discussed Empirical research on the state profit and non profit sectors is presented Providing numerous examples of specific public goods the contributions also highlight the impact of macroeconomic policies on provision The book presents a broad diversity of new approaches to global public goods within the framework of mixed economies beyond the standard economic analysis of public services Academics researchers and policymakers in the area of global public goods and services will find this volume of great interest Biodiversity Economics Andreas Kontoleon, Unai Pascual, Timothy Swanson, 2007-12-13 Human induced biodiversity loss is greater now than at any time in human history with extinctions occurring at rates hundreds of times higher than background extinction levels The field of biodiversity economics analyses the socio economic causes of and solutions to biodiversity loss by combining the disciplines of economics ecology and biology This field has shown a remarkable degree of transformation over the past four decades and now incorporates the analysis of the entire diversity of biological resources within the living world Biodiversity Economics presents a series of papers that show how bio economic analysis can be applied to the examination and evaluation of the problem of various forms of biodiversity loss Containing insightful bio economic research by some of prominent practitioners in the field this volume will be an essential research tool to those working on biodiversity issues in the academic policy and private sectors *Sustainability and Endogenous Growth* Karen Pittel, 2002-01-01 Since 1990 interest in growth theory in the context of the environment has increased dramatically resulting in a vast array of articles and books applying different modelling approaches and focusing on a variety of diverse topics Dealing with endogenous growth under environmental restrictions Karen Pittel provides a comprehensive survey of the field and highlights some important issues that have so far been rather neglected within the debate on sustainable growth Just Security in an Undergoverned World William Durch, Joris Larik, Richard Ponzio, 2018-01-19 Just Security in an Undergoverned World examines how humankind can manage global problems to achieve both security and justice in an age of antithesis Global connectivity is increasing visibly and invisibly in trade finance culture and information helping to spur economic growth technological advance and greater understanding and freedom but global disconnects are growing as well Ubiquitous electronics rely on high value minerals scraped from the earth by miners kept poor by corruption and war People abandon burning states for the often indifferent welcome of wealthier lands whose people in turn draw into themselves Humanity's very success underwritten in large part by lighting up gigatons of long buried carbon for 200 years now threatens humanity's future The global governance institutions established after World War II to manage global threats especially the twin scourges of war and poverty have expanded in reach and impact while paradoxically losing the political support of some of their wealthiest and most powerful members Their problems mimic those of their members in struggling to adapt to new problems and maintain trust in norms and public bodies This volume argues however that a properly mandated managed and modernized global architecture offers unparalleled potential to midwife solutions to intractable issues from violent conflict and climate change to poverty and

pandemic diseases that transcend borders and the capacities of individual actors. It offers just security as a new framework for charting innovative solutions and strategies for effective and essential global governance.

**The Art and Craft of International Environmental Law** Daniel Bodansky, Harro van Asselt, 2024. In countless ways we are affected by international environmental norms, some social, others legal, some quite general, others very specific. For example, the norms limiting the refrigerants used in air conditioners have been agreed upon in legal form internationally and are mandated and enforced by national governments. The sustainable fishery and forestry standards used by Carrefour and Ikea were developed more informally by environmental groups and businesses and are applied to producers through supply chain contracts without any government involvement. The reluctance to eat tuna fish or own elephant ivory reflects more general social norms disseminated through education and culture. How and why do these norms arise? In what ways do they affect behavior? Do they change what states and individuals actually do, and if so, why? How effective are they in solving international environmental problems? In the second edition of *The Art and Craft of International Environmental Law*, Daniel Bodansky and Harro van Asselt explore these and other questions. Revisions cover the numerous developments spanning the 13 years since the first edition was published. New chapters address the growing role of environmental NGOs and the increasingly complex architecture of environmental law involving multiple institutions, levels of governance, and actors. Recent research has been incorporated on treaty design and policy implementation and effectiveness, and greater attention has been given to the role of the judiciary in standard setting, implementation, and enforcement. A sophisticated yet highly readable introduction to how international environmental law works and sometimes doesn't work, this book is essential reading for a wide audience.

**International Law in Pursuit of Global Justice** Shashikala GURPUR, Aakarsh Banyal, 2025-06-24. This book discusses the core concepts of international law with a focus on India's position concerning contemporary developments in the field. The project of international law, both in its origin and evolution, has been predominantly anchored in Global North realities. Over the years, however, narratives from other parts of the world, the Global South, have emerged to confront the traditional construction of the international legal order. The Indian narrative, in this regard, given the state's expanding influence within the Global South and beyond, therefore warrants consideration. This book responds in three ways: it captures India's contributions to the development of international law in areas including human rights, humanitarian law, international trade, and investment; global commons, health, and dispute settlement; it evaluates the influence of international law on India and its positioning in the global world order and presents a way forward by mapping India's pursuit of global justice. The book will be of interest to scholars and students working in the fields of International Law, South Asian Studies, International Relations, Human Rights, and related research areas.

**Economics and the Global Environment** Charles S. Pearson, 2000-10-09. *Economics and the Global Environment* is a path-breaking comprehensive analysis of how economic and environmental systems mesh in the international context. The book investigates if and how environmental resources such as global climate

genetic diversity and transboundary pollution can be managed in an international system of sovereign states without a Global Environment Protection Agency It also considers traditional international economics theory and policy and explores how they can be expanded to accommodate environmental values Until recently trade theory and trade policy neglected pollution and environmental degradation This situation has changed dramatically and the controversial and corrosive issues of trade and the environment are here given careful analysis These topics are enriched by a concise presentation of the principles of environmental economics and a thoughtful treatment of sustainable development The book will appeal to students and practitioners of trade and development as well as the environmental community

**Global Warming and Climate Change (2 Vols.)** V I Grover,2016-04-19

Now as we stand at the crossroads the steps taken by national governments business communities and others involved in the negotiations will determine which path we will take as a world community to mitigate and to adapt to climate change As discussed in the book in the coming years it is more politics than policies that will determine the way

Halduskultuur-Administrative Culture 12 (1) , The Protection of Community Interests in the International Law of State Responsibility Julia Lemke,2025-04-29
