Global Change, Regional Response Barbara Stallings, 1995-09-29 This book offers a new perspective in studying development in the post cold war world

Globalisation and the Asia-Pacific Peter Dicken, Philip F. Kelly, Lily Kong, Kris Olds, Henry Wai-chung Yeung, 2005-06-27 Most books that analyse the crucial subject of globalisation only look at it from a western perspective This is the first detailed study to look at globalisation specifically in the Asia Pacific region An impressive collection of leading interdisciplinary scholars explore various dimensions of globalisation and their relationship to development processes in the region

Regionalization and Labour Market Interdependence in East and Southeast Asia Duncan Campbell, Asma Lateef, Aurelio Parisotto, Anil Verma, 2016-01-06 How can we account for the dynamic growth of East and Southeast Asian countries Much of the debate has turned on the question of the state versus the market as exclusive and often competing explanations of the successful performance of individual countries This book explores the distinctively interdependent nature of the East and Southeast Asian experience As firms create a regional organization of production the growing interdependence of national labour markets is one major outcome

Communities in Globalization Juan Pablo Pérez Sáinz, Katharine Andrade-Eekhoff, 2003 There is a silent globalization being carried out far below the action of multinational firms international organizations and state policies It is the work of societies communities of determined and creative people *Communities in Globalization* richly illustrates the experiences of three Central American communities connected with global markets The unique perspective of each is developed to show the economic political institutional and social effects of its connection with world trade Ultimately this book seeks to identify the resources that allow a community to face globalization while minimizing risks and maximizing opportunities

Why International Cooperation Is Failing Thomas Kalinowski, 2019-09-18 Since the global financial crisis of 2008-09 international cooperation has failed to curb volatile financial markets Changes in the global rules of finance discussed in the G20 during the last decade remain limited and it is uncertain whether they are suitable to help mitigate and manage future crises to come This book offers an alternative to the popular notion that this failure is the result of the nature of the international system the clash of national egoisms or lack of leadership It instead investigates problems of international cooperation by looking at their deeper structural origins in the competition of different models of capitalism US finance led EU integration led and East Asian state led capitalism complement each other globally but have conflicting preferences on how to regulate international finance This interdependence of capitalist models is relatively stable but also prone to crises caused by volatile financial flows global economic imbalances and currency wars By bringing together approaches from International Political Economy and Comparative Capitalism this book shows that regulating international finance is not a technocratic exercise of fine tuning the machinery of international institutions but rather a political process International cooperation can only be successful if it goes hand in hand with deep domestic changes in each of these capitalist models

The Prophet and Power Alex

Dupuy,2007 This compelling book offers a comprehensive analysis of the struggle for democracy in Haiti set in the context of the tumultuous rise and fall of Jean Bertrand Aristide Swept to power in 1991 as the champion of Haiti s impoverished majority and their demand for a more just equal and participatory democratic society the charismatic priest turned president was overthrown by the military just seven months into his first term Popular resistance to the junta compelled the United States to lead a multinational force to restore Aristide to power in 1994 to serve out the remainder of his presidency until 1996 When he was re elected for a second and final term in 2000 Aristide had undergone a dramatic transformation Expelled from the priesthood and no longer preaching liberation theology his real objective was to consolidate his and his Lavalas party s power and preserve the predatory state structures he had vowed to dismantle just a decade earlier To maintain power Aristide relied on armed gangs the police and authoritarian practices That strategy failed and his foreign backed foes overthrew and exiled him once again in 2004 This time however the population did not rally in his defense Written by one of the world s leading scholars of Haiti *The Prophet and Power* explores the crisis of democratization in a poor underdeveloped peripheral society with a long history of dictatorial rule by a tiny ruling class opposed to changing the status quo and dependent on international economic and political support Situating the country in its global context Alex Dupuy considers the structures and relations of power between Haiti and the core capitalist countries and the forces struggling for and against social change

The Globalization Syndrome James H. Mittelman,2000-02-28 Here James Mittelman explains the systemic dynamics and myriad consequences of globalization focusing on the interplay between globalizing market forces in some instances guided by the state and the needs of society Mittelman finds that globalization is hardly a unified phenomenon but rather a syndrome of processes and activities a set of ideas and a policy framework More specifically globalization is propelled by a changing division of labor and power manifested in a new regionalism and challenged by fledgling resistance movements The author argues that a more complete understanding of globalization requires an appreciation of its cultural dimensions From this perspective he considers the voices of those affected by this trend including those who resist it and particularly those who are hurt by it *The Globalization Syndrome* is among the first books to present a holistic and multilevel analysis of globalization connecting the economic to the political and cultural joining agents and multiple structures and interrelating different local regional and global arenas Mittelman s findings are drawn mainly from the non Western worlds He provides a cross regional analysis of Eastern Asia an epicenter of

globalization and Southern Africa a key node in the most marginalized continent The evidence shows that while offering many benefits to some globalization has become an uneasy correlation of deep tensions giving rise to a range of alternative scenarios

Ethical Trade, Gender and Sustainable Livelihoods Kiah Smith, 2014-03-21 Fair and ethical trade is often criticized for being highly gendered and for institutionalizing the ethical values of consumers the priorities of NGOs and governments and most of all food retailers But little is known about how women smallholder farmers experience diverse ethical standards or whether and how standards reflect their values local cultural and environmental contexts or priorities for achieving sustainable livelihoods Linking gender smallholder livelihoods and global ethical trade regulations this book reveals that multiple understandings of social justice environmental sustainability and well being or ethicality exist in parallel to those institutionalized in ethical trade schemes Through an in depth case study of smallholder subsistence and French bean farming in Kenya the book grounds the analysis of livelihoods gender and ethical trade in women smallholders perspectives links the macro level of markets with the micro level of livelihoods and engenders relations of power structure and agency in food networks It brings together disparate bodies of theory to illustrate the knowledge strategies and values of women smallholder farmers that are often beyond the scope of ethical trade regulations It also provides a challenging new vision for doing food systems research

Thinking International Relations Differently Arlene Tickner, David L. Blaney, 2013-03-01 A host of voices has risen to challenge Western core dominance of the field of International Relations IR and yet intellectual production about world politics continues to be highly skewed This book is the second volume in a trilogy of titles that tries to put the international back into IR by showing how knowledge is actually produced around the world The book examines how concepts that are central to the analysis of international relations are conceived in diverse parts of the world both within the disciplinary boundaries of IR and beyond them Adopting a thematic structure scholars from around the world issues that include security the state authority and sovereignty globalization secularism and religion and the international an idea that is central to discourses about world politics but which in given geocultural locations does not necessarily look the same By mapping global variation in the concepts used by scholars to think about international relations the work brings to light important differences in non Western approaches and the potential implications of such differences for the IR discipline and the study of world politics in general This is essential reading for anyone who is concerned about the history development and future of International Relations

Neilson,Bill Pritchard,2011-07-26 Adopting a global value chain approach Value Chain Struggles investigates the impact of new trading arrangements in the coffee and tea sectors on the lives and in the communities of growers in South India Offers a timely analysis of the social hardships of tea and coffee producers Takes the reader into the lives of growers in Southern India who are struggling with issues of value chain restructuring Reveals the ways that the restructuring triggers a series of political and economic struggles across a range of economic social and environmental arenas Puts into perspective claims about the impacts of recent changes to global trading relations on rural producers in developing countries Grounds for Agreement John M. Talbot,2004-07-29 As the popularity of coffee and coffee shops has grown worldwide in recent years so has another trend globalization which has greatly affected growers and distributors This book analyzes changes in the structure of the coffee commodity chain since World War II It follows the typical consumer dollar spent on coffee in the developed world and shows how this dollar is divided up among the coffee growers processors states and transnational corporations involved in the chain By tracing how this division of the coffee dollar has changed over time Grounds for Agreement demonstrates that the politically regulated world market that prevailed from the 1960s through the 1980s was more fair for coffee growers than is the current globalized market controlled by the corporations Talbot explains why fair trade and organic coffees by themselves are not adequate to ensure fairness for all coffee growers and he argues that a return to a politically regulated market is the best way to solve the current crisis among coffee growers and producers

Neoliberalism Revisited Gerardo Otero,2018-05-04 Having unilaterally opened its borders to international competition and foreign investment in the mid 1980s Mexico has become one of the world s leading proponents of economic liberalization Nevertheless as the recent uprising of native peoples in Chiapas has made clear economic reforms are not universally welcomed This book addresses the challenges brought about by the restructuring of the Mexican economy at a time when multiple organizations of civil society are demanding a democratic political transition in a system that has been dominated by one party for nearly seventy years The contributors identify the key social and political actors both domestic and international involved in promoting or resisting the new economic model and examine the role of the state in the restructuring process They explore such questions as In what ways is the state itself being reconstituted to accommodate the

demand for change How have Canada and the United States responded to the increased internationalization of their economies What are the challenges and prospects for transnational grassroots networks and labor solidarity Answers are provided by scholars from anthropology economics history political science and sociology all of whom promote interdisciplinary approaches to the issues Each chapter traces the structural transformations within the central social relationships in Mexican society during the last decade or so and anticipates future consequences of today s changes
