**Sensors Fault Diagnosis Trends and Applications** Piotr Witczak, 2021-09-01 Fault diagnosis has always been a concern for industry In general diagnosis in complex systems requires the acquisition of information from sensors and the processing and extracting of required features for the classification or identification of faults Therefore fault diagnosis of sensors is clearly important as faulty information from a sensor may lead

to misleading conclusions about the whole system As engineering systems grow in size and complexity it becomes more and more important to diagnose faulty behavior before it can lead to total failure In the light of above issues this book is dedicated to trends and applications in modern sensor fault diagnosis
