The impact of the enlargement of the EU and the prospects for further enlargement and for closer political integration. The EU under strain, the 2008 recession and after, Britain in or out. As such, global economies around the world are decreasing their international trade and introducing import tariffs and economic protectionism. *International Firms' Economic Nationalism and Trade Policies in the Globalization Era* provides a comprehensive understanding of the recent rise of economic nationalism in the context of the hyper-connected global economy by providing strategies and country-specific solutions for domestic and international firms. Covering how multinational corporations can overcome the protectionist sentiments while reinventing their corporate social responsibility models, it showcases how economic nationalism and globalization can successfully coexist.
