Manuela Boatca,Andrea Komlosy,Hans-Heinrich Nolte,2017-09-22 During its 500 year history the modern world system has seen several shifts in hegemony Yet since the decline of the U S in the 1970s no single core power has attained a hegemonic position in an increasingly polarized world As income inequalities have become more pronounced in core countries especially in the U S and the U K global inequalities emerged as a new topic of social scientific scholarship ignoring the constant move toward polarization that has been characteristic of the entire modern world system At the same time the rise of new states most notably the BRICS and the relative economic growth of particular regions especially East Asia have prompted speculations about the next hegemon that largely disregard both the longue dur e of hegemonic shifts and the constraints that regional differentiations place on the concentration of capital and geopolitical power in one location Authors in this book place the issue of rising inequalities at the center of their analyses They explore the concept and reality of semiperipheries in

the 21st century world system the role of the state and of transnational migration in current patterns of global stratification types of catching up development and new spatial configurations of inequality in Europe's Eastern periphery as well as the prospects for the Global Left in the new systemic order The book links novel theoretical debates on the rise of global inequalities to methodologically innovative approaches to the urgent task of addressing them *European Union and New Regionalism* Mario Telò, 2016-04-22 Stemming from an international and multidisciplinary network of leading specialists this best selling text is fully updated with new chapter additions With the first edition prepared at the end of the last century and the second edition adding inter regional relations this new edition focuses on competing models of regional cooperation within a multipolar world and the role of European Union This new edition offers A comparative analysis of regional cooperation and of both US centred and EU centred interregionalism A fresh exploration of key issues of regionalism versus globalization and the potential for world economic and political governance through regional cooperation notably in hard times A vigorous response to conventional wisdom on the controversial EU international identity An appendix on regional and interregional organizations A key resource for postgraduate or undergraduate study and research of international relations European integration studies comparative politics and international political economy Taking into account both the expanded European Union and regional cooperation in every continent this multidisciplinary volume comprises contributions from established scholars in the field A Gamble P Padoan G Joff G Therborn Th Meyer R Higgott B Hettne F Ponjaert F Soederbaum Ch Deblock K Eliassen A Arnottir S Keukeleire I Petrova S Santander and M Tel editor **WORLD SYSTEM HISTORY-Volume I** George Modelski and Robert A. Gwynne, Denis Shaw, Thomas Klak, 2014-05-12 This book aims to examine the effects of globalization and economic and political transformations in those parts of the world which are now regularly referred to as emerging regions These are Latin America and the Caribbean East Central Europe and the former Soviet Union and East Asia This book breaks new ground in three areas First of all it develops a critique of the use of the term emerging regions for geographers and social scientists and relates this to world systems theory Secondly it explores the development trajectories and challenges of countries in this so called emerging world countries that will be crucial to the evolution of the world economy in the twenty first century Thirdly it compares and contrasts the pathways of both economic and political change in the three world regions under focus This is a unique approach in terms of books published in both geography and the social sciences Within the context of the three world regions the book combines historical and contemporary analysis of the evolving world system In these regions we are concerned to understand the historical expansion and extension of capitalism and how its contemporary forms of production exchange and regulation are evolving The authors believe that at the present time these processes have produced alternative capitalisms economic and associated developments which while assuredly capitalist differ in various ways from those typical of the capitalist West or core economies of North America and Western Europe

globalisation can there be good globalisation as well as bad globalisation Is this a new phenomenon or just a continuation of history as it has always been This book brings together a wide range of expertise addressing these problems from a world systems perspective

Elites and Classes in the Transformation of State Socialism David Lane, 2017-09-08 The year 2011 marks the twentieth anniversary of the end of the Soviet Union This may be an appropriate time to evaluate the adoption by previously state socialist societies of other economic and political models The transition has sometimes been described in positive terms as a movement to free societies with open markets and democratic elections Others have argued that the transition has created weak poverty stricken states with undeveloped civil societies ruled by unresponsive political elites Which is the more accurate assessment David Lane examines a few of the theoretical approaches that help explain the trajectory of change from socialism to capitalism He focuses on two main approaches in this volume elite theories and social class Theories dwelling on the role of elites regard the transformation from socialism to capitalism as a type of system transfer in which elites craft democratic and market institutions into the space left by state socialism Lane contrasts this interpretation with class based theories which consider transformation in terms of revolution and explain why such theories have not been considered the best way of framing the transition in the post socialist states While recognizing that elites can play important roles and have the capacity to transform societies Lane contends that elite theories alone are inadequate to explain a system change that brings free markets In contrast he proposes a class approach in which two groups characterize state socialism an administrative class and an acquisition class

**The New World Architecture** Jose M Magone, 2011-12-31 The collapse of the bipolar world sustained by the United States and the former Soviet Union led to a power vacuum in the 1990s that the European Union has only reluctantly begun to fill It is under pressure to take over important international tasks and roles in order to develop a new equilibrium in the system of international relations After 2000 reforms were undertaken so that the European Union could deal more efficiently with the tasks the new political system had acquired since the early 1990s With respect to its international role reorganization of the EU s external relations department was high on the list The New World Architecture explores the contribution that the European Union is making to the emerging global governance system It discusses the theoretical and historical aspects of European integration within the framework of the emerging regional EU and global governance systems It explores three regimes of governance that are contributing to holding together the new emerging EU multilevel governance system None of these is complete all are partial They include the political regime of governance the socioeconomic regime of governance and the territorial regime of governance The author assesses the impact of the European Union on global politics The Mediterranean and Latin America represent regions in which the European Union is investing considerable effort in order to create new forms of cooperation Magone argues that within the next twenty five years global governance may and should emerge as the new and reconfigured stable system of international relations In this system the European Union is and will remain the most advanced

regional system This volume will be of interest to specialists scholars and students of European Politics and the European Union
