The Post Golden Age of Economic Growth in Western Europe Paul Pass,2009 *American Book Publishing Record*,2001 Transitions to Sustainable Development John Grin,Jan Rotmans,Johan Schot,2010-05-26 Over the past few decades there has been a growing concern about the social and environmental risks which have come along with the progress achieved through a variety of mutually intertwined modernization processes In recent years these concerns are transformed into a widely shared sense of urgency partly due to events such as the various pandemics threatening livestock and increasing awareness of the risks and realities of climate change and the energy and food crises This sense of urgency includes an awareness that our entire social system is in need of fundamental transformation But like the earlier transition between the 1750 s and 1890 s from a pre modern to a modern industrial society this second transition is also a contested one Sustainable development is only one of many options This book addresses the issue on how to understand the dynamics and governance of the second transition dynamics in order to ensure sustainable development It will be necessary reading for students and scholars with an interest in sustainable development and long term transformative change **A Modern Nordic Saga : Politics, Economy and Society** Ryszard M. Young,Ivan Teodorovi?,Peter Koveos,2002 To date the record of economic transition has decidedly been mixed The worldwide political climate is still in favor of economic reform and the process continues to have considerable momentum On the other hand this process now faces a number of formidable obstacles There appears to be general agreement that in many countries the promise of a better standard of living which economic transition offers to the mass of the citizenry has failed to produce the rapid and dramatic results hoped for There is an increasing conflict of interest between multinational firms and the national business community Moreover many transition economies have experienced a slowing of economic growth in real terms and social services have been severely cut This book deals with the development of those forces that have played a major role in the successes and failures of economic transition Its distinctive feature is that it does this from the perspective of economic political and social analysis taking into account both theoretical constructs and economic realities for those countries which have attempted the grand experiment with economic transition **The British National Bibliography** Arthur James Wells,2001 *Emerging Market Multinationals in Europe* Louis Brennan,Caner Bakir,2016-06-17 This book makes a timely and highly stimulating contribution to the discourse on emerging market multinationals EMNCs as Foreign Direct Investment FDI in Europe from emerging countries especially from the BRICs Brazil Russia India China continues to grow in significance Unsurprisingly the emergence of EMNCs from emerging economies raises a wide range of challenges and opportunities for scholars business professionals and policymakers alike While explaining the sudden rise of these companies has become a major concern among scholars we have very limited knowledge on drivers motivations strategies and impact of these EMNCs in Europe and their policy implications This volume provides fresh insights into EMNCs activities and their impact in Europe The contributors argue that EMNCs combine various country specific advantages existing firm specific advantages exploitation and or new FSAs exploration in their FDI and that there is considerable heterogeneity across EMNCs even those from the same southern economy Highlighting the importance of considering this divergent behaviour when implementing future European FDI
