**Migration Control Logics and Strategies in Europe** Claudia Finotelli, Irene Ponzo, 2023-04-24 Building upon the concept of migration regime this open access book brings together the works of scholars who have investigated logics and routines of action in the field of immigration control within a single and innovative theoretical framework The chapters cover a wide range of policy domains from visa policy to the externalisation of controls labour migration to asylum internal controls towards irregular migration to restrictions for intra EU mobility By unravelling organisational strategies and practices across Europe the book does not only contribute to dismantling the very idea of the European North South divide in migration but also shows how Europe really works in the field of migration in times of deep economic asylum and health crises In this perspective the book questions the widespread understanding of migration control outcomes as simply the result of more or less effective state policies without considering the embeddedness of the national policy goals and strategies in the dynamic interplay of different economies institutional cultures and geopolitical positions Crossing Over

Holger Henke, 2005-01-01 Although migration by the very virtue of its transnational nature seems to invite comparisons relatively few books provide these in explicit form In this collection of essays the authors deliberately juxtapose the experience of different locations and or immigrant populations in order to systematically compare them The Exclusionary Politics of Asylum V. Squire, 2016-01-12 This critique of the securitization and criminalization of asylum seeking challenges the claim that asylum seekers threaten receiving states It analyzes recent policy developments in relation to their wider

historical political and European contexts and argues that the UK response effectively renders asylum seekers as scapegoats

**The Migration Question** Leila Simona Talani, Matilde Rosina, 2025-06-12 This authoritative book proposes a fresh perspective on international migration offering decisive answers to the big questions and dismantling the main myths surrounding one of the most salient issues of today's global politics Who are these migrants Do they steal our jobs Can we help them in their home countries Do border controls improve security Are open borders desirable Leila Simona Talani and Matilde Rosina address these issues and more in their deeply researched study of migration into both Europe and the United States Assessing globalisation's impact on international migration the authors find that it is virtually impossible to stop contemporary flows from the Global South to North In this context policies designed to control limit or deter immigration simply transform some or all regular migrants into irregular ones exacerbating insecurity for citizens of the receiving state and criminalising the migrants Through empirical research including original surveys and interviews Talani and Rosina demonstrate conclusively that the only solution to this short circuit world of securitisation and criminalisation is for the Global North to open its doors to the migrants already inevitably coming through particularly since the evidence shows that regularising migration is a positive sum game in economic social and security terms

**EU Migration Law** Loïc Azoulay, Karin de Vries, 2014-03-20 Large scale migration constitutes an unavoidable social reality within the European Union A European polity is made possible and tangible by the individual acts of migrants crossing the internal borders developing a transnational life and integrating into European societies Consequently migration has become a special feature of the self understanding of the European Union its existence depends upon a continuing flow of persons crossing the borders of the Member States and also upon the management of the flows of third country nationals knocking at its doors To respond to this challenge the Union has developed common European migration policies This book is a collection of essays which aim to explore a selected number of issues related to the development of these policies It presents the current state and the future of European immigration law discussing the political rationales and legal competences driving the action of the Union in this area It reflects on the cooperation of the Union with third countries and on the emergence of international migration legal norms It illustrates the role of the European Courts and the emergence of new actors through the adoption of EU instruments

*Impact of Immigration and Xenophobia on Development in Africa* Mafukata, Mavhungu Abel, 2020-12-25 Human movement has an influence on the socio economic dynamics of people regions and countries The schisms between host and immigrants impact how host countries utilize immigrant skills and expertise to benefit their economies However immigrants are impacted by negative diplomatic relations between countries that limit the free movement of people and the welfare of immigrants In association this brings about social challenges such as Afrophobia racism xenophobia hatred and violence within these countries While these challenges are deeply rooted across the world Africa has its own unique challenges Still struggling with massive underdevelopment Africa needs to remove all the negative factors that could impede its quest of

achieving development imperatives Impact of Immigration and Xenophobia on Development in Africa analyzes the genesis and evolution of immigration in Africa and how this has resulted in social challenges such as xenophobia within the continent The book focuses on demonstrating how immigrant skills and expertise can be positively utilized to assist African development and asserts the existence of xenophobia in respective countries does not assist Africa's quest of resolving its own challenges The chapters within this book therefore explore how this subsequent output of xenophobia has impacted African development and focuses on the revival of Pan Africanism as a uniting instrument and ideology for Africans This book is a valuable reference tool for activists retired and practicing politicians governments policymakers practitioners stakeholders researchers students and academicians

European Research Reloaded: Cooperation and Integration among Europeanized States Ronald Holzhaacker, Markus Haverland, 2006-09-01 The Three Waves of European Research European cooperation and integration has continued to progress forward over the past five decades with an ever deepening impact on the member states The first wave of research into these processes concerned European integration the process of institution building and policy developments at the European Union EU level The second wave on Europeanization used integration as an explanatory factor in understanding domestic political change and continuity related to the EU What is now necessary is to link our understanding of these bottom up and top down processes of integration and Europeanization in the EU This book argues that a third wave of research on the EU is needed to adequately understand the increased interconnectedness between the European and national political levels We posit that this third wave should be sensitive to the temporal dimension of European integration and Europeanization In particular we seek to link the processes of European integration and Europeanization in a new way by asking the question how has Europeanization affected current modes of integration and cooperation in the EU Part I Europeanization of the Member States Preparing the ground for the third wave the first part of the book concerns Europeanization In order to fully understand the feedback of Europeanization on cooperation and integration it is important to analyze how European integration has had an impact on member states in the first place in particular indirectly beyond the direct mechanism of compliance with European policies

**International Handbook of Urban Policy: Contentious global issues** H. S. Geyer, 2007-01-01 This first Handbook in a series of three original reference works looks at globally contentious urban policy issues from a wide variety of different angles and perspectives Matters related to urban densification population mobility urban inequality and sustainability are analysed in a manner that will not only interest the advanced student but also the novice Urban policy covers a vast field This first volume combines chapters covering three broad themes policy issues pertaining to the spatial aspects of the city social and mobility issues and issues of urban governance The spotlight initially falls on urban structure urban densification the disappearing urban rural divide the urban economic landscape and the transformation of socialist economies The Handbook then goes on to focus on migration social mobility crime terrorism and social inequality Finally urban sustainability and urban governance come under

the spotlight Integration of the planning process flexibilities in infrastructure and areas of neglect in environmental management feature strongly in this section of the Handbook Books of this nature are often slanted in one particular direction however this Handbook s approach is different Not only has the editor avoided shying away from politically sensitive issues but contributions have also been included that reflect distinct differences of opinion on politically sensitive issues hence the volume s subtitle of contentious global issues As a Handbook the chapters have been written not only for the advanced student and academics but also with undergraduate students in mind The Handbook will appeal to scholars and researchers of geography and urban and development planning demography and social science and environmental scientists for the focus on urban sustainability issues
