Parliamentary Communication in EU Affairs Katrin Auel,Tapio Raunio,2016-03-17 Over the last twenty years the role of national parliaments in EU affairs has gained considerable academic attention Much of the literature however has focused on parliamentary scrutiny and control in EU affairs What tends to be generally overlooked is that the parliamentary communication function is at least as important in EU politics as the control function Democratic legitimacy depends on a vibrant public debate on political solutions and alternatives to allow citizens to make informed political electoral choices and to exercise democratic control Within the EU it is precisely the opacity of policy making processes and the lack of public discourse that have been defined as core problems of democratic legitimacy Here parliaments have the potential to provide an ideal arena for the deliberation of important European issues and thus to help overcome the much lamented distance between European policy processes and the citizens Yet despite parliaments central relevance for the legitimacy of European politics the parliamentary communication function

remains so far under researched The volume aims at filling this gap by providing both qualitative and quantitative comparative data on various communication efforts by national parliaments This book was originally published as a special issue in the Journal of Legislative Studies The Europeanization of European Politics C. Bretherton, M. Mannin, 2013-05-14 This book presents a comparative perspective to the study of European politics focusing on the unique and transformative effect of European Union on the politics of its member states in effect the Europeanization of European politics For no other world region is there a similar intensity of Treaty and other obligations on a set of neighboring states nor a comparable depth of of supranational governance The concept of Europeanism as an evaluative theme is used to explore this unique sui generis region its states and its political transformation in the 21st century **Politics in Europe** M. Donald Hancock, Michelle Hale Williams, Marjorie Castle, Christopher J. Carman, David P. Conradt, Alan Convery, Robert Leonardi, Raffaella Y. Nanetti, Jan Teorell, Sofia Tipaldou, 2024-03-12 Politics in Europe introduces students to the power of the EU and seven political systems the UK France Germany Italy Sweden Russia and Poland while addressing key social and political issues including globalization terrorism immigration gender and religion Packed with robust country descriptions from regional specialists the Eighth Edition encourages critical thinking and meaningful cross national comparisons *Shakespeare and European Politics* Dirk Delabastita, Jozef de Vos, Paul Franssen, 2008 This volume s main focus is on the ways in which over the past 400 years Shakespeare has played a role of significance within a European framework particularly where a series of political events and ideologically based developments were concerned such as the early modern wars of religion the emergence of the nation during the late eighteenth and nineteenth centuries the First and Second World Wars the process of European unification during the 1990s the attack on the World Trade Center in New York and Britain s participation in the war in Iraq The whole of the collection and particularly the opening section clearly invites a European and even a global perspective This book convincingly demonstrates that Shakespeare both at the level of his meaning in his own time and at that of his reception in later ages should no longer be studied only in relation to particular nations but as Dirk Delabastita argues also at various supranational levels Book Jacket *Authoritarianism and the Evolution of West European Electoral Politics* Erik R. Tillman, 2021-07-22 Authoritarianism and the Evolution of West European Electoral Politics provides a novel explanation of rising Euroscepticism and right wing populism in Western Europe The changing political and cultural environment of recent decades is generating an ongoing realignment of voters structured by authoritarianism which is a psychological disposition towards the maintenance of social cohesion and order at the expense of individual autonomy and diversity High authoritarians find the values and demographic changes of the past several decades a threat to social cohesion which has created an opportunity for PRR parties to gain their support by campaigning against these perceived threats to national community posed by immigration values change and European integration The result is a worldview evolution in which party conflict is shaped by the rival preferences of high and low authoritarians Drawing on national and cross national survey data

as well as an original survey experiment this book demonstrates how the relationship between authoritarianism and 1 attitudes towards the EU and 2 voting behaviour has evolved since the 1990s In doing so this book advances these literatures by providing an explanation for why certain voters are shifting towards PRR parties as electoral politics realigns
