European Security Architecture Cold:

A European Security Architecture after the Cold War G. Aybet, 2000-06-05 A European Security Architecture after the Cold War provides a critical account of the re projection and redefinition of Western values and security institutions in the post Coldwar era This transformation is explored in three stages The first stage covers the period 1990 91 and explains the preservation of a western security community inherited from the Cold War through a process of institutional reconstruction largely carried out on paper The second stage from 1991 to 1992 sees the incorporation of a purpose for these institutions as a framework for the implementation of collective security The third stage explores the emerging questions of legitimacy surrounding the new tasks of these institutions as they become embroiled in the war in the former Yugoslavia The precedents of legitimate intervention in upholding democracy free markets and human rights in the post coldwar era are examined from the perspectives of international law and Gramscian derived concepts of legitimacy focusing on the acceptance of military power by civil society and how intervention in these terms becomes a cultural practice *The European Security and Defense Architecture and the Russian Federation* Michael Hofmann, 2008-02 Essay from the year 2006 in the subject Politics International Politics Topic Peace and Conflict Studies Security grade 62 UK system University of Kent language English abstract During his speech at the Security Conference in Munich in February this year the Russian Defence Minister Ivanov emphasised that there is plenty of work to be done concerning the relations between Russia and the European Union EU in the fields of security and defence policy Further he urged for the deepening of the dialogue between Russia and the North Atlantic Treaty Organization NATO A successful Europe according to Ivanov cannot be built without a close partnership between Russia and the European security institution Ivanov s speech constitutes an adequate example for efforts of the Russian Federation aimed at getting more involved into European security issues By examining the completed NATO and EU enlargements in 1999 and 2004 the ambition of Russia to have an influential say in European security questions becomes obvious Being confronted with enlargement processes that incorporated a former Soviet sphere of influence the Russian Federation regards itself as being excluded Both sides EU NATO and Russia currently do not consider full Russian accession to these organisations as a possible and desirable policy option in the short and medium term Therefore European security institutions are facing the problem of finding a way to cooperate with those states that do not wish or are not allowed to join these institutions How to fit in the Russian Federation can thus be regarded as one of the most urgent issues in European security policies This essay will argue that the underpinnings of the security cooperation are actually very fragile and are lacking substance In particular the lack of a shared set of common aims interests and values make it difficult to develop a sustainable security partnership between Europe s security institutions and Russia

European Security and Hybrid Threats Zeynep Arkan, 2025-03-21 Hybrid threats have been defined in various ways by different security actors with their scope continuously expanding to encompass emerging insecurities within the evolving security environment. As an umbrella term encompassing a wide spectrum of threats with complex and multidimensional features, the notion of hybrid threats remains inherently vague and amorphous. This lack of clarity presents significant challenges for policymakers who must constantly identify potential dangers, anticipate risks, and formulate effective responses to safeguard their polities and populations. Consequently, a persistent sense of insecurity has become a defining characteristic of the current European security landscape. This new normal of European security is characterised by a series of unknown unknowns that fall under the elusive concept of hybrid threats. However, rather than accepting this evolving security paradigm at face value, this study calls for a critical examination of its underlying assumptions, core concepts, and broader political implications. It argues that the hybrid threat narrative demands a re-evaluation of what security means in contemporary Europe and how it is operationalised. Moreover, the study underscores the expansive nature of the hybrid threat framework, which has the potential to include virtually any domain ranging from education and technology to research and public infrastructure, thereby contributing to the securitisation of all aspects of social and political life. This expansive and ambiguous framing raises important questions about the limits of security and allocation of resources, carrying considerable implications for democratic governance in Europe. Dr Zeynep Arkan is an Associate Professor of International Relations at Hacettepe University, Ankara, and a Visiting Fellow at the Österreichisches Institut für Internationale Politik, Vienna. She holds a BSc from Middle East Technical University, Ankara; an MA from Exeter University, Exeter; and a PhD from the University of Kent, Canterbury.

Russian Conflict Management and European Security

Governance Lance Davies, 2020-09-23 Russia's controversial annexation of Crimea in 2014 and its involvement in the conflict in Ukraine have left international audiences stunned. Russia now occupies a central place on the Western security agenda and has been recast as an important area of scholarly inquiry. The conflict has raised important questions about Russia's understanding of conflict management and its approach to contemporary European security. This book provides a timely and contextual exploration of Russia's post-Soviet legacy of conflict management in the backdrop of its interaction with Europe's system of security governance. By exploring Russia's approach from the early 1990s to the present day, the book offers a comprehensive exploration into the evolution of Russian behavior, investigating whether Russia's approach has developed in accordance with the policies and practices of security governance that have emerged in the European experience of conflict management. Together with extensive documentary analysis and elite interviews, it employs the framework of security governance to examine Moscow's behavior across a set of case studies situated in the European political and security environment. It offers a timely contribution to our understanding of Russia's response to intrastate conflict and Russia's broader engagement with its contemporary security environment.
