Life and Death in Healthcare Ethics Helen Watt, 2002-01-31 In a world of rapid technological advances the moral issues raised by life and death choices in healthcare remain obscure Life and Death in Healthcare Ethics provides a concise thoughtful and extremely accessible guide to these moral issues Helen Watt examines using real life cases the range of choices taken by healthcare professionals patients and clients which lead to the shortening of life The topics looked at include euthanasia and withdrawal of treatment the persistent vegetative state abortion IVF and cloning life saving treatment of pregnant women Clearly written and insightful Life and Death in Healthcare Ethics presupposes no prior knowledge of philosophy It will be of interest to anyone confronting healthcare ethics for the first time or seeking to develop his or her understanding of some core topics in the field *Law, Ethics and Compromise at the Limits of Life* Richard Huxtable, 2013 A conflict arises in the clinic over the care of a critically ill incapacitated patient The clinicians and the patient's family confront a difficult choice to treat or not to treat Decisions to withdraw or withhold life sustaining treatment feature frequently in the courts and in the world's media with prominent examples including the cases of Charlotte Wyatt in the UK and Terri Schiavo in the USA According to legislation like the Mental Capacity Act 2005 the central issues are the welfare or best interests of the patient alongside any wishes they might have conveyed via an advance directive or through the appointment of a lasting power of attorney Richard Huxtable argues that the law governing both welfare and wishes frequently fails to furnish clinicians and families with the guidance they require However he finds this unsurprising given the competing ethical issues at stake Huxtable proposes that there is a case for principled compromise here such that the processes for resolving principled disputes take precedence He argues for greater ethical engagement through a reinvigorated system of clinical

ethics support in which committees work alongside the courts to resolve the conflicts that can arise at the limits of life Providing a comprehensive account of the law pertaining to children and adults alike and distinctively combining medico legal and bioethical insights this book engages scholars and students from both disciplines as well as informing clinicians about the scope and limits of law at the limits of life

**The Methods of Bioethics** John McMillan, 2018-11-30 This is the first book in bioethics that explains how it is that you actually go about doing good bioethics Bioethics has made a mistake about its methods and this has led not only to too much theorizing but also fragmentation within bioethics The unhelpful disputes between those who think bioethics needs to be more philosophical more sociological more clinical or more empirical continue While each of these claims will have some point they obscure what should be common to all instances of bioethics Moreover they provide another phantom that can lead newcomers to bioethics down blind alleyways stalked by bristling sociologists and philosophers The method common to all bioethics is bringing moral reason to bear upon ethical issues and it is more accurate and productive to clarify what this involves than to stake out a methodological patch that shows why one discipline is the most important This book develops an account of the nature of bioethics and then explains how a number of methodological spectres have obstructed bioethics becoming what it should In the final part it explains how moral reason can be brought to bear upon practical issues via an empirical Socratic approach

Justiciability of Human Rights Law in Domestic Jurisdictions Alice Diver,Jacinta Miller,2015-12-15 This collection of 16 essays by 19 contributors calls into question the notion of domestic justiciability across a wide range of human rights issues such as health human dignity criminal justice property and transitional democracy The authors offer critical analyses of a number of rights frameworks focusing in considerable detail upon specific countries e g Libya Colombia Ireland the United Kingdom Northern Ireland South Africa Nigeria Zimbabwe Kenya India and regions e g Europe Africa to highlight the various challenges which continue to vex human rights advocates and scholars In doing so they pinpoint some of the major tensions that still exist within developing and developed jurisdictions via a myriad range of perspectives The essays collectively present a diverse assortment of themes unified by a single golden thread that of the domestic

interpretations given to human rights protections They raise questions as to how such rights might be made substantive at the level of domestic implementation and query the extent to which these rights can or even should be enforced by the courts The potential strains in the relationship between human rights and the rule of law is further called into question by another central theme that of human dignity A fundamental dilemma arises in respect of the extent to which a right to dignity can best be promoted protected or monitored by domestic decision makers Similar issues are apparent within the context of the protection of those human rights which increasingly tend to engage social political or economic considerations and interests Whilst these arguments are often framed principally in terms of rights the collective message that emerges from this book is that such rights may often be in fact essentially non justiciable Readers of this text will perhaps feel compelled to reflect carefully and fully upon what it tells us about human rights law generally and the extent to which such rights may be truly amenable to adjudication by the courts

*The Dying Experience* Samuel H. LiPuma, Joseph P. DeMarco, 2019-03-27 This vitally important book attempts to move beyond the current death denying culture The use of euphemistic and defiant phrases when dealing with terminal disease such as She lost her battle with cancer was more appropriate when medical doctors could do little to prolong life But treatments and technologies have significantly changed Now life prolonging interventions have outpaced our willingness to use medical intervention to secure patient control over death and dying We now face a new question When is it morally appropriate for medical intervention to hasten the dying process LiPuma and DeMarco answer by endorsing expanded options for dying patients Unwanted aggressive treatment regimens and protocols which reject hastening death should be replaced by a patient's moral right in carefully defined circumstances to hasten death by means of medical intervention Expanded options range from patient directed continuous sedation without hydration to physician assisted suicide for those with progressive degenerative disorders such as Alzheimer's The authors overriding goal is to humanize the dying process by expanding patient centered autonomous control
