Evaluating Teachers And Administrators A Performance Objectives Approach Westview Special Studies In Education:

Evaluating Teachers And Administrators George B. Redfern, 2019-04-05 Stressing the importance of using evaluation as a means to improve teacher and administrator performance Dr Redfern provides a practical guide to conducting an evaluation and using its results He thoroughly describes the anatomy of the evaluation process outlines the materials needed and covers such often neglected topics as evaluation of substandard performance assessment of the performance of administrators and supervisors evaluation as an administrative tool in education management and the potential pitfalls inherent in the evaluation process The book closes with detailed suggestions for developing or revising programs for personnel evaluation

Rural Education In Urbanized Nations Jonathan P Sher, 2019-06-26 A reversal in rural to urban migration patterns is creating increasing interest in the quality of education in rural areas and in techniques for meeting educational needs in sparsely populated regions Wholesale urbanization of rural schools generally is rejected as a potential solution it is logistically inefficient centralization and standardization are met with growing resistance and conventional solutions to educational problems produce uneven results when applied to rural areas This book addresses the broad spectrum of rural education issues within OECD member countries The authors identify innovative programs policies and strategies and point toward the more promising paths for rural school improvement They also issue warnings about some of the blind alleys and dead ends that can be encountered The major topics covered include delivery systems in school innovations support mechanisms and community school linkages

Rural Education Paul M. Nachtigal, Paul Nachtigal Director, 2019-06-26 The close knit personal nature of small rural communities results in school and community operating as a single integrated social structure Useful rural school improvement strategies must therefore address needs that are recognized by both the local school and the community and must operate in a style congruent with the local setting Although outside ideas and resources may contribute greatly to successful plans to improve rural schools a high level of local involvement is essential in determining the specifics of those plans This is clearly demonstrated by the thirteen case studies presented in this book in which the strategies that have been effective over time in resolving rural school problems are distinguished by a high degree of local participation The cases chosen to provide good examples of particular strategies and also to represent the diversity that characterizes rural America cover centrally designed heavily funded programs as well as small scale locally initiated efforts in such areas as teacher training the introduction of new curricula and community participation in education decision making and political action The final chapters analyze the case studies in practical terms and recommend policy and practice for future rural school improvement
