It will wide diversity of research under the rubric of 'contemporary political science'; nonetheless, it is possible to delineate a characteristic set of features inherent in a prevailing understanding of politics that is indeed recognizable, and is deserving of deep critical scrutiny. Furthermore, these features may be effectively exposed by a systematic contrast with the very different procedure of the classical study of politics.

2. OVERVIEW AND DEFINITION OF POLITICAL SCIENCE

Political science is that branch of the social sciences that studies the state, politics, and government. *Political Science deals extensively with the analysis of political systems, the theoretical and practical applications to politics, and the examination of political behaviour.* The Greek thinker, Aristotle, defined political science as the study of the state. Evaluating Democracy Joe Allman, Walt Anderson, 1974 *Evaluating Democracy; an Introduction to Political Science*
[By] Joe Allman [And] Walt Anderson Joe Allman (Comp), Walt Anderson, 1974 **How Europeans View and Evaluate Democracy** Mónica Ferrín, Hanspeter Kriesi, 2016-03-04 Based on a new data set covering 29 European and neighboring countries this volume shows how Europeans view and evaluate democracy what are their conceptions of democracy how do they assess the quality of democracy in their own country and to what extent do they consider their country's democracy as legitimate The study shows that Europeans share a common view of liberal democracy which is complemented by elements of social and direct democracy which go beyond the basic liberal model The level of their demands in terms of democracy varies however considerably across Europe and is related to their assessment of democracy the worse the quality of democracy in a given country the higher the respective demands on democracy The analysis of the determinants of democratic views and evaluations shows that they depend on the political and economic but less on the cultural context conditions Comparative Politics is a series for students teachers and researchers of political science that deals with contemporary government and politics Global in scope books in the series are characterised by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu The Comparative Politics series is edited by Emilie van Haute Professor of Political Science Université libre de Bruxelles Ferdinand Müller Rommel Director of the Center for the Study of Democracy Leuphana University and Susan Scarrow Chair of the Department of Political Science University of Houston **How Europeans View and Evaluate Democracy Revisited** Mónica Ferrín, Hanspeter Kriesi, 2025-01-29 In 2012 How Europeans View and Evaluate Democracy assessed the Europeans views and evaluations of the state of democracy after one of the deepest economic and financial crises worldwide Against the most pessimistic Zeitgeist the book found that there was overwhelming support for democracy in Europe even if the breadth and scope of the citizens demands for their democratic systems varied within and between countries Importantly with very few exceptions the implementation of the basic democratic principle of free and fair elections was well evaluated across Europe However analysis also showed that there was room for improvement in many countries according to the citizens evaluations Overall in 2012 there were no symptoms of a democratic crisis in Europe Ten years and several crises later the authors reassess how Europeans view and evaluate democracy and that many changes that have occurred in the meantime This book How Europeans View and Evaluate Democracy Revisited compares how Europeans view and evaluate democracy in 2021/22 and in 2012 based on surveys in 24 European countries It shows that Europeans continue to be attached to democratic ideals and that they continue to be rather dissatisfied with the way these ideals are implemented in their country The liberal democratic model continues to enjoy great support just as it did a decade ago and there is also support for additional models of democracy for social direct and populist democracy Surprisingly the populist

model turns out to be a complement rather than a substitute for the other models Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterized by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu The series is edited by Nicole Bolleyer Chair of Comparative Political Science Geschwister Scholl Institut LMU Munich and Jonathan Slapin Professor of Political Institutions and European Politics Department of Political Science University of Zurich
