Strategies to Reduce Student

Misbehavior Oliver Clinton Moles, 1989 *Media Education Assessment Handbook* William G. Christ, 2020-07-24

Assessing media education is a formidable task because both assessment and media education are complex and controversial concepts. Assessment which can take place at the individual student, class, sequence, program, department or unit and university levels is questioned in terms of reliability, validity, relevance and cost. Media education which has been challenged at a number of schools finds faculty and administrators in the midst of soul searching about how to clearly articulate its missions and purposes to a broader audience. Departments are under increasing national, state and institutional pressure to get assessment procedures carried out quickly but there is an obvious danger in rushing to implement assessment strategies before establishing what is essential in media education. In communication education in general the what of assessment is often discussed in terms of skills, attitudes, affect, values and knowledge. People assess students to determine what they know, think, feel, value and can do. Here it is suggested that one of the places to start defining what students should learn from their media education is by identifying outcomes. Outcomes can be assessed in a variety of ways but first they need to be developed and clearly articulated.

DHHS Publication No. (PHS). , 1990 Cost-Effectiveness in the Nonprofit Sector Gerald L. Schmaedick, 1993-03-30. This work not only makes the case that responsible nonprofit managers must routinely utilize cost effectiveness analysis but also gives many outstanding examples of how it can be done. The examples are drawn from prestigious nonprofit organizations as varied as the National Gallery of Art, Girls Inc and the Nature Conservancy. Drawing on TechnoServe's search for a practical methodology to measure the cost effectiveness of its own work, editor Schmaedick provides a unique synthesis of the principles of cost effectiveness analysis in the opening chapter. The guidelines he provides are almost universally applicable and make cost effective management an attainable goal for all nonprofits. Rather than subject the reader to arcane explanations of intricate mathematical formulae, Schmaedick provides hard nosed practical directions for nonprofit managers. Those seriously interested in upgrading the management systems of their organizations to produce more results at lower costs will find this a challenging but not intimidating prescription.
