## **Evaluation Of Entrepreneurship Development Programmes:**

**Evaluation of Entrepreneurship Development Programmes** Dinesh Narain Awasthi, Jose Sebastian, 1996-01-01 This book assesses the efficacy degree of success and the contribution of entrepreneurship development programmes in India It delineates the factors contributing to the success or failure of EDPs and evaluates the role of support agencies with reference to the promotion of first generation entrepreneurs through these programmes The authors view EDPs as essential for promoting the social and spatial diversification of entrepreneurship in India They conclude that the EDPs on the whole stand the test of cost benefit criteria and that scepticism about either their value or their contribution is unjustified To make these programmes more effective what needs to be done is to streamline the process of implementation The authors suggest a number of corrective measures to this end     Evaluation of Entrepreneurship Development Programmes Dinesh N

Awasthi, Jose Sebastian, 1996-05-07 The efficiency success and contribution of entrepreneurship development programmes EDPs in India are the focus of this volume The authors highlight the factors contributing to the success or failure of such programmes and evaluate the role of support agencies with reference to the promotion of first generation entrepreneurs through EDPs Centring on data generated from extensive interviews and using both quantitative and qualitative techniques Dinesh N Awasthi and Jose Sebastian analyze the factors affecting the quality of EDPs They conclude that while EDPs have fulfilled expectations to a great extent they need to be streamlined to become more efficient and easier to implement

Dwivedi, This book has been written with total focus on meeting the objectives of the subject Industrial Project and Entrepreneurship Development as given by the syllabus of WBSCTE The text has been written so as to create interest in the minds of students in learning further     The Impact Evaluation of Cluster Development Programs Franco Boneu, David

Alfaro Serrano, Alessandro Maffioli, Carlo Pietrobelli, Gabriel Casaburi, Victoria Castillo, Lucas Figal Garone, Elisa Giuliani, David Giuliadori, Andrés Matta, Lucía Pittaluga, Alejandro Rodríguez, 2016-05-02 Do cluster development programs work Do they fundamentally encourage the essential inter firm linkages and coordination Do they lead to innovation and productivity enterprise development larger employment and export growth and if so after how long Do other firms benefit from these programs This book offers insight into quantitative methods that help answer these questions Cluster development is a form of modern industrial policy that is spreading across the world to help exploit the externalities

emerging from geographical agglomeration and inter firm coordination Therefore rigorous impact evaluations are necessary because they help policymakers understand better ways to design future programs and provide accountability for public resources The chapters argue that enterprise clusters and the programs to support them are diverse and multidimensional processes that require a variety of instruments to be fully understood and assessed The book as a whole gathers various methodological essays and quantitative tests of complementary tools and approaches emphasizing their usefulness and effectiveness in coordination with one another Most importantly it asserts that policy evaluation is crucial in particular when it comes to cluster development programs to ensure the best use of public resources the accountability of beneficiaries and most of all to feed the necessary learning to improve the design and implementation of public policies for enterprise development

**Government, SMEs and Entrepreneurship Development** Robert A. Blackburn, 2016-04-22 Recent decades have seen substantial growth in the

range of assistance programmes for SMEs and entrepreneurs across the world. Once regarded as peripheral to the economy and public policy, the role of small firms and of entrepreneurship is now recognized as of key importance in the economic growth and development strategies of many nations. The range of interventions and support focused on promoting SMEs and entrepreneurship is substantial and expanding. So Government SMEs and Entrepreneurship Development asks what are some of the main policy instruments being used and how effective are they? It considers policies in different countries, examines key interventions and tools used to promote entrepreneurship and SME development and concludes with contributions on how to best evaluate their effectiveness. The contributor chapters by academics and practitioners from businesses, enterprise development agencies and governments are empirical or evidence based and use both quantitative and qualitative approaches. Drawing on experience from a wide range of both developed and emerging countries and economies, the contributions focus on the broad strategies that different governments and communities have adopted to foster entrepreneurship and SMEs, the policy tools and instruments that can be used to promote small business and entrepreneurship and on the outcomes of policy instruments and the methods used to evaluate interventions. Their findings will help researchers, policy makers, economic development officers, civil servants, elected officials and business associations to better understand the issues in this important field.
