Evans Pritchard His Life Work Writings And Ideas:

The Institutional Dynamics of Culture, Volumes I and II Perri Six, 2018-12-20 These two volumes present the most important recent developments in the institutional theory of culture and demonstrate their practical applications Sometimes called grid group analysis or cultural theory they derive from the work of Durkheim in the 1880s and 1900s and develop the insights of the anthropologist Mary Douglas and her followers from the 1960s on First redefined within social and cultural anthropology the theory's influence is shown in recent years to have permeated all the main disciplines of social science with substantial implications for politics history business work and organizations the environment technology and risk and crime and consumption Today the institutional theory of culture now rivals the rational choice Weberian and postmodern outlooks in influence across the social sciences After Society João Pina-Cabral, Glenn Bowman, 2020-07-01 In the early 1980s when

the contributors to this volume completed their graduate training at Oxford the conditions of practice in anthropology were undergoing profound change Professionally the immediate postcolonial period was over and neoliberal reforms were marginalizing the social sciences Analytically the poststructuralist critique of the notion of society challenged a discipline that dubbed itself as social Here self ethnography is used to portray the contributors anthropological trajectories showing how analytical and academic engagements interacted creatively over time *Explaining Political Judgement* Perri

6, 2011-09-22 What is political judgement Why do politicians exhibit such contrasting thought styles in making decisions even when they agree ideologically What happens when governments with contrasting thought styles have to deal with each other In this book Perri 6 presents a fresh rigorous explanatory theory of judgement its varieties and its consequences drawing upon Durkheim and Douglas He argues that policy makers will understand and misunderstand their problems and choices in ways that reproduce their own social organisation This theory is developed by using the Cuban Missile Crisis of 1962 as an extended case study examining the decision making of the Kennedy Castro and Khrushchev regimes *Explaining Political Judgement* is the first comprehensive study to show what a neo Durkheimian institutional approach can offer to political science and to the social sciences generally **Ancient Divination and Experience** Lindsay Gayle

Driediger-Murphy, Esther Eidinow, 2019 How did people in the ancient world experience their attempts to communicate with divine powers This volume seeks to re examine divination in ancient Greek Roman Mesopotamian and Chinese cultures and to identify and elucidate previously understudied aspects of ancient divinatory experience and practice

Conspiracy/Theory Joseph Masco, Lisa Wedeen, 2023-12-01 In an era of intensified information warfare ranging from global disinformation campaigns to individual attention hacks what are the compelling terms for political judgment How are we to build the knowledge needed to recognize and address important forms of harm when critical information is either not to be trusted or kept hidden Rather than approach conspiratorial narrative as an irrational response to an obviously decipherable reality Conspiracy Theory identifies important affinities between conspiracy theory and critical theory It

recognizes the motivation people have in their capacities as experts theorists and ordinary citizens to search for patterns in events to uncover what is covert and attend to dimensions of life that might be hiding in plain sight If it seems strange that so many find themselves living in incommensurable disorienting realities the multidisciplinary contributors to Conspiracy Theory explore how and why that came to be Across history and geography contributors inquire into the affects and imaginaries of political mobilization tracking counterrevolutionary projects while acknowledging collective futures that demand conspiratorial engagement Contributors Nadia Abu El Haj Hussein Ali Agrama Kathleen Belew Elizabeth Anne Davis Joseph Dumit Faith Hillis Lochlann Jain Demetra Kasimis Susan Lepselter Darryl Li Louisa Lombard Joseph Masco Robert Meister Timothy Melley Rosalind C Morris George Shulman Lisa Wedeen

An Analysis of E.E. Evans-Pritchard's Witchcraft, Oracles and Magic Among the Azande Kitty Wheeler, 2017-07-05 The history of anthropology is to a large extent the history of differing modes of interpretation As anthropologists have long known examining analyzing and recording cultures in the quest to understand humankind as a whole is a vastly complex task in which nothing can be achieved without careful and incisive interpretative work Edward Evans Pritchard's seminal 1937 *Witchcraft Oracles and Magic Among the Azande* is a model contribution to anthropology's grand interpretative project and one whose success is based largely on its author's thinking skills A major issue in anthropology at the time was the common assumption that the faiths and customs of other cultures appeared irrational or illogical when compared to the civilized and scientific beliefs of the western world Evans Pritchard sought to challenge such definitions by embedding himself within a tribal culture in Africa that of the Azande and attempting to understand their beliefs in their proper contexts By doing so Evans Pritchard proved just how vital context is to interpretation Seen within their context he was able to show the beliefs of

the Azande were far from irrational and magic actually formed a coherent system that helped mould a functional community and society for the tribe Evans Pritchard's efforts to clarify meaning in this way have proved hugely influential and have played a major part in guiding later generations of anthropologists from his day to ours **Mary Douglas** Paul Richards, Perri 6, 2023-09-15 This handy concise book covers the life of Mary Douglas one of the most important anthropologists of the second half of the 20th century Her work focused on how human groups classify one another and how they resolve the anomalies that then arise Classification she argued emerges from practices of social life and is a factor in all deep and intractable human disputes This biography offers an introduction to how her distinctive approach developed across a long and productive career and how it applies to current pressing issues of social conflict and planetary survival From the Preface The influence of Professor Dame Mary Douglas 1921 2007 upon each of the social sciences and many of the disciplines in the humanities is vast The list of her works is also vast and this presents a problem of choice for the many readers who want to get a general idea of what she wrote and its significance but who are somewhat baffled about where to begin Our book offers a short overview and suggests why her key writings remain significant today *World* João de Pina-Cabral, 2017-02-15 What do we mean when we refer to world How does the world relate to the human person Are the two interdependent and if so in what way What does world mean for an ethnographer or an anthropologist Much has been said of worlds and worldviews but do we really know what we mean by these words Asking these questions and many more this book explores the conditions of possibility of the ethnographic gesture and how these shed light on the relationship between humans and the world in the midst of which they find themselves As Pina Cabral shows recent decades have seen important shifts in the way we relate human thought to human embodiment the relation between how we think and what we are The book proposes a novel approach to the human condition an anthropological outlook that is centered around the notions of personhood and sociality Through a rich confrontation with ethnographic and historical material this work contributes to the ongoing task of overcoming the theoretical constraints that have hindered anthropological thinking over the past century Selected Writings: Taboo, truth, and religion Franz Baermann Steiner, 1999 Steiner's 1909 52 classic study Taboo and three other essays on superstition enslavement and the early Hebrew lineage system and Chagga law and truth comprise the first of two volumes collecting the work of the Prague born social and cultural anthropologist who ended his brief career at Oxford Adler German King's College London and Fardon West African anthropology School of Oriental and African studies London examine his life and critique his work Annotation copyrighted by Book News Inc Portland OR

Mary Douglas Richard Fardon, 2002-01-04 This is the first full length account of the life and ideas of Mary Douglas the British social anthropologist whose publications span the second half of the twentieth century Richard Fardon covers Douglas family background and the pervasive influence of her catholic faith on her writings before providing an analysis of two of her most influential works Purity and Danger 1966 and Natural Symbols 1970 The final section deals with Douglas more

controversial writings in the fields of economics consumption religion and risk analysis in contemporary societies Throughout Fardon highlights the centrality of Douglas role in the history of anthropology and the discipline s struggle to achieve relevance to contemporary western societies

Athletes and Oracles Catherine Morgan,1990-02-22 This book is a study of the origins and development of cult practice at Olympia and Delphi It traces changing patterns of activity through the material record and challenges many assumptions about the nature and role of the archaeological data Dr Morgan considers the economics of dedication technology and the organization of craft production which provide insights into the behaviour of producers and purchasers of material dedicated at sanctuaries Her study is exceptional for the emphasis placed upon the two sites in their contemporary local contexts and their changing roles in society The progression of state formation is discussed through the relationship between changes in dedicatory practice during the eighth century and the changing needs of communities The book concludes with a detailed study of the wider roles of Olympia and Delphi as two major sanctuaries in Archaic Greece considering their relationships with other sites and their place in the Greek festival calendar
