Event History Analysis In Life Course Research Life Course Studies Paperback:

Event History Analysis in Life Course Research Karl Ulrich Mayer, Nancy Brandon Tuma, 1990 A compendium of studies drawn from an international conference this volume includes the newest and most substantive work on event history analysis Researchers at four institutions convened shared models of analysis and collected their findings for the first time The studies included represent work done in the following organizations The Max Planck Institute in West Germany The U S Social Science Research Council s Committee on Comparative Stratification The Special Research Unit of the Deutsche Forschungsgemeinschaft and MASO and informal German working group on mathematical sociology This book is one of twelve in the University of Wisconsin Press s Life Course Studies series arranged by the series editors David L Featherman and David I Kertzer

Handbook of the Life Course Michael J. Shanahan, Jeylan T. Mortimer, Monica Kirkpatrick Johnson, 2015-10-26 Building on the success of the 2003 Handbook of the Life Course this second volume identifies future directions for life course research and policy The introductory essay and the chapters that make up the five sections of this book show consensus on strategic next steps in life course studies These next steps are explored in detail in each section Section I on life course theory provides fresh perspectives on well established topics including cohorts life stages and legal and regulatory contexts It challenges life course scholars to move beyond common individualistic paradigms Section II highlights changes in major institutional and organizational contexts of the life course It draws on conceptual advances and recent empirical findings to identify promising avenues for research that illuminate the interplay between structure and agency It examines trends in family school and workplace as well as contexts that deserve heightened attention including the military the criminal justice system and natural and man made disaster The remaining three sections consider advances and suggest strategic opportunities in the study of health and development throughout the life course They explore methodological innovations including qualitative and three generational longitudinal research designs causal analysis growth curves and the study of place Finally they show ways to build bridges between life course research and public policy

Cradle to Grave: Life-Course Change in Modern Sweden Jan O. Jonsson, Colin Mills, 2021-04-14 The empirical study of individuals life course is one of the most promising areas of research within sociology today Increased availability of large scale longitudinal data and improved statistical methods have made it possible to address theoretically relevant questions about events such as entrance into the labour market job mobility divorce and death This book consists of studies capturing the life course from the cradle to the grave The research questions include long term consequences of childhood conditions family formation and school careers work and parental leave gender discrimination in job promotion divorce and occupational career persistence in poverty and the intriguing question of why the highly educated tend to survive everyone else The studies shed light on the relation between family and work on gender inequality social class differences welfare state redistribution and labour market processes They do this in a particular context namely Sweden in the post war period

that is during the decades that formed one of the most advanced welfare states in modern history One chapter provides a descriptive account of institutional and life course change in Sweden during that period Most authors use the Swedish level of living surveys a unique data set providing ample opportunity to study social processes in a longitudinal perspective The book will therefore be of relevance to those with interests in the Swedish welfare state as well as those with theoretical and research interests in the reproduction of inequality

Internal Migration as a Life-Course Trajectory Aude

Bernard, 2022-06-20 This book responds to growing calls to conceptualise and analyse internal migration as a trajectory that unfolds over the life course of individuals rather than a series of discrete events It combines macro and micro modes of analysis into a cohort framework to explore how individuals transition from one migration to the next The book presents new methodological developments in longitudinal analysis and applies them to internal migration in 27 European countries It demonstrates that the traditional dichotomy between migrants and non migrants conceals a wide range of migration behaviour and heterogeneity among repeat migrants It also reveals a continuity of migration behaviour being exposed to the challenges and benefits of migration early in life predisposes individuals toward migration in adulthood By adopting a cohort approach to migration coupled with state of the art methods and novel concepts this book provides new insights into internal migration for graduate students academics and policymakers interested in understanding migration behaviour in Europe and beyond

History Data Using Stata Hans-Peter Blossfeld, Götz Rohwer, Gwendolin J. Blossfeld, 2025-07-28 This third edition of Causal Analysis with Event History Data Using Stata provides an updated introduction to event history modeling along with many instructive Stata examples Using the latest Stata software each of these practical examples develops a research question points to useful contextual background information gives a brief account of the underlying statistical concepts describes the organization of input data and the application of Stata statistical procedures and assists the reader in interpreting the content of the results obtained Emphasizing the strengths and limitations of continuous time event history analysis in different fields of social science applications this book demonstrates that event history models provide a useful approach to uncover causal relationships or to map a system of causal relationships In particular this book demonstrates how long term processes can be studied how different forms of duration dependencies can be estimated using nonparametric parametric and semiparametric models and how parallel and interdependent dynamic systems can be analyzed from a causal analytical point of view using the method of episode splitting The book also shows how changing contextual information at the micro meso and macro levels can be easily integrated into a dynamic analysis of longitudinal data Finally the book addresses the problem of unobserved heterogeneity of time constant and time dependent omitted variables and makes suggestions for dealing with these sometimes difficult methodological problems Causal Analysis with Event History Data Using Stata is an invaluable resource for both novice and experienced researchers from a variety of fields e g sociology economics political

science education psychology demography epidemiology management research and organizational studies as well as medicine and clinical applications who need an introductory textbook on continuous time event history analysis and who are looking for a practical handbook for their longitudinal research *The Routledge Handbook of Contemporary Inequalities and the Life Course* Magda Nico, Gary Pollock, 2021-12-30 Drawing upon perspectives from across the globe and employing an interdisciplinary life course approach this handbook explores the production and reproduction of different types of inequality across a variety of social contexts Inequalities are not static easily measurable and essentially quantifiable circumstances of life They are processes which impact on individuals throughout the life course interacting with each other accumulating attenuating reproducing or distorting themselves along the way The chapters in this handbook examine various types of inequality such as economic gender racial and ethnic inequalities and analyse how these inequalities manifest themselves within different aspects of society including health education and the family at multiple levels and dimensions The handbook also tackles the global COVID 19 pandemic and its striking impact on the production and intensification of inequalities The interdisciplinary life course approach utilised in this handbook combines quantitative and qualitative methods to bridge the gap between theory and practice and offer strategies and principles for identifying and tackling issues of inequality This book will be indispensable for students and researchers as well as activists and policy makers interested in understanding and eradicating the processes of production reproduction and perpetuation of inequalities *Life Course, Happiness and Well-being in Japan* Barbara Holthus, Wolfram Manzenreiter, 2017-04-21 This book investigates the connections between socio structural aspects individual agency and happiness in contemporary Japan from a life course perspective The contributors examine empirical data on the processes which impact how happiness and well being are envisioned crafted and debated in Japan across the life cycle The book discusses the shifting notions of happiness during people s lives from birth to death analyzing the age group specific experiences while taking into consideration people s life trajectories and historical changes It points also out recent developments in regards to demographic change late marriage and the changing labor market *Event History Analysis* Hans-Peter Blossfeld, Alfred Hamerle, Karl Ulrich Mayer, 2014-02-24 Serving as both a student textbook and a professional reference handbook this volume explores the statistical methods of examining time intervals between successive state transitions or events Examples include survival rates of patients in medical studies unemployment periods in economic studies or the period of time it takes a criminal to break the law after his release in a criminological study The authors illustrate the entire research path required in the application of event history analysis from the initial problems of recording event oriented data to the specific questions of data organization to the concrete application of available program packages and the interpretation of the obtained results Event History Analysis makes didactically accessible the inclusion of covariates in semi parametric and parametric regression models based upon concrete examples presents the unabbreviated close relationship underlying statistical theory details

parameter free methods of analysis of event history data and the possibilities of their graphical presentation discusses specific problems of multi state and multi episode models introduces time varying covariates and the question of unobserved population heterogeneity demonstrates through examples how to implement hypotheses tests and how to choose the right model

Family and the Female Life Course George Alter, 1988 The tension between women's workplace opportunity and family obligation is not exclusively a phenomenon of the 1980s as George Alter makes abundantly clear in this study His close investigation of women's lives in a nineteenth century European industrial city advances our knowledge in several areas of social history historical demography and life course studies It is the first monograph to apply event history analysis to the study of family history In doing so it moves beyond the static categories of traditional household studies to a dynamic view of the influence of the family on the life course decisions of individuals In contrast to most previous historical studies of the family this work focuses on the dynamic aspects of life course transitions employment marriage household formation childbearing rather than the structure of households In doing so attention is shifted from the household as a decision making unit to the role of family obligations and resources in the decisions of individuals Thus the family is viewed from the inside out through its effects on individual actors Alter's work adds new insights to our understanding of the impact of industrialization on family structure and functioning about women's work and labor force attachment and about the ways in which a life course perspective can help to resolve controversies in the approach to family and household dynamics His rich interpretations not only help to reconstruct the past but place some current social issues into historical perspective illegitimacy nuclear family patterns and women's dual family work roles among others

Event History Analysis With Stata Hans-Peter Blossfeld, Götz Rohwer, 2019-04-12 Nowadays event history analysis can draw on a well established set of statistical tools for the description and causal analysis of event history data The second edition of Event History Analysis with Stata provides an updated introduction to event history modeling along with many instructive Stata examples Using the latest Stata software each of these practical examples develops a research question refers to useful substantive background information gives a short exposition of the underlying statistical concepts describes the organization of the input data and the application of the statistical Stata procedures and assists the reader in performing a substantive interpretation of the obtained results Emphasising the strengths and limitations of event history model techniques in each field of application this book demonstrates that event history models provide a useful approach with which to uncover causal relationships or to map out a system of causal relations It demonstrates how long term processes can be studied and how changing context information on the micro meso and macro levels can be integrated easily into a dynamic analysis of longitudinal data Event History Analysis with Stata is an invaluable resource for both novice students and researchers who need an introductory textbook and experienced researchers from sociology economics political science pedagogy psychology or demography who are looking for a practical handbook for their research

Methods of Life Course Research Janet Z. Giele, Glen H.

Elder,1998-03-10 What are the most effective methods for doing life course research In this volume the field s founders and leaders answer this question giving readers tips on the art and method of the appropriate research design the collection of life history data and the search for meaningful patterns to be found in the results **Social Dynamics of the Life Course**

Walter R. Heinz,Victor W. Marshall, In the last two decades research on the life course has successfully combined and integrated different and rather isolated fields of social concerns such as the labor market family solidarity education employment retirement and social policy It has also developed a special focus on crucial problems of sociological research which includes the understanding of micromacro phenomena the dynamics of social change and international comparisons Contributors to this volume take an international comparative approach in applying the life course theoretical framework to issues of work and career Life course research focuses on the relationship between institutions and individuals across the life span and illuminates the impact of modernization on the shaping of biographies Industrial service societies are characterized by historically new contingencies of living arrangements and biographies These contingencies differ according to the extent to which life course patterns are regulated by social institutions In the continental European context institutional frameworks continue to define the timing and sequencing of transitions across the life course In less regulated market societies like the United States and Great Britain biographies and living arrangements are shaped more by the interaction of markets social networks and individual decisions In active welfare states institutional resources and rules continue to mediate the effects of social change on the life course What the editors and contributors to this fine compendium anticipate is a change on the cultural level toward more equality This trend supports young people and women in particular in their expectations concerning an egalitarian relationship This expectation is not taken for granted from the point of view of the male partner but has to be negotiated in decisionmaking processes as an issue that concerns the couple as a unit Thus the way in which people interact is profoundly impacted by the values and goals of equity demands Walter R Heinz is professor of sociology and social psychology and director Graduate School of Social Sciences University of Bremen Victor W Marshall is professor of sociology and director of the Institute on Aging University of North Carolina at Chapel Hill Carolina Alcohol, Age, Generation and the Life Course

Thomas Thurnell-Read,Laura Fenton,2022-08-08 This volume explores generational differences in alcohol consumption practices and examines the changing role of alcohol across the life course It considers generational patterns in where how and why people buy and consume alcohol and how these may interact with identity and belonging and considers how drinking alcohol in adolescence adulthood middle age or later life takes on different functions meanings and tensions Alcohol is shown to play an important role in biographical transitions such as in the coming of age rituals that mark the passage from adolescences to adulthood whilst drinking alcohol in adulthood and in later life takes on new meanings pleasures and risks in light of shifting roles and responsibilities relating to work leisure and the family The empirically informed contributions draw on a range of diverse disciplinary backgrounds and a range of cultural contexts

provides a nuanced examination of the role of alcohol at different life course stages and explores both continuity and change between generations **Trames**, 2003 **Handbook of Life Course Occupational Health** Morten Wahrendorf, Tarani Chandola, Alexis Descatha, 2023-08-18 This handbook provides a comprehensive overview of recent developments in research on the relationship between occupational trajectories over the life course and health. It uncovers the impact of far-reaching changes of work and employment as evidenced by increased flexibility, discontinuity, and technological innovation, and offers insights into recent theoretical and methodological developments addressing this challenge. In its main parts, it presents the best evidence to readers about the following topics: early life influences on un healthy work, chronic exposure to occupational risks, nonstandard employment and poor health, work continuation with chronic disease, occupational determinants of healthy aging. In its final part, it discusses policy implications of current knowledge and points to the need of developing new solutions in research and practice, not least in times of climate crisis and the new pandemic. The important handbook has been prepared by a distinguished editorial team with chapters written by prominent international experts. Despite its continuous reference to scientific knowledge, it addresses its content to a broader, non-specialized readership.

The Social History of the American Family Marilyn J. Coleman, Lawrence H. Ganong, 2014-09-02 The American family has come a long way from the days of the idealized family portrayed in iconic television shows of the 1950s and 1960s. The four volumes of *The Social History of the American Family* explore the vital role of the family as the fundamental social unit across the span of American history. Experiences of family life shape so much of an individual's development and identity, yet the patterns of family structure, family life, and family transition vary across time, space, and socioeconomic contexts. Both the definition of who or what counts as family and representations of the ideal family have changed over time. Available in both digital and print formats, this carefully balanced academic work chronicles the social, cultural, economic, and political aspects of American families from the colonial period to the present. Key themes include families and culture, including mass media, families and religion, families and the economy, families and social issues, families and social stratification, and conflict. Family structures including marriage and divorce, gender roles, parenting and children, and mixed and non-modal family forms and family law and policy. Features: Approximately 600 articles, richly illustrated with historical photographs and color photos in the digital edition, provide historical context for students. A collection of primary source documents demonstrates themes across time. The signed articles, with cross-references and Further Readings, are accompanied by a Reader's Guide, Chronology of American Families, Resource Guide, Glossary, and thorough index. *The Social History of the American Family* is an ideal reference for students and researchers who want to explore political and social debates about the importance of the family and its evolving constructions.

Key Themes: Families and Culture, Families and Experts, Families and Religion, Families and Social Change, Families and Social Issues, Problems/Crises, Families and Social Media, Families and Social Stratification, Social Class, Families and Technology, Families and the Economy, Families in America, Families in Mass Media, Families, Family Life, Social Identities.

Family Advocates and Organizations Family Law and Family Policy Family Theories History of American Families Doing Transitions in the Life Course Barbara Stauber, Andreas Walther, Richard A. Settersten, Jr., 2022-09-14 This open access book provides a unique research perspective on life course transitions Here transitions are understood as social processes and practices Leveraging the recent practice turn in the social sciences the contributors analyze how life course transitions are done This book introduces the concept of doing transitions and its implications for theories and methods It presents fresh empirical research on doing transitions in different life phases e g childhood young adulthood later life and life domains e g education work family health migration It also emphasizes themes related to institutions and organizations time and normativity materialities such as bodies spaces and artifacts and the reproduction of social inequalities in education and welfare In coupling this new perspective with empirical illustrations this book is an indispensable resource for scholars from demography sociology psychology social work and other scientific fields as well as for students counselors and practitioners and policymakers Residential Relocations and their Consequences Philipp M. Lersch, 2013-11-12 Philipp M Lersch shows that residential relocations may change individuals lives for the better but also for the worse depending on their resources restrictions and contextual conditions A comparative analysis of English and German panel data reveals that relocations improve the quality of dwellings on average in both countries but improvements strongly depend on life course stages and economic resources of individuals Only few individuals improve their neighbourhoods when relocating Conditions in the housing market are important determinants of these changes Gender inequality persists in the occupational outcomes of relocations in England and West Germany Due to institutional conditions residential trajectories in England exhibit more variation and a higher risk of changes for the worse than in Germany These innovative findings will inspire further research on the consequences of residential relocations **Handbook of Aging and the Social Sciences** Kenneth Ferraro, Deborah Carr, 2021-01-09 Handbook of Aging and the Social Sciences Ninth Edition provides a comprehensive synthesis of the latest research findings in the science of aging The complexities of population dynamics cohort succession and policy changes modify the world and its inhabitants in ways that must be vigilantly monitored Completely revised this edition not only includes the foundational classic themes of aging research but also a rich array of emerging topics and perspectives that advance the field in exciting ways New topics include families immigration social factors and cognition caregiving neighborhoods and built environments natural disasters religion and health and sexual behavior among others This book will serve as a useful resource and an inspiration to those searching for ways to contribute to the aging enterprise Includes aging topics at both the micro and macro level Addresses the intersection of individual and aggregate factors Covers a spectrum of disciplines including demography economics epidemiology gerontology political science psychology social work sociology and statistics Brings together the work of almost fifty leading scholars to provide a deeper understanding of aging
