European Integration In Social And Historical Perspective 1850 To The Present:

European Integration in Social and Historical Perspective Jytte Klausen, Louise A. Tilly, 1997-11-20 Exploring the historical roots of integration they trace contemporary integration efforts back to nineteenth century social action in response to capitalist development As today it was a time when internationalism both that of workers and capitalists sustained international cooperation and attempted to define a social dimension to economic development and to set universal standards for welfare The reemergence of an integrated Europe as an alternative to the system of states produced by the settlements of 1918 and 1945 has provided a new opening for internationalism European Integration, Processes of Change and the National Experience S. Börner, M. Eigmüller, 2015-06-02 In order to better understand processes of European integration this book offers a new perspective that compares past experiences of change to current transitional moments at the European level It addresses key questions about European society EU integration and social change to reveal the social construction of emergent polities and societies Europe's Welfare Traditions Since 1500, Volume 2 Thomas McStay Adams, 2023-01-26 Tracing the interwoven traditions of modern welfare states in Europe over five centuries Thomas McStay Adams explores social welfare from Portugal France and Italy to Britain Belgium and Germany He shows that the provision of assistance to those in need has faced recognizably similar challenges from the 16th century through to the present how to allocate aid equitably and with dignity how to give support without undermining autonomy and motivation and how to balance private and public spheres of action and responsibility Across two authoritative volumes Adams reveals how social welfare administrators critics and improvers have engaged in a constant exchange of models and experience locally and across Europe The narrative begins with the founding of the Casa da Misericórdia of Lisbon in 1498 a model replicated throughout Portugal and its empire and ends with the relaunch of a social agenda for the European Union at the meeting of the Council of Europe in Lisbon in 2000 Volume 1 which focuses on the period from 1500 to 1700 discusses the concepts of welfare and tradition It looks at how 16th century humanists joined with merchants and lawyers to renew traditional charity in distinctly modern forms and how the discipline of religious reform affected the exercise of political authority and the promotion of economic productivity Volume 2 examines 18th century bienfaisance which secularized a Christian humanist notion of beneficence producing new and sharply contested assertions of social citizenship It goes on to consider how national struggles to establish comprehensive welfare states since the second half of the 19th century built on the power of the vote as politicians pushed by activists and advised by experts appealed to a growing class of industrial workers Lastly it looks at how 20th century welfare states addressed aspirations for social citizenship while the institutional framework for European economic cooperation came to fruition **European Integration** Chris J. Bickerton, 2012-12-13 European integration confuses citizens and scholars alike It appears to transfer power away from national capitals towards Brussels yet a close study of the EU reveals the absence of any real leap towards supranationalism The EU is dominated by cooperation

between national representatives and national officials yet it continually appears to us as something external and separate from national political life This book takes on these paradoxes by arguing that European integration should no longer be studied as the transcendence of states or as merely an expression of national interests Rather we should approach it as a process of state transformation This transformation is from nation state to member state The book explores in detail the concept of member state arguing that it provides us with the best tool for understanding the European integration process Member states differ from traditional nation states They are not founded on the idea of popular sovereignty or the nation They rest upon the idea that the governance of domestic societies requires external frameworks of rule that can bind the hands of national politicians National authority is thus exercised through external rules and norms Member statehood differs from earlier forms of statehood because it rests upon a presumption of conflict between state and society rather than an identity of interests between ruler and ruled The book outlines in empirical detail these mysteries and paradoxes of European integration It then outlines in detail the theory and history of member statehood It applies the concept of member state to the study of two EU policy areas macro economic governance and foreign and security policy British Business in the Formative Years of European Integration, 1945-1973 Neil Rollings, 2007-12-10 This book questions conventional accounts of the history of European integration and British business Integration accounts normally focus on the nation state while Neil Rollings focuses on business and its role in the development of European integration which business historians have previously overlooked Business provided a key link between economic integration political integration and the process of Europeanization British businessmen perceived early on that European integration meant much more than the removal of tariffs and access to new markets Indeed British entry into the European community would alter the whole landscape of the European working environment Consideration of European integration is revealed as a complex relative and dynamic issue covering many issues such as competition policy taxation and company law Based on extensive archival research this book uses the case of business to emphasize the need to blend national histories with the history of European integration

Jacques Delors Helen Drake, 2002-09-11 Drawing on exclusive interviews with Jacques Delors himself this comprehensive accessibly written study of his life and Commission presidency is an invaluable resource for all those interested in European and French Politics Debunking populist images and myths about him this book presents a balanced examination of a widely misinterpreted political figure This book also raises important issues such as the role of individual leaders in contemporary politics the legitimacy of the European Union as a political system **Cosmopolitan Europe** Ulrich Beck, Edgar Grande, 2014-11-05 Europe is Europe's last remaining realistic political utopia But Europe remains to be understood and conceptualized This historically unique form of international community cannot be explained in terms of the traditional concepts of politics and the state which remain trapped in the straightjacket of methodological nationalism Thus if we are to understand cosmopolitan Europe we must radically rethink the conventional categories of social and political

analysis Just as the Peace of Westphalia brought the religious civil wars of the seventeenth century to an end through the separation of church and state so too the separation of state and nation represents the appropriate response to the horrors of the twentieth century And just as the secular state makes the exercise of different religions possible so too cosmopolitan Europe must guarantee the coexistence of different ethnic religious and political forms of life across national borders based on the principle of cosmopolitan tolerance The task the authors have set themselves in this book is nothing less than to rethink Europe as an idea and a reality It represents an attempt to understand the process of Europeanization in light of the theory of reflexive modernization and thereby to redefine it at both the theoretical and the political level This book completes Ulrich Beck's trilogy on cosmopolitan realism the volumes of which complement each other and can be read independently It is essential reading for anyone interested in the key social and political developments of our time

European Integration Beyond Brussels Matthew Broad, Suvi Kansikas, 2020-08-14 Europe is a continent whose history has in one form or another long been dominated by integration And yet the European integration process is often treated as synonymous with the evolution of just one particular and until recently geographically quite limited Western centred organisation the European Union EU This trend obscures the multitude of ways European states have acted collectively on both sides of the Iron Curtain and continue to do so throughout the continent today With contributors drawn from history and political science this book explores some of these diverse integration efforts beyond Brussels We shine a light on international organisations trade frameworks and various political social scientific and cultural forms of unity in both Eastern and Western Europe In so doing the book seeks to redefine the history of the European integration process not only as a less purely EU centric phenomenon but as a less strictly Western European one too

Single Markets Michelle P. Egan, 2015 This ambitious volume provides a trenchant and timely analysis of the creation of a single market in both the EU and the US Comparing the experience of the US during the nineteenth century and the single market of the EU in the twentieth century *Single Markets* demonstrates how the political economy of single market formation has followed remarkably similar trajectories Both cases show evidence of interplay between different levels of government in determining distributive outcomes evolution of a legal framework for the market and development of new regulatory strategies to deal with changing economic realities The book illustrates the process of market consolidation through a detailed comparison of the so called four freedoms the removal of border controls and the largely unrestricted transfer of goods services and capital across different jurisdictions In both cases establishing one market one currency and a more unified banking and financial system transformed largely autonomous or sovereign constituent units into a more unified economic entity *Single Markets* also sheds light on critically important questions for both comparativists and international relations scholars regarding the nature of territorial governance and the construction of state interests The book's interdisciplinary approach to focusing on crucial political and economic developments on both sides of the Atlantic will be of interest to scholars in political science public policy law and history

Italy's Many

Diasporas Donna R. Gabaccia, 2013-10-18 Italy's residents are a migratory people. Since 1800 well over 27 million left home but over half also returned home again. As cosmopolitans, exiles, and workers of the world, they transformed their homeland and many of the countries where they worked or settled abroad. But did they form a diaspora? Migrants maintained firm ties to native villages, cities, and families. Few felt much loyalty to a larger nation of Italians. Rather than form a nation unbound, the transnational lives of Italy's migrants kept alive international, regional, and local cultures that challenged the hegemony of national states around the world. This ambitious and theoretically innovative overview examines the social, cultural, and economic integration of Italian migrants. It explores their complex yet distinctive identity and their relationship with their homeland, taking a comprehensive approach.

Governance in Modern Society Oscar van Heffen, Walter J.M. Kickert, Jacques J.A. Thomassen, 2013-03-09 This book is the immediate result of the co-operation of a great number of scholars in the Netherlands Institute of Government (NIG). NIG is an inter-university research school. As such, it has a double task. In addition to offering a Ph.D. program to students in Public Administration, it also is a research institute in which a great number of scholars from seven Dutch universities participate and work on a common research program. The chapters in this book are all products of the research program that started in 1995. This program had the ambition to explore the frontiers of the discipline in two respects. First, by studying a number of recent developments in society and their consequences for the functioning of government. These consequences can be summarised as the development of a system of multi-level and multi-actor governance. Second, by contributing to the knowledge of institutions both by studying what factors are most important in the formation and change of institutions and by studying the effects of institutions on the behaviour of actors in different political and administrative settings. Most contributions to this volume either have their origin in conferences organized by the NIG or were published as an NIG working paper. We are grateful to Marcia Clifford and Connie Hoekstra who prepared the final version of the manuscript, to Ian Priestnall who took care of the language editing, and to an anonymous reviewer whose comments were gratefully used.

Odd Couple Michael Huberman, 2012-05-29 It has become commonplace to think that globalization has produced a race to the bottom in terms of labor standards and quality of life: the cheaper the labor and the lower the benefits afforded workers, the more competitively a country can participate on the global stage. But in this book, the distinguished economic historian Michael Huberman demonstrates that globalization has, in fact, been very good for workers' quality of life and that improved labor conditions have promoted globalization.

Family Reunification in the EU Chiara Berneri, 2017-05-18 This monograph examines the intricate legislative and jurisprudential scenario of family reunification between EU citizens and third-country nationals that has developed in the European Union over the last 50 years. Focusing on family residence rights granted to third-country national family members of EU citizens, it examines one of the largest sectors affected with over two hundred thousand permits granted each year. In addition to its practical significance, the field has been the object of a lively debate which has yet to be systematically analysed. Using a historical

approach it illustrates the development of the legislation and of the case law on the issue considering the factors that influenced the choices of the EU Legislator and of the Court over the years It also suggests what future path the Court could take when deciding on cases in the field in order to reinforce the protection of families This important research ensures full understanding of the EU legislation and of the Court's jurisprudence and allows for its correct application by Member States

The Human Right to Citizenship Rhoda E. Howard-Hassmann, Margaret Walton-Roberts, 2015-05-28 In principle no human individual should be rendered stateless the Universal Declaration of Human Rights stipulates that the right to have or change citizenship cannot be denied In practice the legal claim of citizenship is a slippery concept that can be manipulated to serve state interests On a spectrum from those who enjoy the legal and social benefits of citizenship to those whose right to nationality is outright refused people with many kinds of status live in various degrees of precariousness within states that cannot or will not protect them These include documented and undocumented migrants as well as conventional refugees and asylum seekers living in various degrees of uncertainty Vulnerable populations such as ethnic minorities and women and children may find that de jure citizenship rights are undermined by de facto restrictions on their access mobility or security The Human Right to Citizenship provides an accessible overview of citizenship regimes around the globe focusing on empirical cases of denied or weakened legal rights Exploring the legal and social implications of specific national contexts contributors examine the status of labor migrants in the United States and Canada the changing definition of citizenship in Nigeria Germany India and Brazil and the rights of ethnic groups including Palestinians Rohingya refugees in Bangladesh Bangladeshi migrants to India and Roma in Europe Other chapters consider children's rights to citizenship multiple citizenships and unwanted citizenships With a broad geographical scope this volume provides a wide ranging theoretical and legal framework to understand the particular ambiguities paradoxes and evolutions of citizenship regimes in the twenty first century Contributors Michal Baer Kristy A Belton Jacqueline Bhabha Thomas Faist Jenna Hennebry Nancy Hiemstra Rhoda E Howard Hassmann Audrey Macklin Margareta Matache Janet McLaughlin Carolina Moulin Alison Mountz Helen O Nions Chidi Anselm Odinkalu Sujata Ramachandran Kim Rygiel Nasir Uddin Margaret Walton Roberts David S Weissbrodt

Lobbying the European Union David Coen, Jeremy Richardson, 2009-06-04 It is universally accepted that there has been a huge growth in EU lobbying over the past few decades There is now a dense EU interest group system This entirely new volume inspired by Mazey Richardson's 1993 book *Lobbying in the European Community* seeks to understand the role of interest groups in the policy process from agenda setting to implementation Specifically the book is interested in observing how interest groups organise to influence the EU institutions and how they select different coalitions along the policy process and in different policy domains In looking at 20 years of change the book captures processes of institutional and actor learning professionalisation of lobbying and the possible emergence of a distinct EU public policy style More specifically from the actors perspective the editors are interested in assessing how the rise of direct lobbying and the emergence of fluid issue

based coalitions has changed the logic of collective action and what is the potential impact of venue shopping on reputation and influence From an institutional perspective the contributors explore resource and legitimacy demands and the practical impact of consultation processes on the emergence of a distinct EU lobbying relationship It will be essential reading for academics and practitioners alike

Political Communication in Europe Francisco Pérez, 2013-10-24 The disconnection between the institutions of the EU

and the people of Europe has often been attributed to the existence of a communication gap resulting from the failure of national medias and politicians to convey the importance of the EU This book challenges that idea instead showing that the fault lies with the idea and institutions of the EU
