Trade Unions and European Integration Johannes Kiess, Martin Seeliger, 2019-05-23 Trade Unions and European Integration brings together pessimists and optimists on trade unionism under the contemporary pressures of European integration The Great Recession has brought new attention to structural problems of the European integration process specifically monetary integration holding the potential of disabling any trans

national co ordination Other authors argue that the current crisis also poses the chance for mobilization and new impulses for European trade unionism This is discussed in the volume alongside a variety of topics including bargaining coordination co determination European governance regimes and European wide mobilization While the importance of the question of how trade unionism and wage policy can will and should develop under the conditions of European integration seems widely shared the polarization of the debate itself deserves our attention to learn about the opposing arguments and points of view and to enhance academic discussion as well as consultancy to policy makers This volume addresses this debate by bringing together the most distinguished voices and searching for common ground as well as new perspectives on European trade unionism and collective bargaining The chapters of the volume organised topically are each accompanied by a comment from a distinguished scholar highlighting the divisions of the debate With this innovative approach this book advances the dialogue between what have become openly opposed camps of optimists and pessimists on the future of European integration trade unionism and its future chances Trade Unions and European Integration will appeal to students and researchers interested in fields such as European Studies Industrial Relations Political Economics Social Movements and Sociology of Work

Regional Integration, Trade and Industry in Africa Helmut Asche,2021-06-14 This book examines the past present and prospects of regional economic integration in Africa The empirical analysis ranges from unions formed during the years following independence to the proposed African Continental Free Trade Area AfCFTA which aims to remove trade barriers between all 55 African states In addition the book explores to what extent Africa s Regional Economic Communities RECs have advanced in accordance with a linear integration model of goods labor and capital markets The book subsequently evaluates the suitability of the European model of deep integration with costly institutions for the conditions specific to Africa considering for example the role of informal and non recorded trade Stylized cases of regional division of labour with increasing returns and imperfect competition are introduced to support the economic integration logic Past and current economic policies in Africa are scrutinized to answer the question how can African regions best foster new manufacturing industries and value chains across the continent In conclusion the book outlines content and processes of Common Industrial Policy in the African regions The book also addresses the controversial issue of international trade agreements between developing countries and the European Union or the USA and investigates whether these agreements impede or promote economic development in Africa The book includes a detailed roadmap describing how to improve key clauses of agreements for economic partnership in the interest of African countries In closing it outlines a new vision of joint sustainable development for Africa and Europe

The European Union's Trade Policies and their Economic Effects OECD,2000-11-20 This book retraces the Communities external liberalisation efforts and discusses where relevant the repercussions of internal liberalisation on foreign competitors

British Business in the Formative Years of European Integration, 1945-1973 Neil Rollings,2007-12-10 This book questions conventional accounts of the history of European integration and British business

Integration accounts normally focus on the nation state while Neil Rollings focuses on business and its role in the development of European integration which business historians have previously overlooked Business provided a key link between economic integration political integration and the process of Europeanization British businessmen perceived early on that European integration meant much more than the removal of tariffs and access to new markets Indeed British entry into the European community would alter the whole landscape of the European working environment Consideration of European integration is revealed as a complex relative and dynamic issue covering many issues such as competition policy taxation and company law Based on extensive archival research this book uses the case of business to emphasize the need to blend national histories with the history of European integration The Battle of the Single European Market Gilles Grin,2003 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company **The Southern African Development Community (SADC) and the European Union (EU)** Johannes Muntshick,2017-10-09 This book explores regionalism in the Southern African Development Community SADC and highlights the influence of the European Union EU as an extra regional actor on the organization and integration process The analysis is guided by theory and explains the emergence institutional design and performance of SADC s major integration projects in the issue areas of the economy security and infrastructure It provides in this way a profound assessment of the organization as a whole The study shows that South Africa plays a regional key role as driver for integration while external influence of the EU is ambivalent in character because it unfolds a supportive or obstructive impact The author argues that the EU gains influence over regional integration processes in the SADC on the basis of patterns of asymmetric interdependence and becomes a game changer insofar as it facilitates or impedes solutions to regional cooperation problems **New Zealand, Britain, and European Integration Since 1960** Hamish McDougall,2023-12-26 This book explores how New Zealand a small country almost as far from Western Europe as it is possible to be assumed political importance in Britain s accession to the European Community vastly out of proportion to its size proximity and strategic position At several points in accession negotiations the issue of New Zealand s continued trade with Britain threatened to derail UK Government attempts to join the Community This issue also interacted with the broader context of the Cold War economic shocks and decolonisation materially affecting the terms of entry into the European Community and altering Britain s relations with its European partners and the British public s perceptions of British membership After entry New Zealand continued to resurface as a continued source of tension between Britain and an integrating Europe The role that New Zealand played sheds light on Britain s attempts to retain global influence after the demise of its formal empire Contributing to a growing body of research which challenges the traditional historical narratives of British decline and colonial independence in the second half of the twentieth century this book fills an important gap in the historiography of Britain following the 1973 enlargement of the European Communities *International Trade And Regional Economies* David J. Hayward,2019-04-11 This book considers the issue of regional exposure to external economic events

exploring the role of trade in the performance of American states It focuses on the case of trade with the European Community analyzing the potential impacts of its integration on trade with individual states

The European Union and Developing Countries Yves Bourdet,Joakim Gullstrand,Karin Olofsdotter,2007-01-01 The EU is the main trading partner of developing countries and the main provider of development aid The contributors to this book evaluate critical aspects of EU trade and aid policies in order to ascertain whether and to what extent they help promote growth and accelerate the development of the Third World

The European Union's Trade Defence Modernisation Package Patricia Trapp,2022-01-03 Anti dumping and anti subsidy measures are the most important elements of the European Union s trade defence instruments Since the beginning of the European integration process they have been used to combat trade practices which are considered unfair and their distortive effects on competition in the internal market However while the imposition of trade defence measures aims to level the playing field between EU producers and their foreign competitors it also produces negative effects on competition itself Based on the role attributed to competition and trade defence policy respectively throughout the European integration process this book argues that the trading bloc s trade defence instruments should not be designed or applied with the objective of granting maximum protection to EU producers but that their use should be limited to what is necessary to ensure fairness in competition between EU producers and exporting producers However an analysis of the changes made to the European Union s Basic Anti Dumping Regulation and the Basic Anti Subsidy Regulation by the Trade Defence Modernisation Package reveals that several aspects of the European Union s modernised trade defence instruments do not meet this requirement Rather than being limited to offsetting the unfair competitive advantages of producers practicing dumping or benefiting from subsidies the reformed provisions go beyond this distorting competition in favour of the EU industry instead Furthermore the book critically assesses the reformed rules relating to the integration of social and environmental aspects in the imposition of anti dumping or anti subsidy measures as well as the modernised basic regulations compatibility with WTO law

Constructing European Union Trade Policy Gabriel Siles-Brügge,2014-02-18 With the stagnation of the Doha Round of multilateral talks trade liberalisation is increasingly undertaken through free trade agreements Gabriel Siles Br gge examines the EU s decision following the 2006 Global Europe strategy to negotiate such agreements with emerging economies Eschewing the purely materialist explanations prominent in the field he develops a novel constructivist argument to highlight the role of language and ideas in shaping EU trade policy Drawing on extensive interviews and documentary analysis Siles Br gge shows how EU trade policymakers have privileged the interests of exporters to the detriment of import competing groups creating an ideational imperative for market opening Even during the on going economic crisis the overriding mantra has been that the EU s future well being depends on its ability to compete in global markets The increasingly neoliberal orientation of EU trade policy has also had important consequences for its economic diplomacy with the developing economies of the African Caribbean and

Pacific group of states **The Economics of European Integration** Willem Molle, 2006 Through four previous editions The Economics of European Integration has been the preferred textbook for students of European Economics European Business and European Studies This Fifth Edition has been carefully revised taking into account the most up to date course requirements new statistical information and recent policy developments **The New Industrial Policy of the European Union** Adam A. Ambroziak, 2016-10-08 The main objective of this book has been to carry out research into the definition of industrial policy and its goals to evaluate previously introduced policies and instruments and to identify the future challenges for and features of a modern EU industrial policy A modern industrial policy is seen as a non traditional policy towards the industrial sector based not necessarily on only the elimination of market failures within the sectoral and or horizontal approaches but rather on the expanding the scope of industrial economic activities within the framework of both the pre and post fabrication stages The book targets three market segments academics policy and decision makers at the EU national and regional level as well as business practitioners It includes a wide ranging analysis of different spheres of industrial policies conducted within the European Union making it of interest to an international audience Each chapter also offers detailed and valuable comments as well as conclusions that can be generally applied ensuring the book s universality The book presents the results of a research project conducted in the Collegium of World Economy at the Warsaw School of Economics

Trade Specialization in the Enlarged European Union Dora Borbély, 2006-09-21 This study analyzes trade specialization patterns in the enlarged European Union with a special focus on the new EU member states and the cohesion countries Empirical findings on revealed comparative advantage and a broader picture of competitiveness on the single market are presented from a sectoral trade point of view Further the author analyzes whether trade specialization patterns converge within the enlarged EU European Union Free Trade Agreements Handbook Volume 1 EU - Republic of Korea Free Trade Agreement IBP, Inc., Industrial Organization in the European Union Stephen Davies, Bruce Lyons, 1996 This book fills an important gap in our knowledge of the organization of EU manufacturing industry At the empirical level it draws on a newly constructed micro level database the European market share matrix to present the first ever comprehensive picture of the concentration integration multinationality and diversification of EU industry and firms However its purpose is not primarily descriptive At the theoretical level it develops a new way of integrating the insights of international trade industrial organization international business and corporate strategy A central thesis is that by understanding the reasons for the industrial structure we observe much can be understood about the underlying competitive process that generated this structure in the context of current European integration In this RandD advertising and government intervention each play important and pervasive roles The insights from an econometric analysis of the various dimensions of industrial structure are applied to address policy relevant questions such as is the industrial organization of the member states integrated at the EU level Are diversification and multinationality random or do they follow an industrial logic Which industries and firms pose the

most serious potential problems for competition policy How do the largest EU firms achieve their size Do certain member states dominate the ownership or location of production **European Union-U.S. Trade Conflicts and Economic Relationship** Jeremy V. Lane, 2002 The United States and the European Union have a healthy and substantial trade relationship but as trade grows between the nations conflicts over subsidies industrial policy and social and economic pressures are inevitable Domestic or abroad these conflicts must be solved to ensure the best trade relations possible This book presents these trade problems and how they affect this mutually beneficial trade relationship
