among them this volume rediscovers a past largely forgotten but essential to understanding the genesis of competition law in Europe its role in Europe s construction its hybrid institutional traits and its often unique substance *Competition, Efficiency, and Welfare* Dennis C. Mueller, Alfred Haid, Jürgen Weigand, 2012-12-06 *Competition Efficiency and Welfare* contains a collection of papers in honor of Manfred Neumann This collection was prepared as a tribute to a teacher and scholar whose accomplishments have enriched various fields of economics The magnitude of his interests is reflected in the breadth of topics covered in this volume industrial economics competition policy and related topics However if one unifying principle runs through Manfred Neumann s work it is the belief in the power of competition Born on May 16 1933 Manfred Neumann studied economics at the University of Cologne He graduated in 1960 In 1969 Manfred Neumann was appointed Professor of Economics at N rnberg University He was Dean of the Faculty of Economics and Social Sciences of the University of Erlangen N rnberg President of the European Association for Research in Industrial Economics EARIE and Chairman of Industrial Organization Study Group of the Verein f r Sozialpolitik Most of his professional career has been spent at N rnberg where he has helped to make the Economic Institute one of the leading research centers in Industrial Organization He has also been involved in various advisory activities The volume contains 18 essays The first twelve are grouped into four categories Innovation and R D Part I Cartels Part II Mergers and Merger Policy Part III and Methodological Issues in Industrial Organization Part IV These papers fall within the bounds of industrial economics which has been Manfred Neumann s primary research interest throughout his career Part V includes two papers on theories of international trade which has been a recurring topic of interest for Manfred Neumann through the years The last three papers look at broader policy and macroeconomic issues Contributors to this volume include Karl Aiginger David B Audretsch Paul A Geroski Stephen Martin and Dennis Mueller **Vertical industrial policy in the EU: An Empirical analysis of the effectiveness of state aid , Competition Policy** Massimo Motta, 2004-01-12 This is the first book to provide a systematic treatment of the economics of antitrust or competition policy in a global context It draws on the literature of industrial organisation and on original analyses to deal with such important issues as cartels joint ventures mergers vertical contracts predatory pricing exclusionary practices and price discrimination and to formulate policy implications on these issues The interaction between theory and practice is one of the main features of the book which contains frequent references to competition policy cases and a few fully developed case studies The treatment is written to appeal to practitioners and students to lawyers and economists It is not only a textbook in economics for first year graduate or advanced undergraduate courses but also a book for all those who wish to understand competition issues in a clear and rigorous way Exercises and some solved problems are provided Article 81 EC and Public Policy Christopher Townley, 2009-09-22 This book discusses the role of public policy in Article 81 of the EC Treaty The Commission and recently the Court of First Instance have said that the sole objective of Article 81 EC is consumer welfare Many competition lawyers

and economists support this view Writing in a crisp plain style Townley demonstrates that public policy considerations are still relevant in that provision He also examines how and where they are currently considered and then suggests why how and where this might be changed The book explains how some of the most complex competition law cases can be understood and offers a framework for those fighting or deciding such cases in the future As such it will be of interest to European competition lawyers both academics and practitioners furnishing them with a framework for hard cases as well as students seeking a deeper understanding of how the European competition rules work and how they interact both with European Union and Member State public policy goals It will also help competition economists by revealing the mechanisms through which public policy considerations impact upon the consumer welfare test in European law *Industrial Policy in Europe, Japan and the USA* P. The EU Internal Market in Comparative Perspective Dominik Hanf, 2008 The European Union's internal market is the hard core of integration and by far its most precious asset However a number of deep seated factors have impeded the development of a systematic and wide ranging academic research programme dedicated to the internal market The purpose of this book is to begin to address this predicament with a tri disciplinary analysis of the internal market as scant opportunities for mutual understanding and learning across disciplines law economics and politics currently exist Internal market scholars from all three disciplines collaborated on this project in which each chapter was read and critiqued by a scholar from a different discipline The editors trust that this unique exercise reveals to many readers the enormous potential for in depth and continuous analysis of the internal market and all that it entails It also provides an accessible text for students and scholars from all three disciplines interested in the internal market The European Automobile Industry

William A. Maloney, Andrew McLaughlin, 2005-07-08 This book presents an analysis of some of the changes that have transformed the automobile industry in the last thirty years illustrating some of the most significant consequences of globalization Focusing on the response of Europe's policy makers it analyzes government industry relations at both national and transnational levels demonstrating how national policy instruments have been eroded by regional political and economic integration There has been a significant and irreversible shift in the locus of decision making power from nation states to the regional level in the automobile sector

Industry and the European Union Michael Darmer, Laurens Kuyper, 2000-01-01 This book is a most valuable contribution to the understanding of the complexity of European policies and their impact on

individual businesses and industry as a whole That focus makes this book unique All in all there are only a few books about the industrial policy of the European Union and none with such a focus Karel van Miert Universiteit Nyenrode The Netherlands Contrary to standard works covering community industrial policy this book is based on the experience of those involved in the actual formulation of policies It documents the evolution of this policy towards a horizontal approach combining various instruments that need to be made consistent with each other This book will be very valuable to scholars and policymakers alike Alexis Jacquemin European Commission and Universit Catholique de Louvain Belgium European policies increasingly affect the daily decisions of European firms Better understanding of the motivation and reasoning behind policies that affect industry is therefore essential to those interested in or affected by industrial policy Industry and the European Union explores different European policy areas focusing on aspects that are of particular importance for business

Competition Law in times of Economic Crisis : in Need of Adjustment ? Jacques Derenne,Massimo Merola,José Rivas,2013-12-02 Throughout this unprecedented crisis which is hitting all major economies in the EU the escalation of the Eurozone recession increasingly undermines public confidence in the ability of competitive markets to deliver positive outcomes A debate on the most appropriate way to enforce competition rules in light of the crisis is definitely useful A relaxed stance to competition during difficult periods may be tempting and indeed this has often been the approach used in the past However the enforcement of competition rules is no less important during times of crisis than during normal periods It has also been argued that when public resources are stretched to the limit and businesses are struggling to survive competition authorities should seek to focus their limited resources on those anticompetitive practices which are most detrimental to consumer welfare such as cartels Indeed if over enforcement is perhaps undesirable when the economy is functioning well it will inevitably become more problematic during an economic downturn In addition business managers may be increasingly tempted to resort to anticompetitive practices when faced with economic hardship This book will appeal to judges and lawyers in competition law European law business corporate law and insolvency law the study of European competition law European institutions national competition authorities and companies
