European Existentialism:

European Existentialism Nino Langiulli, 1971 European Existentialism is a rich collection of major texts and is made all the more significant by the range and depth of its contributions This book aims to give greater intelligibility to existentialism by providing samples from antecedents of and influences upon it Although existentialism is regarded as an example of twentieth century philosophizing the book presents nineteenth century thinkers such as Kierkegaard and Nietzsche as its forerunners Thinkers such as Dilthey Husserl and Scheler frequently associated with other trends in philosophy such as historicism and phenomenology are included because of their influence upon existentialism Informative biographies of each author represented are also included European Existentialism includes a broad range of philosophers working in the existentialist mode not only French and German but also Spanish Italian Jewish and Russian philosophers This volume is also distinctive in that it omits existentialists from the literary world While Dostoevsky is often included in other existentialist collections Langiulli represents Russian philosophy with a selection by Berdyaev In his new introduction Langiulli discusses how the themes of existentialism have led to contemporary aberrations He uses the language of political rights as an example whereas we once referred to freedom of speech we have transformed that phrase into a much wider category freedom of expression Langiulli also examines various trends that have derived from existentialism postmodernism deconstructionism and multiculturalism Langiulli's introduction and the contributions place existentialism as a genuine tradition in the history of philosophy a tradition which stresses the radical contingency and mortality of human existence European Existentialism is an invaluable collection for philosophers educators and all those interested in the existentialist tradition

European Existentialism Nino Langiulli, 2018-01-18 European Existentialism is a rich collection of major texts and is made all the more significant by the range and depth of its contributions This book aims to give greater intelligibility to existentialism by providing samples from antecedents of and influences upon it Although existentialism is regarded as an example of twentieth century philosophizing the book presents nineteenth century thinkers such as Kierkegaard and Nietzsche as its forerunners Thinkers such as Dilthey Husserl and Scheler frequently associated with other trends in philosophy such as historicism and phenomenology are included because of their influence upon existentialism Informative biographies of each author represented are also included European Existentialism includes a broad range of philosophers working in the existentialist mode not only French and German but also Spanish Italian Jewish and Russian philosophers This volume is also distinctive in that it omits existentialists from the literary world While Dostoevsky is often included in other existentialist collections Langiulli represents Russian philosophy with a selection by Berdyaev In his new introduction Langiulli discusses how the themes of existentialism have led to contemporary aberrations He uses the language of political rights as an example whereas we once referred to freedom of speech we have transformed that phrase into a much wider category freedom of expression Langiulli also examines various trends that have derived from existentialism postmodernism deconstructionism

and multiculturalism Langiulli s introduction and the contributions place existentialism as a genuine tradition in the history of philosophy European Existentialism is an invaluable collection for philosophers educators and all those interested in the existentialist tradition Decolonizing Existentialism and Phenomenology Jina Fast,2023-11-15 Decolonizing Existentialism and Phenomenology analyzes the history of decolonial existentialist and phenomenological theory in the work of figures such as Simone de Beauvoir Richard Wright Franz Fanon Lewis Gordon Audre Lorde Sylvia Wynter and Jamaica Kincaid in order to reimagine and rewrite the philosophical canon Phenomenology and existentialism study the structures of consciousness as experienced from the perspective of the subject yet their methods have been markedly tied to the subjective lived experiences and perspectives of White Europeans and Americans By centering the experiences of peoples of the African diaspora gender marginalized people and queer peoples Africana existentialist and phenomenologist philosophers in the twentieth and twenty first centuries have been able to generate new frameworks for understanding structures of meaning and consciousness within oppressive colonial orders thus challenging histories of existentialism and phenomenology that bracket social markers of identity and experiences of social identity This text represents a study of the philosophies of scholars that seek to decolonize hegemonic discourses and structures that impede the development of the selves and projects of colonized peoples Discovering Black Existentialism E. Anthony Muhammad,2023-12-14 In the post Trump era the Black lived experience continues to come under assault Emerging from the suffering imposed on Black bodies comes Black Existential Philosophy an umbrella term encompassing the multiple depictions of Black life under White subjugation Whether taking the form of first hand narratives of the lives of enslaved Blacks the racialized theological discourse of the Nation of Islam or the writings of W E B Du Bois and Frantz Fanon the works comprising Black Existentialism offer a look into both the world of the racialized Black Other as well as the never ending quest to recapture and reassert Black humanity In Discovering Black Existentialism E Anthony Muhammad documents his personal and academic journey to Black Existentialism In doing so the book illuminates the power of curriculum as a shaping agent in the life of an educator and researcher As a combination of autobiography theory and pedagogy this work gives the reader an intimate view into the developmental arc of a Black Existentialist scholar This book offers valuable insights to students searching for direction to researchers attempting to find meaning in their work and to educators striving to make their pedagogy relevant to the lives of their students *Cross-Cultural Existentialism* Leah Kalmanson,2020-09-17 Engaging in existential discourse beyond the European tradition this book turns to Asian philosophies to reassess vital questions of life s purpose death s imminence and our capacity for living meaningfully in conditions of uncertainty Inspired by the dilemmas of European existentialism this cross cultural study seeks concrete techniques for existential practice via the philosophies of East Asia The investigation begins with the provocative writings of twentieth century Korean Buddhist nun Kim Iryop who asserts that meditative concentration conducts a potent energy outward throughout the entire karmic network enabling the radical transformation of

our shared existential conditions Understanding her claim requires a look at East Asian sources more broadly Considering practices as diverse as Buddhist merit making ceremonies Confucian Ruist methods for self cultivation the ritual memorization and recitation of texts and Yijing divination the book concludes by advocating a speculative turn This speculative existentialism counters the suspicion toward metaphysics characteristic of twentieth century European existential thought and at the same time advances a program for action It is not a how to guide for living but rather a philosophical methodology that takes seriously the power of mental cultivation to transform the meaning of the life that we share

The A to Z of Existentialism Stephen Michelman, 2010 Existentialism is the philosophy of human existence which flourished first in Germany in the 1920s and 1930s and then in France in the decade following the end of World War II The operative meaning of existentialism here is thus broader than it was circa 1945 when the term first gained currency in France as a label for the philosophy of Jean Paul Sartre However it is considerably less broad than the view proposed by commentators in the 1950s and 1960s who in an attempt to overcome Sartre's hegemony discovered the seeds of existentialism far and wide in Shakespeare Saint Augustine and the Old Testament prophets In this dictionary existentialism is understood as a decidedly 20th century phenomenon though with roots in the 19th century Effort has been made to understand the philosophy of existentialism as all philosophies should be understood as part of an ongoing intellectual tradition an evolving history of problems concepts and arguments The A to Z of Existentialism explains the central claims of existentialist philosophy and the contexts in which it developed into one of the most influential intellectual trends of the 20th century This is done through a chronology an introductory essay a bibliography and more than 300 cross referenced dictionary entries offering clear accessible accounts of the life and thought of major existentialists like Jean Paul Sartre Martin Heidegger Martin Buber Karl Jaspers Gabriel Marcel Simone de Beauvoir Albert Camus and Maurice Merleau Ponty as well as thinkers influential to its development such as Wilhelm Dilthey Henri Bergson Edmund Husserl and Max Scheler This book affords readers an integrated critical and historically sensitive understanding of this important philosophical movement

tradition Cotkin examines how formal existentialism first arrived in America in the 1930s through discussion of Kierkegaard and the early vogue among New York intellectuals for the works of Sartre Beauvoir and Camus

Idealism and Existentialism Jon Stewart, 2010-06-02 The history of Continental philosophy is often conceived as being represented by two major schools German idealism and phenomenology existentialism These two schools are frequently juxtaposed so as to highlight their purported radical differences There is a commonly held view that an abrupt break occurred in the nineteenth century resulting in a disdainful rejection of idealism in all its forms This break is often located in the transition from Hegel to Kierkegaard The history of philosophy in the first half of the nineteenth century has thus been read as a grand confrontation between the overambitious rationalistic system of Hegel and the devastating criticisms of it by Kierkegaard s

philosophy of existence This work aims to undermine this popular view of the radical break between idealism and existentialism by means of a series of detailed studies in specific episodes of European thought As a whole this book represents an important attempt to demonstrate the long shadow cast by Kant and Hegel over the subsequent history of European philosophy
