Rulemaking by the European Commission Zamira Xhaferri, 2023-01-16 This book examines the law and practice of the delegation of rulemaking powers to the European Commission. It combines legal doctrine with empirical research methods to bridge the gap between law on the books and law in action to fully appreciate the meaning and the impact of the changes post Lisbon. The results of the empirical case study provide food for thought on how the current legal framework regime for delegated rulemaking by the European Commission could be improved. The findings seek to contribute to the academic and policy debates on this research topic that is likely to continue in forthcoming years. *Citizens in Europe* Giovanni Moro, 2011-12-04 In the Community building process citizens are the most invoked and feared but at the same time the least known subject. This lack of knowledge nourishes the citizens' detachment from the European Union and itself emerged in well known cases such as the French and Dutch referenda on the Constitutional Treaty or the public concern towards the EU policy on immigration. This gap is true especially for active citizenship organizations operating in the European policy making not only in Brussels but also and above all at national and local levels and this book is aimed at filling this knowledge gap. The book is divided into two parts. The first part of the book focuses on the way in which the literature on EU governance and citizenship and on participatory democracy deals with citizen activism in public policy making. The second part discusses a number of empirical research projects on civic activism in Europe. This book aims on the one hand to bridge the academic debate to more policy oriented debates in which active citizenship organizations and policy makers are involved and on the other hand to bridge theoretical discussion of the nature of the EU with the empirical literature based on the study of civic activism in Europe and at the national level. The distinctiveness of the book is that it tries to overcome both the methodological nationalism that affects the research and public debate on the EU, the normative attitude of most part of European studies in favor of an approach aimed at describing phenomena and the habit of dealing with civic associations in Europe by referring only to the Brussels Civil Society making it of interest to both policy makers as well as students and scholars in European Studies, Political Science, Sociology and International Relations. **The Contestation of Expertise in the European Union** Vigjilence Abazi, Johan Adriaansen, Thomas Christiansen, 2020-11-16 This book examines the position and role of expertise in European policy making and governance. At a time when the very notion of expertise and expert advice is increasingly losing authority, the book addresses these challenges by empirically examining specific administrative processes and institutional designs in the European Union. The first part of the volume theorizes expertise and its contestation by examining accounts of the legitimate institutional design of knowledge production processes and exploring the theoretical links of Europeanisation and expertise. The second part of the book delves into empirical institutionalist accounts of expertise and maps the role of experts in a variety of EU institutions but also explains the implications when EU bodies themselves are in an expert position such as agencies. The book offers insights into how individual experts deal with the challenge of producing reports that will be heard by policy makers while at the same time preserving their independence.

Broadening its scope the book then expands the analysis to the role of advisory committees in light of the shift from a reliance primarily on in house expertise to including more external experts in advisory groups in the European Commission and European Parliament as well as at the European External Action In the third part the book opens the lens to developments beyond the EU by taking into account two highly pertinent fields climate change and trade These fields are highly complex fast developing and politicised issues and the book engages with them in order to provide an outside in perspective on expertise Chapter 6 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com

The Capacity of Central and East European Interest Groups to Participate in EU Governance Daniela Obradovic, Heiko Pleines, 2012-02-24 The integration of ten Central and East European countries CEEC into the EU as part of the 2004 and 2007 enlargements poses new challenges to EU governance as the number of countries involved has thereby increased dramatically However the actors coming from the new member states also face challenges as they attempt to integrate themselves into EU decision making processes This book analyses the attempts of civil society organisations from the Czech Republic and Poland to engage in EU governance in four policy fields The guiding question is whether civil society organisations from the Central and East European member states have or can gain the capacity for meaningful participation in EU governance After an introductory part which outlines the analytical framework and offers a review of the literature the actors and rules of EU governance are profiled The third and fourth parts of the book then present case studies The case studies address the civil society organisations most actively involved in EU governance namely typical NGOs trade unions employers organisations and business associations

Political Representation and European Union Governance Peter Mair, Jacques Thomassen, 2013-09-13 This book confronts and discusses different conceptions of political

representation with respect to their application to the system of multi level governance in the European Union Political representation is an essentially contested concept Its meaning has evolved with the development of representative democracy at the level of the nation state and normative theories of political representation often evolved as a reflection on developing practices rather than the other way around Since the EU is not a conventional nation state and since the effectiveness and legitimacy of classic notions of political representation at the level of the national state has also become a matter of dispute the EU has become a playground for the development of alternative or additional conceptions of democracy The contributions to this volume evaluate these alternative conceptions with regard to both their effectiveness and their legitimacy and combine both conceptual and empirical analyses This book was based on a special issue of Journal of European Public Policy Elgar Encyclopedia in Urban and Regional Planning and Design Kristof Van Assche, Raoul Beunen, Martijn Duineveld, 2023-12-11 This ground breaking Encyclopedia provides a nuanced overview of the key concepts of urban and regional planning and design Embracing a broad understanding of planning and design within and beyond the professions it examines what planners and designers can do in and for a community **WTO Accessions and Trade Multilateralism** Uri Dadush, Chiedu Osakwe, 2015-09-10 An examination of how WTO accession negotiations have expanded the reach of the multilateral trading system both geographically and conceptually **Soft Law in European Community Law** Linda Senden, 2004-09-30 This book offers the first systematic investigation of the phenomenon of soft law within the framework of the EC the first pillar of the EU and its use by the European Commission and Council of Ministers It focusses upon how soft law fits into the Community legal system and how it is used and in particular how it relates to Community legislation Differentiation of the Community instruments including the instruments of soft law is often thought to enhance the effectiveness legitimacy and transparency of the Community This book asks whether soft law indeed provides a satisfactory alternative to legislation from this perspective and if so in what cases and under what conditions Furthermore the author asks to what extent the use of soft law implies good governance and throws fresh light on this very heterogeneous phenomenon by looking at frequently used instruments in many different areas of Community law such as competition law state aid environment social policy etc in the process identifying their different characteristics aims functions and legal effects What emerges is that the conditions under which soft law is used may be problematic in relation to increasing the legitimacy effectiveness and transparency of Community action This is a work which will interest legal practitioners confronted with the use of soft law and the question of its possible legal effect in an increasing number of sectors and academics interested in the vexed question of how the increased use of soft law can be justified in a Community legal order built upon the rule of law It is also critical of developments taking place within the framework of the European Convention and the proposed European Constitution and goes beyond the immediate problems of soft law to touch upon issues such as competence legal protection division of powers between the EC and the Member States institutional balance lawmaking by

the Community Courts the scope of Community legal principles and the influence of soft law on the progressive development of both Community and national law
