**European Models of Good Practice in Protected Areas** Hugh Synge, 2004      **Protected Areas and Regional Development in Europe** Ingo Mose, 2016-04-15 While originally created as reserves for beautiful landscapes and endangered species protected areas in Europe were subsequently used as a means to preserve whole ecosystems with restrictions on human activities and impacts More recently protected areas are also being considered as instruments for regional development particularly in marginal regions facing severe economic and socio cultural problems Contrary to previous conservation focused policies new approaches aim to blend conservation and development functions making protected areas real living landscapes and integrating activities such as agriculture forestry handicrafts tourism and education with the conservation and sustainability aspects The past decade has seen a marked increase in these innovative and dynamic types of protected areas However the policies of individual European countries are very varied This volume provides a comprehensive overview of the relationship between protected areas and regional development policies both in theory and practice Illustrated with a wide range of case studies from across Europe it compares the different concepts strategies and instruments being used In conclusion it suggests the most innovative and successful ways to use protected areas for regeneration and sustainable regional development      Sustainable Tourism in Protected Areas Paul F. J. Eagles, Stephen F. McCool, Christopher D. Haynes, United Nations Environment Programme, World Tourism Organization, 2002 This report tells how to ensure that tourism follows a sustainable path and that it contributes to the sustainable management of protected areas Guidelines are presented to help readers understand protected area tourism and its management and practical suggestions are based on theory and practice from around the world Coverage includes biodiversity and conservation planning for protected area tourism culturally sensitive design and operation visitor management and human resources There is no subject index Eagles teaches at the University of Waterloo Canada Annotation copyrighted by Book News Inc Portland OR      **Arguments for Protected Areas** Sue Stolton, Nigel Dudley, 2010-08-12 Most protected areas e g national parks and nature reserves have been created to protect wildlife and land and seascape values They currently cover over 13% of the world s land surface around 12% of marine coastal areas and 4% of the marine shelf Retaining and expanding these areas in the future will depend on showing their wider benefits for society This book provides a concise and persuasive overview of the values of protected areas Contributing authors from over fifty countries examine a wide range of values that are maintained in protected areas including food water and materials health tourism cultural and spiritual values and buffering capacity against climate change and natural disasters The book also considers the role of protected areas in poverty reduction strategies their relationship with traditional and indigenous people and in fostering conflict resolution through peace parks initiatives The chapters draw on a series of authoritative reports published by WWF over recent years under the Arguments for Protection banner in association with various partners and on additional research

carried out especially for the volume It analyses the opportunities and limitations of protected areas for supplying the various values along with practical advice for planners and managers about maximising benefits It provides an important contribution to the debate about the role of protected areas in conservation and other aspects of natural resource management and human livelihoods Published with WWF      **Rainforest Tourism, Conservation and Management** Bruce

Prideaux,2014-09-19 Globally rainforests are under threat on numerous fronts including clearing for agriculture harvesting for timber and urban expansion Yet they have a crucial role in biodiversity conservation climate change mitigation and providing other ecosystem services As the term is used in this book rainforests include both temperate and tropical although the emphasis is on tropical rainforests Rainforests are also attractive tourist spaces and where they have been used as a tourism resource have generated significant income for local communities However not all use of rainforests as a tourism resource has been sustainable This book argues that sustainability must be the foundation on which tourism use of this complex but ultimately fragile ecosystem must be built upon It provides a multi disciplinary perspective incorporating rainforest science management and tourism issues The book is organized into four sections commencing with Rainforest Ecology and Management followed by People and Rainforests Opportunities for Rainforest Tourism Development and finally Threats to Rainforests Each major rainforest region is covered including the Amazon Central America Africa Australia and south east Asia in the context of a specific issue For example rainforests in Papua New Guinea are examined in the context of community based ecotourism development while the rainforests in Borneo are discussed in an examination of wildlife issues Other issues covered in this manner include governance empowerment issues for rainforest peoples and climate change

**Routledge Handbook of Forest Ecology** Kelvin S.-H. Peh,Richard T. Corlett,Yves Bergeron,2015-10-16 This comprehensive handbook provides a unique resource covering all aspects of forest ecology from a global perspective It covers both natural and managed forests from boreal temperate sub tropical and tropical regions of the world The book is divided into seven parts addressing the following themes forest types forest dynamics forest flora and fauna energy and nutrients forest conservation and management forests and climate change human impacts on forest ecology While each chapter can stand alone as a suitable resource for a lecture or seminar the complete book provides an essential reference text for a wide range of students of ecology environmental science forestry geography and natural resource management Contributors include leading authorities from all parts of the world      *Best Practice for Conservation Planning in Rural Areas* ,2005-08-15 This report draws on lessons learned from observations made at seven case study sites all of which permit economic activities especially recreation that are not harmful to the biological values and natural functions of the area There is now a need to translate these experiences into policy instruments The guidelines summarized in some 20 pages offer sound and well documented advice on how to proceed      *Model Law on Sustainable Management of Coastal Zones and European Code of Conduct for Coastal Zones* Council of Europe,2000-01-01 Coastal areas have experienced unprecedented dramatic

changes in the last half of the 20th century especially in zones used for tourism development This code of conduct and model law on coastal areas establishes some general management principles aimed at the sustainable development of coastal areas and the preservation of their environmental values

*Mediterranean Island Landscapes* Ioannis N. Vogiatzakis, Gloria Pungetti, A.M. Mannion, 2008-02-26 Mediterranean islands exhibit many similarities in their biotic ecological physical and environmental characteristics There are also many differences in terms of their human colonization and current anthropogenic pressures This book addresses in three sections these characteristics and examines the major environmental changes that the islands experienced during the Quaternary period The first section provides details on natural and cultural factors which have shaped island landscapes It describes the environmental and cultural changes of the Holocene and their effects on biota as well as on the current human pressures that are now threats to the sustainability of the island communities The second section focuses on the landscapes of the largest islands namely Sicily Sardinia Corsica Cyprus Crete Malta and the Balearics Each island chapter includes a special topic reflecting a particular characteristic of the island Part three presents strategies for action towards sustainability in Mediterranean islands and concludes with a comparison between the largest islands Despite several published books on Mediterranean ecosystems landscapes there is no existing book dealing with Mediterranean islands in a collective manner Students researchers and university lecturers in environmental science geography biology and ecology will find this work invaluable as a cross disciplinary text while planners and politicians will welcome the succinct summaries as background material to planning decisions

Tourism, Health, Wellbeing and Protected Areas Iride Azara, Eleni Michopoulou, Federico Niccolini, B Derrick Taff, Alan Clarke, 2018-05-14 Around the world there is mounting evidence that parks and protected areas contribute to a healthy civil society thus increasing the economic importance of cultural and nature based tourism Operating at the intersection of business and the environment tourism can improve human health and wellbeing as well as serve as a catalyst for increasing appreciation and stewardship of the natural world While the revenues from nature based activities help to make the case for investing in park and protected area management the impacts they have need to be carefully managed so that visitors do not destroy the natural wonders that attracted them to a destination in the first place This book features contributions from tourism and recreation researchers and practitioners exploring the relationship between tourism hospitality protected areas livelihoods and both physical and emotional human wellbeing The book includes sections focused on theory policy and practice and case studies to inform and guide industry decisions to address real world problems and proactively plan for a sustainable and healthy future

**Tourism, Pilgrimage and Intercultural Dialogue** Dolors Vidal-Casellas, Silvia Aulet, Neus Crous-Costa, 2019-06-21 Religious heritage and sacred sites offer an opportunity for visitors to explore a community s cultural knowledge However it is important to consider the role of interpretation meaning experience and narrative This book is a timely re assessment of the increasing interconnections between the management of diversity and religious tourism and secular spaces on a global stage It explores key learning points from a range of contemporary case studies on religious and pilgrimage activity these relate to ancient sacred and emerging tourist destinations and new forms of pilgrimage faith systems and quasi religious activities By providing a conceptual framework

the book demonstrates the symbolism of sacred spaces within religious traditions and the relationships developed between them. It offers explanations on how to manage and communicate religious diversity and provides a solid overview of Religious tourism as a tool for intercultural dialogue. Interpretation of religious heritage for tourism. Cross cultural contacts. This book will provide a valuable resource for those researching and practising tourism management, pilgrimage and religious tourism.

**Future directions for biodiversity action in Europe overseas : outcomes of the Review of the Implementation of the Convention on Biological Diversity, December 2010 ,      *Afro-Eurasia: Assessing Sustainability* Ray C.**

Anderson, Louis Kotz, Stephen Morse, 2012-10-31. *Afro Eurasia Assessing Sustainability* focuses on the geographic area where humans originated and first began to make use of the natural world. Earth's largest landmass stretching from Portugal in the west across the steppes of Russia and south across Africa to the Cape of Good Hope. By examining the history of human expansion as well as 21st century pressures to address ecosystem damage across the region, international scholars and regional experts weave sustainability into core curricular subjects. The interdisciplinary coverage includes national and regional environmental histories as well as business and commerce, migration, educational institutions, law and government, and the lifestyles of diverse populations.      *Integrated Management Tools in the Heritage of South-East Europe* Rob Pickard, Juris Dambis, Council of Europe. Directorate of Culture and Cultural and Natural Heritage, 2008-01-01. As part of the Institutional Capacity Building Plan which is the first of the three components of the Regional Programme for Cultural and Natural Heritage in South East Europe, launched in 2003, a transnational theme-based debate was organised. The second step in this debate stemmed from an assessment of requests from the countries/regions participating in the Regional Programme: Albania, Bosnia and Herzegovina, Bulgaria, Croatia, Kosovo, UNMIK, Montenegro, Romania, Serbia, and the former Yugoslav Republic of Macedonia. The first step was concerned with current heritage policies and legislation. Its aim was to take stock of the position regarding legislative reforms and heritage policies in the countries of South East Europe. It also highlighted the need for an in-depth analysis of certain key areas where difficulties still arose in implementation. The second step was concerned with tools for integrated management of the cultural and natural heritage in the broad sense of the term heritage: the concept of cultural environment. It linked together three key topics previously identified: documentation systems incorporating the heritage dimension in environment, regional development and town planning; documents, permits, controls and penalties related to heritage conservation work.      Guidelines for Protected Areas Legislation Barbara J. Lausche, 2011. The central aim of this publication is to consider the key elements of a modern comprehensive and effective legal framework for successful management of protected areas. They provide practical guidance for all those involved in developing, improving or reviewing national legislation on protected areas: be they legal drafters and practitioners, protected area managers, interested NGOs or scholars. These guidelines include fifteen case studies: eight dealing with the protected area legislation of individual countries and six cases dealing with specific sites providing fundamental solutions that stand the test of time.

**The Restoration of Sites and Ecological Corridors in the Framework of Building Up the Pan-European Ecological Network, with Examples of Best Practices from European Countries** Eckhart Kuijken, Council of Europe, 2003-01-01 The problem of fragmentation and isolation of semi natural habitats throughout Europe is generally recognised Isolation together with the shrinkage of the area of optimal habitat are major threats to biodiversity They are the triggers for many direct and indirect processes with a negative impact on the viability of natural populations This study is compiled on the basis of extensive research as well as on the consultation of a large number of specialists in the field of restoration ecology Publisher s description
