Special Issue on Europeanization and the Southern Periphery, 2000

The New World Architecture Jose Magone, 2017-07-28 The collapse of the bipolar world sustained by the United States and the former Soviet Union led to a power vacuum in the 1990s that the European Union has only reluctantly begun to fill It is under pressure to take over important international tasks and roles in order to develop a new equilibrium in the system of international relations After 2000 reforms were undertaken so that the European Union could deal more efficiently with the tasks the new political system had acquired since the early 1990s With respect to its international role reorganization of the EU s external relations department was high on the list The New World Architecture explores the contribution that the European Union is making to the emerging global governance system It discusses the theoretical and historical aspects of European integration within the framework of the emerging regional EU and global governance systems It explores three regimes of governance that are contributing to holding together the new emerging EU multilevel governance system None of these is complete all are partial They include the political regime of governance the socioeconomic regime of governance and the territorial regime of governance The author assesses the impact of the European Union on global politics The Mediterranean and Latin America represent regions in which the European Union is investing considerable effort in order to create new forms of cooperation Magone argues that within the next twenty five years global governance may and should emerge as the new and reconfigured stable system of international relations In this system the European Union is and will remain the most advanced regional system This volume will be of interest to specialists scholars and students of European Politics and the European Union

Europeanisation of Public Policy in Southern Europe Canan Balkir, H. Tolga Bolukbasi, Ebru Ertugal, 2015-09-07 Large or small old EU member or new and even EU member state or not political economies across Southern Europe have been increasingly but distinctively Europeanised In political public and scholarly debates on processes of Europeanisation Southern Europe invariably features as the area of concern These concerns have been all the more heightened when the current sovereign debt crisis disproportionately hit this flaky fringe This volume systematically investigates the dynamics of Europeanisation in the Southern Periphery by tracing the domestic constellations of ideas interests and institutions over the course of the 2000s which came to a close with the crisis Bringing together a multidisciplinary team of leading specialists the volume focuses on the political economy of public policy reform in Greece Italy Malta Portugal Spain and Turkey In order to allow for cross case comparisons these original country studies follow a common template framed by what the Editors call the Europeanisation as research programme The volume casts empirical

light on the causes of the crisis in these cases as well as the past legacies conditioning their responses to the crisis Its conclusions point to variegated patterns of Europeanisation in different policy areas across Southern Europe This volume will be of interest to students and scholars of European integration European political economy European public policy and comparative politics as well as specialists of Southern Europe This book was published as a special issue of South European Society and Politics

Social Movements and Europeanization Donatella della Porta, Manuela Caiani, 2009-05-14 Are social movement organizations euro sceptical euro pragmatic or euro opportunist Or do they accept the EU as a new level of governance to place pressure on Do they provide a critical capital necessary for the political structuring of the EU or do they disrupt the process of EU integration This book includes surveys of activists at international protest events targeting the European Union for a total of about 5000 interviews a discourse analysis of documents and transcripts of debates on European politics and policies conducted during the four European social forums held between 2002 and 2006 and involving hundreds of social movement organizations and tens of thousands of activists from all European countries about 320 interviews with representatives of civil society organizations in six EU countries France Germany the United Kingdom the Netherlands Spain and Italy and one non member state Switzerland and a systematic claims analysis of the daily press in selected years between 1990 and 2003 The empirical research shows the different paths of Europeanization taken by social movements and civil society organizations

Democratic Governance and European Integration Ronald Holzhaacker, Erik Albæk, 2007-01-01 As the power and scope of the European Union moves further beyond traditional forms of international cooperation between sovereign states it is important to analyse how these developments are impacting upon national institutions and processes of democratic representation and legitimacy in the member countries The authors in this book identify four core processes of democratic governance present in any democratic political system that link societal and state processes of decision making opinion formation interest intermediation national executive decision making and national parliamentary scrutiny From a normative perspective they discuss what impacts this process of Europeanization has on democracy in the evolving system They conclude that more changes are seen within the state centric than in the societal centred processes of democracy thus the public seems to have been left behind in the process of constructing Europe The empirical research and normative discussion presented in this book are designed to further our knowledge concerning the Europeanization of social and state processes of democracy and to contribute to the continuing dialogue on democracy in the European Union This book will be of great interest to academics and researchers of political science public policy and international relations as well as those interested in European studies and comparative politics

Moments of Truth Francisco Panizza, George Philip, 2013-11-07 The current financial and sovereign debt crisis of the European Union and the United States can be regarded as the most recent of a wave of financial and sovereign debt crises that have affected different regions of the world over the past quarter century While there is a large and growing body of literature on the economic

aspects of financial crises its political elements remain surprisingly under studied Moments of Truth The Politics of Financial Crises in Comparative Perspective fills this gap in the literature by looking at the political repercussions and policy implications of financial crises in comparative perspective using case studies in Latin America Korea and Russia as well as the contemporary crises in the US and in key European countries Contributors to this volume look at the crises as critical junctures that generate high levels of uncertainty while calling for decisive action The chapters emphasize structural or agency based explanations and give relevance to the role of ideas interests and institutions in explaining different outcomes The questions addressed by the case studies include how the crises were defined by key actors the range of political and policy options available to deal with their impact the role of ideas in policy shifts how political and economic actors redefine their interests in contexts of uncertainty how political institutions mediate reactions to the crises what explains the choice of a certain option over other alternatives and whether the crisis has so far resulted in significant political and policy changes or in incremental adjustments to the status quo The first book to comparatively analyze the political dimensions of financial crises across different global regions Moments of Truth will be highly significant for any scholars interested in the contemporary debate on financial crises Europeanizing Greece Nancy Vamvakas,2012-03-26 While Greece s debt crisis continues to dominate international headlines the country has received remarkably little scholarly attention especially in comparison to other European Union members Europeanizing Greece explores the developments that resulted from Greece s European integration between 1989 and 1999 which played a crucial role in shaping the country s current conditions Focusing on changes made to the Greek administrative and political system based on EU structural policy Nancy Vamvakas contends that EU involvement was not the only reason why these modifications were implemented Vamvakas points out serious flaws in the Greek system and demonstrates how Greece s approach to reform has been inextricably linked to the perceived level of crises Europeanizing Greece serves as a perceptive case study of the EU s continual enlargement and resulting regional challenges **The Transformation of the Media System in Turkey** Eylem Yanardağoglu,2021-12-02 The book focuses on the changes that the media system in Turkey went through since early 2000s Its perspective considers sociology of citizenship and focuses on processes such as Europeanization de Europeanization authoritarianism on the one hand and implications of digitalization and convergence on the other It tracks the transformation of the media system through the trajectories of normative participative and entrepreneurial citizenship practices The final sections focus on aspects of convergence evidenced in bottom up and participatory forms of digital media such as the birth of citizen journalism and fact checkers after the demise of conventional mainstream media in recent years **Understanding Central Europe** Marcin Moskalewicz,Wojciech Przybylski,2017-11-20 Central Europe is a vague and ambiguous term more to do with outlook and a state of mind than with a firmly defined geographical region In the immediate aftermath of the collapse of the Iron Curtain Central Europeans considered themselves to be culturally part of the West which had been

politically handicapped by the Eastern Soviet bloc More recently and with European Union membership Central Europeans are increasingly thinking of themselves as politically part of the West but culturally part of the East This book with contributions from a large number of scholars from the region explores the concept of Central Europe and a number of other political concepts from an openly Central European perspective It considers a wide range of issues including politics nationalism democracy and the impact of culture art and history Overall the book casts a great deal of light on the complex nature of Central Europe

Policy-Making Processes and the European Constitution Thomas König, Simon Hug, 2006-09-27 This new volume presents a wealth of fresh data documenting and analyzing the different positions taken by governments in the development of the European Constitution It examines how such decisions have substantial effects on the sovereignty of nation states and on the lives of citizens independent of the ratification of a constitution Few efforts have been made to document constitution building in a systematic and comparative manner including the different steps and stages of this process This book examines European Constitution building by tracing the two level policy formation process from the draft proposal of the European Convention until the Intergovernmental Conference which finally adopted the document on the Constitution in June 2004 Following a tight comparative framework it sheds light on reactions to the proposed constitution in the domestic arena of all the actors involved It includes a chapter on each of the original ten member states and the fifteen accession states plus key chapters on the European Commission and European Parliament This book will be of strong interest to scholars and researchers of European Union politics comparative politics and policy making
