Spaceplane HERMES Luc van den Abeelen, 2016-11-26 This is the first comprehensive book on the European Hermes program It tells the fascinating story of how Europe aimed for an independent manned spaceflight capability which was to complement US and Soviet Russian space activities In 1975 France decided to expand its plans for automated satellites for materials processing to include the

development of a small 10 ton spaceplane to be launched on top of a future heavy lifting Ariane rocket This Hermes spaceplane would give Europe its own human spaceflight capability for shuttling crews between Earth and space stations The European Space Agency backed the proposal Unfortunately after detailed studies the project was cancelled in 1993 If Hermes had been introduced into service it could have become the preferred space taxi for ferrying crews to and from the International Space Station But that opportunity was lost This book provides the first look of the complete story of and reasons for the demise of this ambitious program It also gives an account which pieces of Hermes survived and are active in the 2nd decade of the 21st century This fascinating story will be a great read for space enthusiasts But it will also serve as a comprehensive documentation of an important episode in the history of manned spaceflight Yearbook on Space Policy 2007/2008 Kai-Uwe Schrogl,Charlotte Mathieu,Nicolas Peter,2010-07-19 At the time of nalsing this second volume of the Yearbook on Space Policy which covers the period mid 2007 to mid 2008 Europe is as visible and strong in the area of space activities as never before Its space probes are present on the Moon around Mars and on Saturn s Moon Titan and are chasing asteroids and comets Ariane V is the most successful commercial launch vehicle and more and more European space applications satellites are in operation Finally with the successful launch of the Columbus Orbital Facility COF the most prominent highlight of this period which is also depicted on the cover of this Yearbook and the rst Automated Transfer Vehicle ATV Europe has become a decisive player in human space ight This is accompanied by new policy initiatives on the ministerial level which have been bringing the European Space Agency and the European Union steadily closer Europe s outstanding development and positioning in the space eld is based not only on Europe s successful engineering and scienti c capabilities and capacities but also on the forceful political determination of all European actors to maintain and even further their engagement in the use of outer space And it is this political determination which provides the focus for this Yearbook on Space Policy The Yearbook describes and analyses the contexts and contents of space policy Its primary eld of investigation is Europe but it also covers the whole range of global space activities and their in uence on European endeavours Space, Time, and Aliens Steven J. Dick,2020-05-11 In this comprehensive and interdisciplinary volume former NASA Chief Historian Steven Dick reflects on the exploration of space astrobiology and its implications cosmic evolution astronomical institutions discovering and classifying the cosmos and the philosophy of astronomy The unifying theme of the book is the connection between cosmos and culture or what Carl Sagan many years ago called the cosmic connection As both an astronomer and historian of science Dr Dick has been both a witness to and a participant in many of the astronomical events of the last half century This collection of papers presents his reflections over the last forty years in a way accessible to historians philosophers and scientists alike From the search for alien life to ongoing space exploration efforts readers will find this volume full of engaging topics relevant to science society and our collective future on planet Earth and beyond

Observatories in Earth Orbit and Beyond Y. Kondo,2012-12-06 When I became President of International Astronomical

Union Commission 44 for the triennial period 1985-1988 several members of the Organizing Committee and I agreed that it would be a good idea for our Commission to host a conference on observatories in space in view of their increasingly important role in astronomical research. IAU Colloquium Number 123, *Observatories in Earth Orbit and Beyond* is the first colloquium sponsored by IAU Commission 44 on Astronomy from Space although Commission 44 has co-sponsored numerous colloquia and symposia in the past. The past two decades have seen a flourishing of astronomical observatories in space. Over a dozen orbiting observatories have opened up a new window on the universe providing hitherto unavailable data in the electromagnetic spectral range from gamma-ray X-ray ultraviolet to infrared and radio. This has clearly demonstrated the crucial nature of astronomical observations from space. The invited talks of the present colloquium consist primarily of reviews of currently operating observatories in space, future observatories that have been approved by sponsoring government or space agencies, the launch systems of the USA, ESA, USSR and Japan, discussions of various orbits and sites such as the Moon and alternate approaches in designing space observatories. Several panel discussions addressed those issues as well as the major unsolved problems of astronomy. Contributed poster papers included descriptions of space observatories that are in planning stage.

Societal Impact of Spaceflight Steven J. Dick, 2007 *Problem Structuring Approaches for the Management of Projects* Gary Bell, Rosane Pagano, Jon Warwick, Carlos Sato, 2018-08-20 Exploring the three levels of project management this edited collection analyses the practice of problem structuring approaches (PSAs) with an aim to improve organisational adaptability and value creation. By studying these approaches the authors present techniques for enhancing project management knowledge informing decision making and guiding management actions. This book is an insightful and timely read as it addresses the need for organisations to adapt in order to tackle new challenges within today's changing business landscape. Undoubtedly useful to those studying project management and operational research this book is also an important read for managers and decision makers within organisations as it identifies and examines the effective outcomes of PSAs.

Civilian space stations and the U.S. future in space., 1984

Parliamentary Assembly of the Council of Europe, Policy Logics and Institutions of European Space Collaboration Kazuto Suzuki, 2017-05-15 Focusing on European collaboration outside of the European Union (EU) this volume deepens the analysis of the current status of space policy in Europe looking at the roles and functions of the institutions of European space collaboration and what influences the interests and strategies of experts and policy makers. Providing a new conceptual framework the book also develops an innovative perspective for understanding the interactions between international and domestic policy making as well as a comprehensive analysis of how European states collaborate in a security sensitive area such as space. This invaluable work is suitable for courses on and specialists in European studies, international relations and international political economy.

Integration Beyond Brussels Matthew Broad,Suvi Kansikas,2020-08-14 Europe is a continent whose history has in one form or another long been dominated by integration And yet the European integration process is often treated as synonymous with the evolution of just one particular and until recently geographically quite limited Western centred organisation the European Union EU This trend obscures the multitude of ways European states have acted collectively on both sides of the Iron Curtain and continue to do so throughout the continent today With contributors drawn from history and political science this book explores some of these diverse integration efforts beyond Brussels We shine a light on international organisations trade frameworks and various political social scientific and cultural forms of unity in both Eastern and Western Europe In so doing the book seeks to redefine the history of the European integration process not only as a less purely EU centric phenomenon but as a less strictly Western European one too *Rocket Science Made Simple*
