Euthanasia And Palliative Care In The Low Countries:

Euthanasia and Palliative Care in the Low Countries Paul Schotsmans, Tom Meulenbergs, 2005 Belgium and the Netherlands the Low Countries are the first countries in the world to have legalized euthanasia Physicians who terminate life at the patient's request no longer have to fear criminal prosecution However end of life legislation in the Low Countries has provoked diverse responses and sparked vigorous and divisive ethical debate For some the new legislation has become a shining example for others it is a lamentable materialization of a culture of death *Euthanasia and Palliative Care in the Low Countries* provides an overview and comparison of the legal specifics of the Belgian and Dutch Euthanasia Acts a discussion of palliative care initiatives and an ethical examination of the new legislation In addition the book provides an in depth analysis of the arguments used in the end of life debate and a critical examination of the positions taken by the churches The book concludes with an overview of how Christian health care institutions accommodate to this new legal situation

Assisted Death in Europe and America Guenter Lewy, 2011 Advances in medical treatment now enable physicians to prolong life to a previously unknown extent however in many instances these new techniques mean not the saving of life but prolonging the act of dying In the eyes of many medical technology has run out of control and contributes to unnecessary suffering Hence the demand has arisen that patients should be entitled to choose death when pain and physical and mental deterioration have destroyed the possibility of a dignified and meaningful life and that their doctors should help them to realize this endeavor At the present time there are seven jurisdictions in the world that with various restrictions have legalized the practice of assisted death physician assisted suicide and or voluntary euthanasia to wit the Netherlands Belgium Luxembourg Switzerland in Europe and the states of Oregon Washington and Montana in the United States Four of these regimes in the Netherlands Belgium Switzerland and the state of Oregon have been functioning for many years and we have for them a substantial body of data as well as much observational research This book is based upon this material The literature dealing with the moral legal and social aspects of assisted death is voluminous but there is a paucity of writing that provides a detailed account of the way these four regimes are actually working Many partisans on both sides of the issue cite existing data selectively or at times willfully distort the empirical evidence in order to strengthen their case Based on the documentary record and interviews with officials and scholars this book seeks to give the specialist as well as the general interested reader a reliable picture of the way assisted death functions and to draw relevant lessons While accurate factual information cannot settle a moral debate it nevertheless is a precondition of any well founded argument The author speaks authoritatively about the issues he addresses I think this book does make an important contribution to the field It will be of interest to students and scholars of PAS as a source of information and reference I definitely recommend publication Stuart Youngner Department of Bioethics Case Western Reserve University School of Medicine The information collected here makes an important contribution to the literature on PAS because it collects a broad array of relevant information into a

single volume It is interesting and enlightening This will make the book a valuable resource for anyone interested in the subject and an especially useful resource for academics who study or teach about the issues Rosamond Rhodes Director Bioethics Education Mt Sinai School of Medicine

Palliative Care Nursing Sheila Payne, 2008-08-01 It has been a true pleasure to have had the opportunity to peruse the second edition of Palliative Care Nursing This book authored predominately by UK based experts succeeds in presenting sophisticated thoughts in readily accessible language Each chapter begins with a summary of key points with both classic and new relevant literature well integrated into the text I have also been particularly impressed with the editors final chapter in which they synthesize a number of crucial issues for the future development of palliative care this second edition makes a significant contribution to both the palliative care literature as well as to nursing literature Carol Tishelman Karolinska Institutet Stockholm Sweden I find Palliative Care Nursing a very attractive book for nurses but also for other disciplines to learn about nursing and to learn about palliative care The book is voluminous informative and educationally well constructed Frameworks and models in this book will give nurses the opportunity to make up their own process to offer support and be a carer for the incurably ill person and his/her family as a skilled companion This book gives the possibility for nurses to spread one clear voice about palliative care nursing

Congratulations to all the authors Martine De Vlieger Palliatieve Hulpverlening Antwerpen v z w University of Antwerp Belgium This book should be compulsory reading for nurses and other health care workers who are involved in the care of people in the final stages of life It provides a comprehensive account of the major issues clinical professional sociological and political that confront contemporary palliative care while also offering strategies to move forward The real world of palliative care is described and critiqued and the rhetoric is dispensed with This book is a vital resource for nursing practice learning and teaching Associate Professor Peter Hudson RN PhD Director of the Centre for Palliative Care Research and Education St Vincent's Hospital and The University of Melbourne Australia This is an excellent book for anyone completing either an academic qualification or who wants to understand the who what and where of palliative care both in the UK and abroad Its detail is balanced with case studies and practical illustrations that bring the academic nature of its writing to life For reference purposes for anyone completing academic work it has to be an absolute must Nursing Times The second edition of this innovative textbook has been extensively revised and updated to reflect new global developments in palliative care This textbook reviews current research and examines the evidence base for palliative care policy and practice Over a third of the chapters are newly commissioned from leading international contributors Building on the widely acclaimed original edition the textbook focuses on palliative care for adults in a variety of care environments The first three sections use a novel framework the trajectory of life limiting illness to cover key issues including What happens to people as they become ill How individuals cope as they near death and are dying How families and friends deal with bereavement and loss The final section addresses contemporary issues in nursing and inter professional working The book is written with helpful overviews and in

an informative and reader friendly style There are numerous examples of clinical situations and research studies which are examined in depth to illustrate debates in palliative care The textbook spans the range of end of life contexts which are of relevance to practitioners educationalists and researchers Palliative Care Nursing is essential reading for post qualification nursing students and all nurses and health and social care professionals who provide care to people with advanced illness and those who are near the end of life This broad ranging critical text will be invaluable to students and practitioners working with people and their families near the end of life

Death's Dominion: Ethics At The End Of Life Woods, Simon, 2006-12-01 Drawing on a philosophical framework the author explores end of life issues in order to reflect on the nature of the good death and how this may be achieved The book considers whether it is permissible or desirable to influence the quality of dying of

EBOOK: Death's Dominion: Ethics at the End of Life Simon Woods, 2006-12-16 I enjoyed reading this book very much It is very readable and well argued using real life cases and thought experiments as well The book provides the reader with a short history of and an overview of the most important issues in modern palliative care Various theoretical discussions are clearly set out such as the relationship between the hospice movement and modern palliative care between palliative care and health care in general between palliative sedation and euthanasia and the question whether

euthanasia can be part of palliative care The author starts with exploring the existing debates and then develops his own arguments in a balanced and well structured way Medicine Health Care and Philosophy The text of this book is accessible the philosophical and ethical arguments are clearly articulated and relevant ethical principles are integrated into the critique of the issues making this a very useful book for nurses working in palliative as well as in general care Nursing Ethics It is crucially important for any student or researcher who is seriously considering ethical and policy matters at the end of life to embrace and tackle intellectually the issues that Woods raises in this book I would happily recommend it Journal of Medical Ethics What constitutes a good death Is it possible to arrange a good death Is killing compatible with caring This book looks at death and the issues and ethical dilemmas faced at the end of life It addresses the central issues in the field such as Withholding and withdrawing treatment Euthanasia and assisted suicide Terminal sedation The role of autonomy Palliative care Drawing on a philosophical framework the author explores end of life issues in order to reflect on the nature of the good death and how this may be achieved The book considers whether it is permissible or desirable to influence the quality of dying offering palliative sedation as a possible alternative to terminal sedation the argument is extended to examine why some forms of assisted dying can be shown to be compatible with the ideas of palliative care Consideration is also given to future developments such as life extension techniques and the ethical questions that that these techniques might raise As such the book follows in the ongoing philosophical tradition to critique and analyse current thought on the topic of death encouraging self reflection in the reader and offering suggestions for practice in end of life care Death s Dominion is key reading for students and professionals involved in care of the dying as well as those with an interest in the philosophical issues surrounding end of life care Regulating the End of Life Sue Westwood, 2021-09-09 Regulating the End of Life Death Rights is a collection of cutting edge chapters on assisted dying and euthanasia written by leading authors in the field Providing an overview of current regulation on assisted dying and euthanasia both in the UK and internationally this book also addresses the associated debates on ethical moral and rights issues It considers whether just as there is a right to life there should also be a right to death especially in the context of unbearable human suffering The unintended consequences of prohibitions on assisted dying and euthanasia are explored and the argument put forward that knowing one can choose when and how one dies can be life extending rather than life limiting Key critiques from feminist and disability studies are addressed The overarching theme of the collection is that death is an embodied right which we should be entitled to exercise with appropriate safeguards as and when we choose Making a novel contribution to the debate on assisted dying this interdisciplinary book will appeal to those with relevant interests in law socio legal studies applied ethics medical ethics politics philosophy and sociology **Medicine and the Body in Early Modern Europe** Michael Stolberg,

Battleground: Religion Daniel L. Smith-Christopher, 2008-12-30 Is there a controversial issue in the contemporary world that does not involve religion Whether it s a debate over the beginning of life or on sexuality and family life or on the

stewardship of humans over the environment almost all of the most contentious matters that impact today's society involve people's deeply held religious beliefs Battleground Religion helps clarify these complex topics by examining how various religious beliefs and practices impact current political social and cultural debates Each of the approximately 100 entries examines a hot button issue from war and peace to the culture wars and discusses in a balanced and objective way the points of view on these topics from all parts of the religious spectrum Students will come away from Battleground Religion with a better understanding of the issues that they will be encountering for years to come Each entry includes a bibliography or resources for further information

Theological Bioethics Lisa Sowle Cahill, 2005-11-16 The field of bioethics was deeply influenced by religious thinkers as it emerged in the 1960s and early 1970s Since that time however a seemingly neutral political liberalism has pervaded the public sphere resulting in a deep suspicion of those bringing religious values to bear on questions of bioethics and public policy As a theological ethicist and progressive Catholic Lisa Sowle Cahill does not want to cede the religious perspective to fundamentalists and the pro life movement nor does she want to submit to the gospel of a political liberalism that champions individual autonomy as holy writ In Theological Bioethics Cahill calls for progressive religious thinkers and believers to join in the effort to reclaim the best of their traditions through jointly engaging political forces at both community and national levels In Cahill's eyes just access to health care must be the number one priority for this type of participatory bioethics She describes a new understanding of theological bioethics that must go beyond decrying injustice beyond opposing social practices that commercialize human beings beyond painting a vision of a more egalitarian future Such a participatory bioethics she argues must also take account of and take part in a global social network of mobilization for change it must seek out those in solidarity those involved in a common calling to create a more just social political and economic system During the past two decades Cahill has made profound contributions to theological ethics and bioethics This is a magisterial and programmatic statement that will alter how the religiously inclined understand their role in the great bioethics debates of today and tomorrow that yearn for clear thinking and prophetic wisdom

God and Government Cornelis Van Dam, 2011-12-05 Ours is a time of rapid cultural change with new economic challenges People look to their governments for leadership and solutions But what can and should government do to meet the difficulties that beset a nation What can citizens expect from their elected representatives What is reasonable And what should citizens do What are their responsibilities This book addresses such fundamental issues through the eyes of Scripture and against the backdrop of North America's dual heritage of Christianity and humanism Government politics and the Bible do not seem like a good mix But as this book aims to show the Bible has much wisdom to teach us about the place and role of government and its citizens Biblical principles work because God knows how his world and his servant governments are supposed to function After all he ordained the governing authorities and the principles enunciated in his Word are timeless and remain practical This book introduces fundamental biblical principles that apply to government and politics The intent is to inform and to

motivate the reader to get involved where possible in the political processes of the day Our legislators need the input and help from their knowledgeable Christian constituents Autonomy & Paternalism Thomas Nys,Yvonne Denier,Toon Vandeveld,2007 In recent years the triumph of autonomy has made paternalist interventions increasingly problematic The value of a patient's right to self determination and the practice of informed consent are considered supremely important in present day health care ethics In general the idea of doctor knows best has become more and more suspicious This has left us with a situation in which paternalist medicine seems difficult to reconcile with respect for patient autonomy This book offers a thorough reflection on the relationship between autonomy and paternalism and argues that from both theoretical and practical angles the tension between these concepts is not as acute as it might seem In long term care psychiatry and care for the severely handicapped the principle of respect for autonomy is particularly ill suited This however does not mean that such respect is totally irrelevant but that it should take a different shape Good care in those cases requires us to transcend the sharp dichotomy between autonomy and paternalism In *Autonomy and Paternalism Reflections on the Theory and Practice of Health Care* various acclaimed authors present their views on this interesting and extremely relevant debate

Palliative care for older people Lieve Van den Block,Gwenda Albers,Sandra Martins Pereira,Bregje Onwuteaka-Philipsen,Roeline Pasman,Luc Deliens,2015-05-07 Current projections indicate that by 2050 the number of people aged over 80 years old will rise to 395 million and that by this date 25-30% of people over the age of 85 will show some degree of cognitive decline *Palliative care for older people* A public health perspective provides a comprehensive account of the current state of palliative care for older people worldwide and illustrates the range of concomitant issues that as the global population ages will ever more acutely shape the decisions of policy makers and care givers The book begins by outlining the range of policies towards palliative care for older people that are found worldwide It follows this by examining an array of socio cultural issues and palliative care initiatives from the care implications of health trajectories of older people to the spiritual requirements of palliative care patients and from the need to encourage compassion towards end of life care within communities to the development of care pathways for older people *Palliative care for older people* A public health perspective is a valuable resource for professionals and academics in a range of healthcare and public health fields to understand the current state of policy work from around the world The book also highlights the social cultural considerations that influence the difficult decisions that those involved in palliative care face not least patients themselves and offers examples of good practice and recommendations to inspire support and direct healthcare policy and decision making at organisational regional national and international levels **Assisted Dying for the Terminally Ill Bill (HL)** Great Britain: Parliament: House of Lords: Select Committee on the Assisted Dying for the Terminally Ill Bill,2005-04-28 The Bill was published as HLB 4 session 2004-05 ISBN 01084188390 This volume contains a selection of the 14 000 personal letters and other submissions received by the Committee with regards to their inquiry into the Bill Textbook of Palliative Care

Roderick Duncan MacLeod, Lieve Van den Block, 2025-02-25 This second edition provides the most up to date information on all aspects of palliative care including recent developments including COVID 19 global policies service provision symptom management professional aspects organization of services palliative care for specific populations palliative care emergencies ethical issues in palliative care research in palliative care public health approaches and financial aspects of care This new Textbook of Palliative Care remains a unique comprehensive clinically relevant and state of the art book aimed at advancing palliative care as a science a clinical practice and as an art Palliative care has been part of healthcare for over fifty years but it still needs to be explained to many Healthcare education and training has been slow to recognize the vital importance of ensuring that all practitioners have a good understanding of what is involved in the care of people with serious or advanced illnesses and their families However the science of palliative care is advancing and this new edition will contribute to a better understanding This new edition offers 86 updated or new chapters out of 108 written by experts in their given fields providing up to date information on a wide range of topics of relevance to those providing care towards the end of life no matter what the disease may be We present a global perspective on contemporary and classic issues in palliative care with authors from a wide range of disciplines involved in this essential aspect of care The Textbook includes sections addressing aspects such as symptom management and care provision organization of care in different settings care in specific disease groups palliative care emergencies ethics public health approaches and research in palliative care This new Textbook will be of value to practitioners in all disciplines and professions where the care of people approaching death is important specialists as well as non specialists in any setting where people with serious advanced illnesses are residing It is also an important resource for researchers policy and decision makers at national or regional levels Neither the science nor the art of palliative care will stand still so the Editors and contributors from all over the world aim to keep this Textbook updated so that the reader can find new evidence and approaches to care

The Voices and Rooms of European Bioethics Richard

Huxtable, Ruud ter Meulen, 2015-04-24 This book reflects on the many contributions made in and to European bioethics to date in various locations and from various disciplinary perspectives In so doing the book advances understanding of the academic and social status of European bioethics as it is being supported and practiced by various disciplines such as philosophy law medicine and the social sciences applied to a wide range of areas The European focus offers a valuable counter balance to an often prominent US understanding of bioethics The volume is split into four parts The first contains reflection on bioethics in the past present and future and also considers how comparison between countries and disciplines can enrich bioethical discourse The second looks at bioethics in particular locations and contexts including policy boardrooms and courtrooms studios and virtual rooms and society while the third part explores the translation of theories and concepts of bioethics into the clinical setting Chapter 10 of this book are freely available as downloadable Open Access PDFs under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license <https://s3.us-west-2.amazonaws.com>
