Rebecca Steffoff

Euthanasia The Right To Die Issue:

Euthanasia Daniel Jussim,1993 Discusses passive and active euthanasia and some ethical and moral issues surrounding the topic *Euthanasia and the "right to Die"* Renée C. Rebman,2002 An objective examination of both sides of the issue of euthanasia Euthanasia and the Right to Die Jennifer M. Scherer,Rita James Simon,1999 Sensitive and high profile public policy issues often benefit from being considered in comparative perspective Here euthanasia and the right to die are examined in the context of the social legal and religious settings of a wide range of countries The authors employ public opinion data where available to illustrate the great disparity between approval of physician assisted suicide and the general illegality of the practice Ultimately making and implementing laws to ensure a responsible right to die_as the U S has been struggling with in Oregon Michigan and elsewhere _will be informed by experiences in such places as the Netherlands Australia and the only country in the world where euthanasia is a clear cut medical option Colombia **Terminal Choices** Robert N. Wennberg,1989 A discussion of the moral religious legal and personal issues surrounding euthanasia suicide and the right to die The Right to Die Melvin I. Urofsky,Philip E. Urofsky,2020-11-25 First Published in 1996 The key issue in all right to die matters is who decides Who will decide whether life support should be terminated Who will decide if a person is competent to make life and death decisions The law is quite clear that in cases of conscious competent adults the individual is free to make all decisions relating to his or her care and future This volume is a collection of writings and case studies around the topics of personal choice AIDS and informed consent due process and the right to die The Right to Die Howard Ball,2017-01-26 This book provides a comprehensive and contemporary examination of the right to die issues facing society now that vast improvements in public health care and medicine have resulted in people not only living longer but taking much longer to die often in great pain and suffering In 1900 the average age at which people died in America was 47 years of age the primary causes of death were tuberculosis and other respiratory illnesses In the 21st century as a result of better health care and working conditions as well as advances in medical technology we live much longer as of 2016 about 80 years A much larger proportion of Americans now die from chronic diseases that generally appear at an advanced age such as heart disease cancer or chronic obstructive pulmonary disease COPD Should this fundamental change in human lifespan alter how society and government view right to die legislation What are the pros and cons of giving a mentally competent person who is terminally ill and in great pain the right to end his or her life The Right to Die A Reference Handbook provides a complete examination of right to die issues in the United States that dissects the complex arguments for and against a person s liberty to receive a physician s assistance to hasten death It covers the legal aspects and the politics of the right to die controversy analyzes the battles over the right to die in state and federal courts and supplies primary source documents that illustrate the political medical legal religious and ethical landscape of the right to die Additionally the book examines how members of our society typically die has changed in the past 150 years and how the practice of medicine has evolved

over that time explains why the right to die is strongly opposed by many religious groups as well as members of the medical profession considers the slippery slope argument against doctor assisted suicide and identifies the reasons that the disabled the poor the elderly and infirm and some members of ethnic racial and religious minority groups typically fear physician assisted death

The Right to Die Miriam Cosic,2003 Focuses on the arguments for and against euthanasia and the philosophical political and cross cultural contexts of this age old dilemma Included are case studies of patients and their families who are faced with these harrowing decisions at the end of life as well as the opinions of the professionals who deal with human suffering daily

Voluntary Euthanasia and the Common Law Margaret Otowski,1997 Margaret Otowski investigates the complex and controversial issue of active voluntary euthanasia She critically examines the criminal law prohibition of medically administered active voluntary euthanasia in common law jurisdictions and carefully looks at the situation as handled in practice The evidence of patient demands for active euthanasia and the willingness of some doctors to respond to patients requests is explored and an argument for reform of the law is made with reference to the position in the Netherlands where active voluntary euthanasia is now openly practiced

The Legal Issues of the Emerging Rights Jianzong Yao,2024-02-27 This book systematically discusses the contents of the administrative right to know the right to information the right to gene euthanasia and other emerging rights The purpose of this book is to attract legal scholars to pay attention to these right changes in the process of China s social transformation analyze the basic laws of right changes under the specific background of China s society and provide a theoretical system model for the establishment of China s legislative right recognition and right relief system The typical feature of contemporary China is all round social transformation In such a transitional period the construction of democracy legal system and political system in China is gradually unfolding and developing with its unique mode In the construction of legal system and the practical operation of legal system the concept of rights the thinking of rights and the logic of rights have in fact been running through the social and legal practice in China for decades since the reform and opening up and have always become its background keynote and background Its typical realistic symptom is that a large number of rights belong to new for China the germination and birth of the type In this context this book tries to combine the general theory with the specific reality of the right landscape and preliminarily explores and explains the generation mechanism existence basis development logic and basic connotation of the new types of rights that is the main emerging or new types of rights in the transitional Chinese society The purpose of this book is to draw the attention of the colleagues in the field of law to the reality of the emergence and development of emerging rights in our society At the same time taking this as an example I hope that the colleagues in the field of law can deepen the study of rights especially from the general and macro study of rights to the more specific and micro study of rights

Uhlmann, 1998 This rich and comprehensive anthology of primary sources is the essential reference work for anyone interested in understanding the arguments moral theological medical and legal on both sides of the assisted suicide and euthanasia debate *Euthanasia and Assisted Suicide* Michael J.
