Evaluating Built Environments A Behavioral Approach And Architect:

Building Evaluation Wolfgang F.E. Preiser, 2013-12-14 This book is about building evaluation in the broadest sense and it transcends the meaning and conventional boundaries of the evolving field of post occupancy evaluation by focusing on evaluation throughout the building delivery process This process is seen not just as being linear with a product in mind i.e. the completed and occupied building but rather it is seen as a cyclic evolution which has as its goal the continuous improvement of the quality of buildings This goal can only be accomplished if evaluation occurs throughout the building delivery process and if 1 the evaluation that does occur is systematic and rigorous 2 the data that is obtained can be fed into data bases and clearinghouses for use in future generations of buildings and 3 there is continuity in information flow The idea for this book originated with a symposium that was part of a conference held at the Technical University in Delft Netherlands in July of 1988 i.e. IAPS 10 the tenth biannual conference of the International Association for the Study of People and their Physical Surroundings Authors presented papers based on their book chapters and discussions ensued about the expanded boundaries of the field about theoretical methodological and practical issues as well as applications in building evaluation Other relevant topics were identified and several additional authors were invited to participate in order to round out the contents of this book *Evaluating Built Environments* Robert W. Marans, Kent F. Spreckelmeyer, 1981

Integrating Programming, Evaluation and Participation in Design (Routledge Revivals) Henry Sanoff, 2016-07-01 First published in 1992 this book is about making connections that may lead towards a new professionalism since the past several decades have given rise mainly to new kinds of specialists in the areas of programming evaluation and participation The implications for such integration are far reaching with profound future effects on the physical environment the design professions and the education of designers The book is split into four sections dealing with facility programming several forms of evaluation participatory design and the application of Theory Z principles This book will be of interest to students of architecture and design *Architecture Beyond Criticism* Wolfgang F. E. Preiser, Aaron T. Davis, Ashraf M. Salama, Andrea Hardy, 2014-11-27 For the first time this book demonstrates that the two paradigms of architectural criticism and performance evaluation can not only co exist but complement each other in the assessment of built works As architecture takes more principled stances worldwide from environmental sustainability to social cultural and economic activism this book examines the roles of perceived and measured quality in architecture By exploring in tandem both subjective traditional architectural criticism and environmental design and performance evaluation and its objective evaluation criteria the book argues that both methodologies and outcomes can achieve a comprehensive assessment of quality in architecture Curated by a global editorial team the book includes Contributions from international architects and critics based in the UK USA Brazil France Qatar Egypt New Zealand China Japan and Germany Global case studies which illustrate both perspectives addressed by the book and comparative analyses of the findings A six part organization which includes introductions and conclusions

from the editors to help guide the reader and further illuminate the contributions By presenting a systematic approach to assessing building performance design professionals will learn how to improve building design and performance with major stakeholders in mind especially end users occupants Evaluating Built Environments Robert W. Marans,Kent F. Spreckelmeyer,1981 **Learning from Our Buildings** National Research Council,Board on Infrastructure and the Constructed Environment,Federal Facilities Council,2002-03-01 In 1986 the FFC requested that the NRC appoint a committee to examine the field and propose ways by which the POE process could be improved to better serve public and private sector organizations The resulting report Post Occupancy Evaluation Practices in the Building Process Opportunities for Improvement proposed a broader view of POEs from being simply the end phase of a building project to being an integral part of the entire building process The authoring committee recommended a series of actions related to policy procedures and innovative technologies and techniques to achieve that broader view In 2000 the FFC funded a second study to look at the state of the practice of POEs and lessons learned programs among federal agencies and in private public and academic organizations both here and abroad The sponsor agencies specifically wanted to determine whether and how information gathered during POE processes could be used to help inform decisions made in the programming budgeting design construction and operation phases of facility acquisition in a useful and timely way To complete this study the FFC commissioned a set of papers by recognized experts in this field conducted a survey of selected federal agencies with POE programs and held a forum at the National Academy of Sciences on March 13 2001 to address these issues This report is the result of those efforts **Directions in Person-Environment Research and Practice (Routledge Revivals)** Jack Nasar,Wolfgang F. E. Preiser,2016-06-10 First published in 1999 this book presents a fresh and diverse set of perspectives representing key directions of research and practice in the field of environmental design research Leading researchers in various areas of person environment research such as privacy children s environment post occupancy evaluation environmental cognition environmental aesthetics crime prevention housing and environmental protection and environmental design present what they consider their best work The book argues for the value of a multi disciplinary and interdisciplinary approach to problem solving and outlines many important directions for methods research and practice **Architectural Programming and Predesign Manager** Robert Hershberger,2015-09-25 In this book first published in 1999 Hershberger presents architectural programming and predesign management in a clear detailed manner With numerous examples and illustrations from both his and his colleagues experience he shows the reader step by step how to use the techniques of architectural programming set values resolve issues apply tested methods and leverage skills when working with clients This title will be of interest to students of architecture **Toward the Integration of Theory, Methods, Research, and Utilization** Gary T. Moore,Robert W. Marans,2013-03-09 This fourth volume in the Advances in Environment Behavior and Design series continues the intent of earlier volumes by exploring new directions in the multidisciplinary environment

behavior EB or EBS field The series is organized around a framework of theory methods research and utilization that some say has defined the field for the past 15 years This fourth volume is devoted to chapters that explore the integration of theory quantitative and qualitative research and utilization in policy planning and architecture The authors selected for this volume exemplify the multidisciplinary character of the field they have been selected from architecture environmental psychology environmental studies housing research landscape architecture social anthropology social ecology urban design and urban planning from academe and practice and from Australia Europe and North America HISTORY OF THE ADVANCES SERIES The idea for the series emerged in 1983 at meetings of the Board of Directors of the Environmental Design Research Association EDRA Several publishers were contacted about the possibility of an EDRA Annual Review Eliot Werner at Plenum Press expressed great interest but suggested that an Advances series would be more appropriate since publication could be tied to a less specific timetable EDRA Plenum and the editors signed a contract in June 1984 for three volumes with an open door for oral agreements between Plenum and the editors after that time Four volumes have been published Volume 1 1987 Volume 2 1989 Volume 3 1991 and the current Volume 4 each containing 10 to 12 chapters

Environmental Policy, Assessment and Communication David Canter, Martin Krampen, David Stea, 2024-11-07 Originally published in 1988 reissued now with a new series introduction Environmental Policy Assessment and Communication was the second in a trilogy of books to open the series Ethnoscapes Current Challenges in the Environmental Social Sciences These three titles brought together specially commissioned contributions that cover much of the range of topics that the series as a whole would cover Although the following volumes would not have the same format the opening trilogy gave an overview of what was to come while also providing a broad base for the future authors to build upon This volume has a practical orientation Its contributions deal directly with research on those environmental matters on which government agencies and other organisations formulate policies or develop design strategies This therefore covers the assessment and evaluation of designs and design proposals as well as background research to policy issues

Applications of Environment-Behavior Research Paul D. Cherulnik, 1993-07-30 Describes thirteen cases in which architects city planners and designers used psychological theory and research to make their work more responsive to the needs of people

Post-Occupancy Evaluation (Routledge Revivals) Wolfgang F. E. Preiser, Edward White, Harvey Rabinowitz, 2015-07-24 Post occupancy evaluation focusing on buildings occupants and their needs provides insight into the consequences of past design decisions and forms a sound basis for creating better buildings in the future This book first published in 1988 includes a review of the evolution of the field a conceptual framework for POE and pragmatic information on planning conducting and reporting POEs Post Occupancy Evaluation categorizes the approaches to building evaluation by describing the three levels of POE effort indicative investigative and diagnostic each differing in terms of time resources and personnel needed In its scope Post Occupancy Evaluation is both comprehensive and specific professionals in

Enhancing Building Performance
Shauna Mallory-Hill,Wolfgang F. E. Preiser,Christopher G. Watson,2012-03-05 Building Performance Evaluation BPE informs and enhances the usability and sustainability of building designs with lessons learned from evaluation of building performance throughout the building life cycle from initial planning through occupancy to adaptive re use A key feature of BPE is that it examines design and technical performance of buildings alongside human performance criteria That is it seeks to examine facilities in order to determine whether they will work for the people that will use and occupy them Rigorous BPE helps to improve design practice by providing feedback on the effectiveness of the choices made about the building to ensure that its design is optimised for stakeholders uses The overarching theme for Enhancing Building Performance is to present the next generation of BPE work The book provides an updated systematic approach for BPE as well as chapters written by experts from around the world who demonstrate how to apply BPE to enhance building design Topics covered include evidence based and integrative design processes evaluation methods and tools and education and knowledge transfer In addition case studies provide specific examples of how BPE has been used to study such things as the impact of workplace design on human productivity and innovation Written primarily for design professionals and facility managers who wish to use BPE to deliver improved building performance that is responsive to the needs of stakeholders Enhancing Building Performance will also be of great value to researchers and students across a range of architecture and construction

disciplines **A System's Evaluation of Global History of Indian Architecture** Joy Sen, 2016-12-02 Deep within an inner cave guhahitam of our existence remains our potential Divinity It is the place where our reflected sentient being the First Bird is trying to probe into to recover the hidden sun The allegory is evident in the parable of the Cave once preached by the Upanishads and later by the Greek philosopher Plato The probe is to push forward the First Bird to surge higher in the resplendent celestial blue under the full radiance of the Solar world which is the Second resulting in an explosion of an infinite all pervading Divinity Till the union and the rapture is attained there are the two Birds one the psychic being which is within us and the other one which is the direct portion of the Divine The direct portion is constantly trying to guide and work within us so that evolution goes on and on In the words of Sri Aurobindo it is the haitya Purusha the direct portion of the Divine in the human which is working incessantly till the rapture is activated Ancient roots are evident in the ancient Swetaswatara Upanishad hailed by the primordial Sage Kapila and coded originally in a later text called the Bhagabat Purana The haitya Purusha is also the being that is behind the Chitta Sri Aurobindo says Millenniums later the inspired Architects in the most ancient of all Buddhist ages had carved out the sacred idea in form of rock cut expressions called the Chaitya hall As the Mahayana Sutra of the foremost Shurangama at the Crown of the Great Buddha says the way of practicing the Samadhi is not singular and its actual method of cultivation depends upon the functioning of mind and mental concomitants Citta Chaitya pravritti of each being and their interconnectedness Mahat It is in the recovery or a re tracing of the two as a DIVINITY that is originally ONE an individual s journey called evolution and a collective journey called civilization itself are sustained It is also from the deeper embedded patterns of this journey the gems of the system s foundation can be quarried

Computer Architecture Performance Evaluation Methods Lieven Eeckhout, 2022-05-31 Performance evaluation is at the foundation of computer architecture research and development Contemporary microprocessors are so complex that architects cannot design systems based on intuition and simple models only Adequate performance evaluation methods are absolutely crucial to steer the research and development process in the right direction However rigorous performance evaluation is non trivial as there are multiple aspects to performance evaluation such as picking workloads selecting an appropriate modeling or simulation approach running the model and interpreting the results using meaningful metrics Each of these aspects is equally important and a performance evaluation method that lacks rigor in any of these crucial aspects may lead to inaccurate performance data and may drive research and development in a wrong direction The goal of this book is to present an overview of the current state of the art in computer architecture performance evaluation with a special emphasis on methods for exploring processor architectures The book focuses on fundamental concepts and ideas for obtaining accurate performance data The book covers various topics in performance evaluation ranging from performance metrics to workload selection to various modeling approaches including mechanistic and empirical modeling And because simulation is by far the most prevalent modeling technique more than half the book s content is devoted to simulation The

book provides an overview of the simulation techniques in the computer designer's toolbox followed by various simulation acceleration techniques including sampled simulation statistical simulation parallel simulation and hardware accelerated simulation Table of Contents Introduction Performance Metrics Workload Design Analytical Performance Modeling Simulation Sampled Simulation Statistical Simulation Parallel Simulation and Hardware Acceleration Concluding Remarks

the nature of the field of environment behavior relations is interdisciplinary the collaboration of three persons of diverse professional backgrounds in writing this book is therefore not surprising This collaboration started in 1972 with the offering of a graduate seminar Environment Behavior and Design Evaluation at the University of Massachusetts Several research projects dealing with design evaluation which have been conducted at the University are also included as case studies in this book Chapter III the ELEMUR study and the Visitor Center study Two of the authors have worked as part of the instructional team in the seminar and all of the authors have participated in varying degrees in the ELEMUR Project The authors backgrounds in design psychology and landscape architecture suggest by example that professionals with diverse backgrounds but a common interest in environment behavior problems can indeed learn to communicate and to collaborate Since design evaluation is a new field and very little specific literature on the subject exists to date we hope this book fills a current need
