Evaluating Educational Interventions T. Chris Riley-Tillman, Matthew K. Burns, Stephen Kilgus, 2020-03-09 Introduction to design and analysis for educational intervention The nuts and bolts of single case design The classic A B A B design Complex single case designs Visual analysis and interpretation strategies for single case design Advanced empirical analyses of single case data in practice and research Brief experimental analysis Single case design for research purposes A response to intervention model incorporating experimental design **Evaluating Educational Outcomes** Leonora Loyola International Handbook of Educational Evaluation T. Kellaghan, D.L. Stufflebeam, 2012-12-06 Thomas Kellaghan Educational Research Centre St Patrick's College Dublin Ireland Daniel L Stufflebeam The Evaluation Center Western Michigan University Ml USA Lori A Wingate The Evaluation Center Western Michigan University Ml USA Educational evaluation encompasses a wide array of activities including student assessment measurement testing program evaluation school personnel evaluation school accreditation and curriculum evaluation It occurs at all levels of education systems from the individual student evaluations carried out by class room teachers to evaluations of schools and districts to district wide program evaluations to national assessments to cross national comparisons of student achievement As in any area of scholarship and practice the field is constantly evolving as a result of advances in theory methodology and technology increasing globalization emerging needs and pressures and cross fertilization from other disciplines The beginning of a new century would seem an appropriate time to provide a portrait of the current state of the theory and practice of educational evaluation across the globe It is the purpose of this handbook to attempt to do this to sketch the international landscape of educational evaluation its conceptual izations practice methodology and background and the functions it serves The book s 43 chapters grouped in 10 sections provide detailed accounts of major components of the educational evaluation enterprise Together they provide a panoramic view of an evolving field **Evaluating Educational Reforms** Peder Haug, Thomas A. Schwandt, 2003-06-01 A Scandinavian perspective on evaluating educational reforms The essays include The Research Council of Norway Evaluating Reform 97 Models of Evaluation and What's Being Done in the Name of Evaluation Experiences Drawn from the Recent Evaluation of Schooling Reforms in Switzerland **Methods of Evaluating Educational Technology** Walt Heinecke, Laura Blasi, 2001-09-01 This volume gathers some of the methods being developed by evaluators from university settings and the private sector While providing models and methods these authors also raise larger questions such as How can schools meet the challenge of educating all children without being limited by the educational legacy of a one size fits all curriculum and normative testing More than documenting an apprenticeship to gadgetry evaluators are seeking to measure meaningful learning and changes in teaching investigating approaches that are not possible or that are less accessible when students are in traditional classrooms without technology In this first volume of the series Research Methods for Educational Technology RMET the contributing authors draw upon examples of their work

evaluating the implementation and development of educational technology as well as the impact of policies and programs in this field Within this volume several authors have written about the implementation and evaluation of technology across cultures and national boundaries pointing to an area of research that will rapidly expand in this decade The concern for meeting the needs of policymakers is also apparent in several of these chapters but there is tension between providing them with positive results to support their efforts and reexamining the questions they are asking and how these questions are developed We know that evaluation is not the extended arm of public relations and yet it becomes clear that evaluators are often asked to demonstrate a project is successful on the threat that the funding will be cut While this decision making process fits the timetable of the fiscal year it does not acknowledge that evaluation can be formative and strengthen programs This timetable also ignores the investment of time that is needed when implementing innovations like the Internet into teaching and learning Many of the authors included in this volume write from the context of evaluating federally funded programs and they provide valuable insight for future projects which are created and evaluated at the state level As technology initiatives are developed and funded outside of the federal arena more evaluators will be called upon From approaches developed from federally funded projects we can build upon these methods and models for evaluation within regional projects to answer questions related to budgets and accountability As we answer these immediate questions we can move forward to examine the long term impact of technology and the possibility that exercises in conformity will replace the adventure of human enlightenment for our children **Evaluating Educational Programs and Products** Gary D. Borich, 1974 Abstract Prepared as a guide and handbook for planners developers and evaluators of educational programs and products practical insights are given on planning and executing effective evaluations. The evaluator's work is viewed as establishing perspective planning the evaluation and analyzing the data Procedures that are appropriate for each of these activities are identified for the reader The subject matter in this multiauthored book is divided into roles and contexts models and strategies and methods and techniques Contributors also depict today s standards for evaluation and project what those standards will be in the future **Evaluating Teaching** James H. Stronge, 2005-11-02 This invaluable resource demonstrates how to foster the development of highly qualified teachers through designing and implementing a solid teacher Evaluating Educational Technology Geneva D. Platt, 2005-07-20 This accessible resource presents program evaluation as a trouble free process that any educator can effectively complete to turn measurable results into meaningful outcomes International Handbook of Educational Evaluation T. Kellaghan, D.L. Stufflebeam, 2003 The International Handbook of Educational Evaluation is an invaluable and unique reference work for evaluation scholars and specialists educators policymakers graduate students in

evaluation and education administrators and other school personnel as well as personnel in funding organizations The Handbook addresses both theoretical and practical areas of educational evaluation provides up to date comprehensive coverage of core concepts methods and areas of application reflects the perspectives and experiences of leading evaluation scholars and practitioners from around the world brings together a large group of notable authors presenting diverse national contexts and presents in depth treatment of core concepts and best ideas on how to design and conduct sound evaluations in education **Evaluating Teaching and Learning** David Kember, Paul Ginns, 2012-03-12 Every semester colleges and universities ask students to complete innumerable course and teaching evaluation questionnaires to evaluate the learning and teaching in courses they have taken For many universities it is a requirement that all courses be evaluated every semester. The laudable rationale is that the feedback provided will enable instructors to improve their teaching and the curriculum thus enhancing the quality of student learning In spite of this there is little evidence that it does improve the quality of teaching and learning Ratings only improve if the instruments and the presentation of results are sufficiently diagnostic to identify potential improvements and there is effective counselling Evaluating Teaching and Learning explains how evaluation can be more effective in enhancing the quality of teaching and learning and introduces broader and more diverse forms of evaluation This guide explains how to develop questionnaires and protocols which are valid reliabile and diagnostic It also contains proven instruments that have undergone appropriate testing procedures together with a substantial item bank The book looks at the specific national frameworks for the evaluation of teaching in use in the USA UK and Australia It caters for diverse methodologies both quantitative and qualitative and offers solutions that allow evaluation at a wide range of levels from classrooms to programmes to departments and entire institutions With detail on all aspects of the main evaluation techniques and instruments the authors show how effective evaluation can make use of a variety of approaches and combine them into an effective project With a companion website which has listings of the questionnaires and item bank this book will be of interest to those concerned with organising and conducting evaluation in a college university faculty or department It will also appeal to those engaged in the scholarship of teaching and learning

Evaluating Teaching Practices in Graduate Programs Jesús Gabalán-Coello, Fredy Eduardo Vásquez-Rizo, Michel Laurier, 2019-12-19 This book proposes a method to evaluate the work of teachers acting in a very specific educational context graduate programs at higher education

institutions There are many publications on the field of measurement and evaluation of teaching practices but these studies are usually conducted at the undergraduate level and ignore the nuances of teaching practices at the graduate level Should professors demonstrate the same skills when they teach in undergraduate programs as they do when they teach in graduate programs Is it appropriate to use the same assessment tools both at the undergraduate and the graduate levels Do the teaching practices evolve the same way at the graduate and undergraduate levels The book intends to answer these questions by introducing a methodological approach to find the relevant variables that are the foundation of professional practices at the graduate level as determined by the scientific community and through the analysis of the stakeholders perceptions The proposed methodological approach combines quantitative and qualitative research techniques to identify and explain within a mixed method framework the most important factors that lead to teaching quality at graduate level Therefore How to Evaluate Teaching Practices in Graduate Practices will be a valuable resource for students university professors and educational administrators interested in quality assurance processes in higher education institutions

Empirical Methods for Evaluating Educational Interventions Gary D. Phye, Daniel H. Robinson, Joel Levin, 2005-04-22 New US government requirements state that federally funded grants and school programs must prove that they are based on scientifically proved improvements in teaching and learning All new grants must show they are based on scientifically sound research to be funded and budgets to schools must likewise show that they are based on scientifically sound research However the movement in education over the past several years has been toward qualitative rather than quantitative measures The new legislation comes at a time when researchers are ill trained to measure results or even to frame questions in an empirical way and when school administrators and teachers are no longer remember or were never trained to prove statistically that their programs are effective Experimental Methods for Evaluating Educational Interventions is a tutorial on what it means to frame a question in an empirical manner how one needs to test that a method works what statistics one uses to measure effectiveness and how to document these findings in a way so as to be compliant with new empirically based requirements The book is simplistic enough to be accessible to those teaching and administrative educational professionals long out of schooling but comprehensive and sophisticated enough to be of use to researchers who know experimental design and statistics but don't know how to use what they know to write acceptable grant proposals or to get governmental funding for their programs Provides an overview to interpreting empirical data in education Reviews data analysis techniques use and interpretation Discusses research on learning instruction and curriculum Explores importance of showing progress as well as cause and effect Identifies obstacles to applying research into practice Examines policy development for states nations and countries **Empirical Methods for Evaluating Educational Interventions** Gary D. Phye, Daniel H. Robinson, Joel Levin, 2005-03-07 Invaluable for all educators and teachers needing to write acceptable grant proposals or to obtain governmental funding for their programs **Developing and Evaluating Educational Programs for Students**
