Larson, Pauline Fitzpatrick, 2020-04-03 Create effective community based programs for substance abusers with HIV AIDS Substance abusers are the fastest growing population of people with HIV AIDS in the US and one of the hardest to reach and treat Evaluating HIV AIDS Treatment Programs offers new strategies for providing care for this vulnerable population The programs evaluated and discussed in this volume were funded as part of the DHHS Health Resources and Services Administration through its Special Projects of National Significance Program Collectively known as the SPNS Cooperative Agreement these 27 projects represent a diverse group of organizations with a common goal to improve the health quality of life and access to health care for traditionally underserved populations living with HIV AIDS Evaluating HIV AIDS Treatment Programs reports in detail the efforts of several community based HIV AIDS organizations in the SPNS program You will learn how these organizations provide high quality care for persons with HIV who are unlikely to obtain it in the traditional hospital based service system This volume offers specific proven strategies designed to overcome the linguistic cultural racial and economic barriers that make it difficult for some sick people to get the health care they need It also offers specialized medical care models that work within the context of a continuum of services in a medical clinic Evaluating HIV AIDS Treatment Programs also highlights other aspects of the Cooperative Agreement projects including a study of end stage AIDS care an overview of the HRSA HIV AIDS Bureau SPNS Cooperative Agreement grant initiative a study of conceptual issues in implementing program evaluation in real world community organizations discussion of the online Knowledge Base that summarizes and disseminates information from the Cooperative Agreement projects studies of ways to reach and care for specific populations with HIV AIDS including women Latinos Haitians adolescents and rural people This valuable volume offers solid data on treating people who are all too often neglected by the medical community even before they contract HIV AIDS The programs and ideas presented in Evaluating HIV AIDS Treatment Programs can be applied to other community based health initiatives and clinics offering medical care to underserved and vulnerable populations This essential resource deserves a permanent place on their bookshelf of any physician administrator or policymaker working in the fields of HIV/AIDS epidemiology public health or substance abuse Visit the book's website at http://www.TheMeasurementGroup.com/drugs_and_society.htm

The Next Generation of AIDS

Patients George J Huba, Vivian Brown, 2014-01-27 Go beyond traditional medical care to treat the whole person In the past ten years the treatment and epidemiology of AIDS have changed and HIV AIDS services must also change The Next Generation of AIDS Patients suggests new ways to find and care for persons living with AIDS not just by offering traditional medical treatment but by delivering needed support services as well This landmark book defines the startling shift in demographics of this phase of the epidemic The new AIDS patients have different problems than the white gay men who were strongly affected in the early days of the disease some are substance abusers or sex workers or their partners and many have children Clients who are homeless poorly educated not native English speakers or uninsured have overwhelming social support needs and need extra help to obtain their medical requirements The Next Generation of AIDS Patients offers detailed analyses to help you determine clients needs and vulnerability levels so you can provide complete biopsychosocial services In addition the original empirical research in this book reveals which programs deliver the best outcomes for various client populations The Next Generation of AIDS Patients supplies you with an effective data modeling approach for determining levels of vulnerability and need and discusses such vital issues as identifying and overcoming barriers to HIV care engaging and retaining in care individuals with high levels of unmet need delivering services to diverse minority populations substance abusers homeless people and those who live in rural areas client satisfaction in community service organizations In order to develop successful community based health care and support services medical and social work professionals must take the new face of this disease into account The Next Generation of AIDS Patients offers practical advice readily applicable theory and proven strategies for caring for people living with AIDS Frameworks for Advanced Nursing Practice and Research
Rose Utley, Kristina Henry, Lucretia Smith, 2017-10-28 Uniquely organized to help readers find and select the best frameworks for their needs This resource illuminates the daunting task of understanding and applying philosophies models theories and taxonomies in nursing practice and research at the masters or doctoral level Distinguished by a unique organizational structure the text is divided into two broad areas of practice focus individuals and families Part II and communities populations and systems Part III The frameworks in each area are organized conceptually into 17 chapters many of which are interdisciplinary thus not commonly found in nursing theory texts This unique organizational structure enables readers to acquire both a broad overview of frameworks useful in nursing practice and research and to focus on frameworks relevant to specific practice areas and concepts of interest Frameworks for Advanced Nursing Practice and Research also provides foundational knowledge to enhance the nurse s understanding and appreciation of frameworks used in practice and research Part 1 Application is woven throughout the text and culminates with chapters devoted to the application of frameworks for nurse educators clinicians leaders and researchers Learner focused features of the text include application boxes highlighting published studies that have employed selected frameworks thereby bringing theoretical content into practice Each chapter also includes objectives key terms and a bulleted summary to enhance the learning experience Key Features

Describes a broad spectrum of philosophies models theories and taxonomies underpinning graduate level nursing roles
Uniquely organized by conceptual areas thereby integrating nursing and non nursing frameworks Facilitates easy
comparison of frameworks within each conceptual area Delivers strategies for using theory and discusses integration of
theory research and practice Includes application boxes highlighting published studies objectives key terms and bulleted

Research: Spearheading the Use of Innovative Technologies and Methodologies Takatoki Yamamoto,Ayae Honda,Toshinori

Sato,Akihide Ryo,2017-07-06 Infectious diseases are associated with approximately 20% of global mortality with viral
diseases causing about one third of these deaths Besides newly emerging and re emerging viral infections will continue to
pose a threat to human survival globally In this case scientific advances have greatly been increased to defend against those
pathogens For example rapid genomic sequencing proteomics epigenomics nanotechnology and other advanced tools are
being applied to detect viruses at the point of care and to track their spread within human populations as well as to
understand virus host interaction and virus induced pathogenesis From rapid identification of new viruses to prevention with
vaccination and treatment with effective therapeutics biomedical research has continuously provided tools to meet the
constant threat of emerging viral pathogens Despite these advances each new disease brings unique challenges to scientists
every year So we must stay at the cutting edge of scientific discovery working energetically to develop new tools to combat
the ever changing threats they pose Our research topic highlights such advanced and new technology based virus research

which definitely bolsters the researcher's ability to tackle emerging re-emerging and stable viral pathogens. We are credulous that the papers including in the e-books will be beneficial to the experts in the field to understand the molecular immunological ecological and clinical aspects of the next generation researches for the prevention and control of infectious diseases caused by viruses.

Addiction Research and Evaluation Catherine Comiskey, 2024-09-12 According to the United Nations Office of Drugs and Crime around 284 million people aged between 15 and 64 years used drugs in the year 2020. In addition, it is estimated that over 11 million people were injecting drugs and half of these were living with hepatitis C. Young people are using more drugs than previously and numbers have increased over the past decade. While numbers are estimated at a global level, there remains little evidence for practitioners and policy makers on key questions such as how many people are using drugs that are hidden and haven't contacted services. Questions include the challenging topics of providing safe injecting spaces and drug consumption rooms. As populations age in some regions, questions arise on the nature of substance use among older people. Countries with younger populations are concerned about estimates on the numbers of children potentially impacted by parental substance use and how to engage with them. Awareness of trauma-informed services is increasing and questions arise on the impact of domestic abuse or adverse childhood experiences on people who use drugs and their families. Globally, there is a growing concern on how to inform the debate on cannabis policies and how to assess if the chosen policy will be acceptable to the general population. The aim of this book is to provide researchers, service providers and policy makers with a step-by-step guide to robust methodologies and illustrative case studies to address these challenges. The objective of each chapter is to answer a key question, provide a summary of the background evidence, demonstrate through a series of logical steps how to obtain national or local evidence and finally illustrate the process with detailed real-life case studies. As addiction is encountered across a wide range of professions and civil society organizations, this book will be an essential textbook for graduate students of medicine, nursing, public health, addiction psychology and health and social care professions. It will be a guiding reference book for international, national and local commissioners and providers of related policies and services. At a local level, the step-by-step case studies will provide an easy-to-follow framework for those wishing to apply the methods to benefit and improve their own practice, service or policy.
