Evaluating, Improving, and Judging Faculty Performance in Two-Year Colleges Charles Finley, Richard I. Miller, Candace S. Vancko, 2000-03-30 With nearly 48 percent of all U S undergraduates attending community and technical colleges the two year sector is an integral part of our nation s higher education system and a vital part of our nation s future The need for effective faculty evaluation and professional development within two year colleges stems partly from the size of this sector and also from the diversity of its program offerings and its student body Miller and his co authors bring timely authoritative and practical material to two audiences in this rapidly growing field of education first teachers who have permanent appointments but could use professional development and improvement and second the already large and still growing number of part time instructors who could use more evaluating and improving This book is intended to be a direct assistance for these groups as well as to administrators who must make personal decisions This professional book is for human resource managers and staff development officers of two year colleges A greater emphasis needs to be placed on human resource management according to Miller and his co authors that will result in better personnel decision making
