

# WHAT IS PSYCHO-EDUCATIONAL ASSESSMENT EXACTLY?

*Jordan is in the 3rd grade. He is struggling academically. He appears to be bright, but clearly isn't reaching his potential. On the surface the symptoms include a lack of focus and understanding, and a general lack of interest, but his mom is unsure why. While the problem goes unidentified, Jordan is losing confidence. He's feeling inferior, so why try?*

**Psychological assessment** provides a comprehensive picture of how a person thinks and feels. Understanding how a child learns best entails understanding the child.

- Is Jordan following the main idea of the lesson or getting caught up in details?
- Is Jordan using study strategies that work best for him?
- Are social or emotional factors distracting him?

**Educational assessment** provides detailed information regarding how a person performs on academic tasks. Understanding academic strengths and weaknesses is the key to providing personalized instruction.

- Is Jordan reading material but not really comprehending it?
- Does Jordan seem to know his math facts but doesn't do well when there is a time constraint?
- Is Jordan only writing a minimal amount instead of elaborating on his ideas?

**Psycho-educational assessment** provides a complete picture and helps drive the most appropriate interventions. Jordan may just need some helpful organizational tools, or he may need to learn some stress-reduction strategies, or he may require academic accommodations. Don't guess. Psycho-educational assessment provides answers and direction.

**PSYCHOLOGICAL ASSESSMENT + EDUCATIONAL ASSESSMENT = PSYCHO-EDUCATIONAL ASSESSMENT**

*Readings in Measurement and Evaluation* Norman Edward Gronlund, 1968     Academic Assessment and Intervention Steven Little, Angeleque Akin-Little, 2014-01-21 Serving students with academic deficiencies necessitates communication and collaboration among professionals from several disciplines. Academic Assessment and Intervention brings together divergent approaches in order to demonstrate that scientific evidence rather than biases or previous practice must determine assessment practices that are selected and used for particular purposes. Similar to a handbook in its comprehensive topical coverage, this edited collection provides a contextual foundation for academic assessment and intervention, describes both norm-referenced and curriculum-based assessment measurement in detail, considers the implications of both of these assessments on ethnically diverse populations, provides a clear link between assessment evidence-based interventions and the RTI model, and considers other important topics related to this area such as teacher behavior. Intended primarily for graduate-level courses in education, school psychology, or child clinical psychology, it will also be of interest to practicing professionals in these fields.

Topics include test reliability and validity, meaning and application of the norms, extraneous factors that influence performance of cognitive tests, the development of educational measures, and more. Teachers, principals, and counselors.

**Validity in Educational and Psychological Assessment** Paul Newton, Stuart Shaw, 2014-04-15 Validity is the hallmark of quality for educational and psychological measurement. But what does quality mean in this context? And to what exactly does the concept of validity apply? These apparently innocuous questions parachute the unwary inquirer into a minefield of tricky ideas. This book guides you

through this minefield investigating how the concept of validity has evolved from the nineteenth century to the present day Communicating complicated concepts straightforwardly the authors answer questions like What does validity mean What does it mean to validate How many different kinds of validity are there When does validation begin and end Is reliability a part of validity or distinct from it This book will be of interest to anyone with a professional or academic interest in evaluating the quality of educational or psychological assessments measurements and diagnoses      *Measurement and Evaluation in Psychology and Education* George K.
