

# Types of Evaluation Research

- outcome evaluations investigate whether the program or technology caused demonstrable effects on specifically defined target outcomes
- impact evaluation is broader and assesses the overall or net effects -- intended or unintended -- of the program or technology *as a whole*
  - *i.e. – it did this, but it also did that*
- cost-effectiveness and cost-benefit analysis address questions of efficiency by standardizing outcomes in terms of
  - dollar costs and values
  - “social costs” – we reduced hospitalizations but increased incarcerations
  - “opportunity costs” – because we did “A” we couldn’t do “B”
- secondary analysis reexamines existing data to address new questions or use methods not previously employed –
  - can be used to do all of the above relatively inexpensively

**Qualitative Data Analysis** Matthew B. Miles,A. Michael Huberman,Johnny Saldana,2013-04-05 The Third Edition of Miles Huberman s classic research methods text is updated and streamlined by Johnny Salda a author of The Coding Manual for Qualitative Researchers Several of the data display strategies from previous editions are now presented in re envisioned and reorganized formats to enhance reader accessibility and comprehension The Third Edition s presentation of the fundamentals of research design and data management is followed by five distinct methods of analysis exploring describing ordering explaining and predicting Miles and Huberman s original research studies are profiled and accompanied with new examples from Salda a s recent qualitative work The book s most celebrated chapter Drawing and Verifying Conclusions is

retained and revised and the chapter on report writing has been greatly expanded and is now called Writing About Qualitative Research Comprehensive and authoritative Qualitative Data Analysis has been elegantly revised for a new generation of qualitative researchers      Program Evaluation for Social Workers Richard M. Grinnell, Peter Gabor (Sociologist), Yvonne A. Unrau, 2016 First published in 1994 this text is designed to be used by graduate level social work students in courses on evaluation and program design Over the course of 20 years and 6 editions the goals of the book have remained the same to prepare students to participate in evaluative activities within their organizations to prepare students to become critical producers and consumers of professional evaluative literature and to prepare students for more advanced evaluation courses and texts Grinnell Gabor and Unrau aim to meet these objectives by presenting a unique approach that is realistic practical applied and user friendly While a majority of textbooks focus on program level evaluation some recent books present case level evaluation methods but rely on inferentially powerful but difficult to implement experimental baseline designs This text assumes that neither of these approaches adequately reflects the realities of the field or the needs of students and beginning practitioners Instead Program Evaluation for Social Workers offers a blend of the two that demonstrates how they can complement one another The integration of case level and program level approaches provides an accessible adaptable and realistic framework for students to more easily grasp and implement in the real world      **Mixed Methods in Social Inquiry** Jennifer C. Greene, 2007-10-26 This is an excellent addition to the literature of integrated methodology The author has skillfully integrated diverse ways of thinking about mixed methods into a comprehensive and meaningful framework By providing detailed examples she makes it easy for both the students and the practitioners to understand the intricate details and complexities of doing mixed methods research On the other hand by comparing contrasting and bridging multiple perspectives about mixed methods she has made this book very relevant and useful to seasoned scholars of mixed methodology Abbas Tashakkori Frost Professor and coordinator educational research and evaluation methodology Department of Educational and Psychological Studies Florida International University founding coeditor Journal of Mixed Methods Research      RealWorld Evaluation Michael Bamberger, Jim Rugh, Linda Mabry, 2011-11-29 This book addresses the challenges of conducting program evaluations in real world contexts where evaluators and the agencies face budget and time constraints and where critical data is missing The book is organized around a seven step model developed by the authors which has been tested and refined in workshops Vignettes and case studies representing evaluations from a variety of geographic regions and sectors demonstrate adaptive possibilities for small projects with budgets of a few thousand dollars to large scale long term evaluations The text incorporates quantitative qualitative and mixed method designs and this Second Edition reflects important developments in the field over the last five years      **Research Methodology in Social Science** Krishan Kumar Singh, 2022-01-15 Research Methodology in Social Science Research Methodology in Social Sciences is of great importance in disciplines and interested people on searching

various knowledge or solution to a phenomenon The main purpose of the book is to share scholarly knowledge about research and its complexity This book can be used to train the basics and techniques involved on doing inquiries from different views The experience shows that no single cure for all diseases So when comes to research there is no single research methodology or technique which fits all circum stances Hence the book tries to identify a family of approaches towards various research situations and distinguish their outcomes
