Evaluation of the NJROTC Multimedia Instructional System Phillip D. Devin, Abby Eisenshtat Robyn, 1997 This study discusses a computer based multimedia instructional system The system is being used by the Navy Junior Reserve Officers Training Corps unit at Sanger High School in California where it was developed and at other high schools *Evaluation of the NJROTC Multimedia Instructional System* ,1997 The Navy Junior Reserve Officers Training Corps NJROTC provides academic instruction and leadership training to high school students Approximately ten years ago a computer based multimedia instructional system was developed in the NJROTC unit at Sanger High School in California Over the years the system has been refined and it has been installed at other schools Before determining whether to expand the use of the system to additional NJROTC locations the Office of the Chief of Naval Education and Training CNET asked RAND s National Defense Research Institute NDRI to evaluate it This study was conducted at two high schools It is an exploratory study in that pre existing groups were used instead of randomly assigned groups and tests were not conducted to determine whether the students instructors and environmental factors at those schools are typical of NJROTC units Consequently the findings are informative but they should not be generalized to other locations We found that students who used the system made greater academic progress than their peers who received traditional methods of instruction During focus groups students reported that classes using the system were better organized and more compelling than traditional classes Instructors reported that the system reduced their workload and facilitated their ability to enhance the course This study suggests explanations for the apparent efficacy of the system It also discusses the potential for extending the system beyond its current applications
