McKell,2012-12-02 The Biology and Utilization of Shrubs brings together the wide range of information about shrubs from many disciplines and world locations The book is organized into seven parts Part I describes the major shrublands found on each of the vegetated continents It provides an overview of the dominant shrubland types as well as the associated features of soil and climate that influence the geographic distribution of major shrub species Part II discusses environmental influences and plant responses Part III considers the range of genetic diversity for important traits and how these may vary in different habitats Part IV discusses the effects of stress on physiological processes of shrubs and the kinds of strategies shrubs employ to meet physiological stress Part V offers evidence to support the claim that the many virtues of shrubs provide a basis for sustaining shrub use for livestock fodder wildlife habitat reclamation and erosion control fuel and naturalized landscaping Part VI outlines methods for collecting and processing seeds from natural stands or from superior genotypes planted in seed production orchards Part VII describes cultural adaptation to shrub use in a livestock dominated primitive culture followed by a detailed economic analysis of establishing shrub plantations to improve livestock production

**Browse in Africa** ,      *The Geography of Iraq* Salih Muhammad Awadh,Moutaz Al-Dabbas,2024-10-14 Human civilization first emerged in ancient Mesopotamia where the first writing and the first technologies originated Writing about Mesopotamia the Cradle of Civilization the land between the rivers the Tigris and Euphrates Rivers modern day Iraq is interesting for all interesting readers in the world Iraq is one of the most beautiful diverse and impressive countries in the world Iraq has a diverse range of environments landscapes inhabitants activities and cultural heritage and human civilization

has a lot to offer An extensive collection of original materials gathered over the past few decades was used to elaborate on the geography of Iraq in a novel length book The geography of Iraq includes detailed information on its physical human economic historical and environments Readers students and teachers from all over the world who seek out this information will be satisfied with the various figures maps and photographs due to the extra value added Vegetation Ecology of Socotra Gary Brown, Bruno Mies, 2012-05-22 Although the unique flora of the Socotra Archipelago with its high degree of endemism has received much attention recently little information is available on the vegetation and related ecological aspects Based on their extensive field experience of the region the authors have assimilated a vast amount of knowledge to produce this book which gives a detailed insight into the plant ecology of Socotra designated as a World Heritage Site by UNESCO in 2008 The book is divided into seven chapters After a brief introduction and overviews of important abiotic features various aspects of the vascular flora are presented in Chapter 4 together with accounts of the bryophyte and lichen flora Ecology and adaptive strategies of the plants are dealt with in Chapter 5 and Chapter 6 gives a concise description of the main vegetation units Finally important management issues of the vegetation are discussed an essential topic to ensure preservation of the natural heritage of the archipelago **Seed Development and Germination** Jaime Kigel, 2017-11-01 This text is intended for plant physiologists molecular biologists biochemists biotechnologists geneticists horticulturalists agronomists and botanists and upper level undergraduate and graduate students in these disciplines It integrates advances in the diverse and rapidly expanding field of seed science from ecological and demographic aspects of seed production dispersal and germination to the molecular biology of seed development The book offers a broad multidisciplinary approach that covers both theoretical and applied knowledge **Rangelands of the Arid and Semi-arid Zones in Uzbekistan** Gustave Gintzburger, 2003 This abundantly illustrated book presents a panorama of the biodiversity climatology and flora of the arid zones of Uzbekistan and describes around 150 dominant range species with their ecology utilization and range rehabilitation techniques It should contribute to a better understanding of these little known arid zones of Central Asia and to the conservation and rational use of their fragile natural resources **Environmental Consequences of War and Aftermath** Tarek A. Kassim, Damià Barceló, 2009-04-07 and used in munitions Rather the requirements for the agent s military effects took precedence In addition the interaction among the political technical and legal challenges connected with the known or possible risks posed by CW agents is complex and sometimes not well understood This is usually because technical considerations when acted on are almost invariably informed by political ones such as various legal requirements The book contains nine chapters covering different aspects of the research on environmental consequences of war and its aftermath and covers in one additional chapter more general issues such as prevention of war and its environmental consequences the legal political and technical background to selected environmental and human health effects of CW agents and the atmospheric transport and deposition of persistent organic pollutants under warfare conditions to more specific ones

related to two main tragic examples the war in the Balkans and the Gulf War Aspects of the war in the Balkans cover contamination by heavy metals in Serbian national parks the impact of NATO strikes on the Danube river basin and the problems associated with transuranium elements The Gulf War in Kuwait covers other problems related to the impact of oil contamination the impact on groundwater resources and the soil damage of ground fortifications among other environmental and health problems

**Euphrates and Tigris, Mesopotamian Ecology and Destiny** J. Rzóśka, 2012-12-06 Scope and limitations of this book I am trying here to present the natural history of a land largely created and dominated by two great rivers the Euphrates and Tigris All rivers have two main functions quite different from lakes they transport water and eroded material sometimes over large distances The astute Greeks who penetrated here in the 4th century B C called the land Mesopotamia an apt name it is the only region in the Near East except Egypt having the benefit of large rivers Another name coined in antiquity was Fertile Crescent stretching from Egypt to present day Iraq Herodotus marvelled at the fertility of the soils the abundance of water and the magnificent cities of Mesopotamia Thus a further role of some great rivers is recognized as foci of human development The desire to collate this book arose from a similar motif as in the Nile book 1976 the intricate connection between man and rivers

**Rivers of the Sultan** Faisal H. Husain, 2021-03-05 In the early sixteenth century a series of military campaigns between the Mediterranean Sea and Persian Gulf brought the entirety of the Tigris and Euphrates rivers under Ottoman control This book offers a history of this rare political unification of the longest rivers in West Asia and its impact on the Ottoman state provincial society and the environment

**Handbook of Plant Palaeoecology (First edition 2012)** René T. J. Cappers, Reinder Neef, 2012-01-06 Plant palaeoecologists use data from plant fossils and plant microfossils to reconstruct ecosystems of the past This book deals with the study of microfossil plant material retrieved from archaeological excavations and cores dated to the Late Glacial and Holocene One of the main objectives of this book is to describe the processes that underlie the formation of the archaeobotanical archive and the ultimate composition of the archaeobotanical records being the data that are sampled and identified from this immense archive Our understanding of these processes benefits from a knowledge of plant ecology and traditional agricultural practices and food processing This handbook summarizes the basic ecological principles that relate to the reconstruction of former vegetations and of agricultural practices in particular We hope this book will help palaeobotanists environmental archaeologists and colleagues from related disciplines optimize inferences based on what we could term old style archaeobotany And we hope that our observations will serve as an eye opener and improve future research not only as it is practised in our laboratories but also as it is practised in the field

**Remote Sensing in Soil Science** M.A. Mulders, 1987-05-01 This book provides comprehensive coverage of remote sensing techniques and their application in soil science A clear step by step approach to the various aspects ensures that the reader will gain a good grasp of the subject so that he can apply the techniques to his own field of study The book opens with a thorough introduction to the physical

aspects of electromagnetic radiation and the technical aspects of remote sensing and image processing This is followed by a discussion of the methods for interpreting remote sensing data and their application to soils vegetation and land as a whole As the interpretation of soil conditions is based on many aspects i e soil surface vegetation land use land form the scope of the book is correspondingly broad It will therefore provide much useful information for students and scientists in soil science geography geology hydrology ecology agriculture and civil engineering Halophytes and Biosaline Agriculture

Henk Breman, Jan-Joost Kessler, 2012-12-06 This book provides a quantitative analysis of the role of woody plants in semi arid regions for the assessment of their benefits in agrosylvopastoral land use systems with productive and sustainability objectives The insights presented and conclusions drawn allow the additional benefits of woody plants for specific climatic and physical site conditions and land use systems to be estimated The Sahel and Sudan zones in West Africa on which the book focusses represent resource poor conditions whose ecological dynamics have been relatively well studied The role of woody plants in this region as assessed in this book is extrapolated to other semi arid regions leading to general

conclusions on agroforestry's potential as an option for sustainable land use in semi arid regions The origins of this book go back to 1982 when the Club du Sahel requested that available data on woody plants in the Sahel region be synthesised to provide basic information to enable better attention to be given to woody plants in rural development programmes We are grateful to the Club du Sahel for this challenge Various people contributed to studies used in this book The preliminary inventory of the data available was made by Frits Ohler later his work was continued by Franciska Dekker **Range**
