Ecology Of Loch Lomond:

The Ecology of Loch Lomond Kevin J. Murphy, M.C.M Beveridge, R. Tippet, 2012-12-06 Loch Lomond has long held a special place in the hearts of all the people of Scotland not only for its historic significance but also for the beauty of its countryside Less widely known is the ecological importance of the area It is the largest stretch of freshwater in Britain and the only loch to be crossed by the Highland Boundary Fault one of the country's most important geological features The University of Glasgow has recognized the importance of this loch situated so near the main campus and has operated a field station on its shores since 1948 In the mid 1960s the field station was re established at Rowardennan as an all year round facility with laboratory and living accommodation for resident research workers and visiting field courses In 1992 a symposium was held to celebrate the 25th anniversary of the opening of the new station and this volume presents the proceedings of that symposium and gives the state of the present knowledge of Loch Lomond After an introduction to Loch Lomond the papers are divided into three sections Section I The physical and chemical environment of Loch Lomond and its catchment Section II The biology and ecology of Loch Lomond and its catchment and Section III Issues affecting Loch Lomond and its catchment

The Ecology of Scotland's Largest Lochs Peter S. Maitland, 2012-12-06 Scotland is fortunate in being very richly endowed with natural fresh waters in the form of numerous lochs and rivers These constitute on the one hand an attractive feature of the landscape and on the other a major resource for industry and recreation Thus there are about 3800 lochs over 4 ha in area and these form approximately 1.0% of the total surface area of Scotland Comparable figures for England and Wales are 1700 lakes and 0.05% of the land surface and in terms of volume Loch Ness contains more water than all the lakes and reservoirs in England and Wales put together Smith Lyle 1979 Many of the Scottish lochs are large and clean and consequently are particularly valuable in resource terms The decision as to which are actually the largest lochs is debatable particularly when the main criteria of greatest surface area length volume and depth each gives a different water Lochs Lomond Awe Ness and Morar respectively These four then are certainly among the largest lochs in the country but close to them in size come several other large waters among which is Loch Shiel which is exceeded in length only by Lochs Awe Ness and Lomond These five very large lochs Frontis piece form the group of waters selected for the comparative studies described in this volume

Dorothy Wordsworth's Ecology Kenneth Cervelli,2007-02-27 Dorothy Wordsworth has a unique place in literary studies Notoriously self effacing she assiduously eschewed publication yet in her lifetime her journals inspired William to write some of his best known poems Memorably depicting daily life in a particular environment most famously Grasmere these journals have proven especially

useful for readers wanting a more intimate glimpse of arguably the most important poet of the Romantic period With the rise of women s studies in the 1980s however came a shift in critical perspective Scholars such as Margaret Homans and Susan Levin reevaluated Dorothy s work on its own terms as well as in relation to other female writers of the eighteenth and nineteenth centuries Part of a larger shift in the academy feminist oriented analyses of Dorothy s writings take their place alongside other critical approaches emerging in the 1980s and into the next decade One such approach ecocriticism closely parallels Dorothy s changing critical fortunes in the mid to late 1980s Curiously however the major ecocritical investigations of the Romantic period all but ignore Dorothy s work while at the same time emphasizing the relationship between ecocriticism and feminism The present study situates Dorothy in an ongoing ecocritical dialogue through an analysis of her prose and poetry in relation to the environments that inspired it *Animal Ecology* Royal Norton Chapman,1926
