*European Citizenship Practice* Antje Wiener, 2018-02-19 Although great efforts have been made to understand citizenship it has remained a contested concept largely because of the problem of the changing relationship between citizens and their community of membership or belonging The European Union poses the most recent and dramatic change to this definition of citizenship Arguing that citizenship must be explored from a perspective that takes this continual change into account Antje Wiener develops the concept of citizenship practice the process of policymaking and or political participation which contributes to creating the terms of citizenship The approach draws on both comparative social historical literature on the state and the new historical institutionalism in European integration theories *European Citizenship Practice* advances a discursive analysis of citizenship practice based on these related bodies of literature which lie at the heart of this important contribution to citizenship studies      The European Union as a Global Actor Charlotte Bretherton, John Vogler, 2002-06 This book examines the emergence role and future of the EU as an actor in world politics The core areas of European foreign policy are analysed both theoretically and empirically This fully updated new edition explains and analyses the latest theoretical developments      **Back To Europe** Karen Henderson, 2005-10-09 As The European Union Opens Negotiations On Membership With Five Of The Ten post communist states who have applied this book looks at some of the challenges presented by Eastern enlargement not only to existing member states and European institutions but also to the Central and Eastern European countries themselves The approach is interdisciplinary and brings together contributions from academic specialists on security and international relations European institutions the economics of European integration and the domestic politics of Central and Eastern Europe The book has been structured to provide a clear and comprehensive introduction to the topic for students taking a range of courses including European integration the politics of post communist democracies and Europe's post Cold war order At the same time it will be accessible to more general readers with an interest in European Union affairs while presenting research to specialists in the area      The Transformation of Europe Miguel Poiars Maduro, Marlene Wind, 2017-09-28 This collection of essays considers the extent to which Joseph Weiler's thinking on the nature of European law holds today      European Security Bjørn Møller, 2016-04-22 Europe has undergone quite profound changes since the end of the Cold War Having been a highly militarised conflict ridden and war ridden region the core of Europe today constitutes a security community where armed conflicts among the constituent states has become inconceivable This comprehensive book offers a theoretically founded and thoroughly documented analysis of European

security with a special emphasis on the role played by the United Nations and the various regional and sub regional organisations especially the North Atlantic Treaty Organisation the Organisation for Security and Cooperation in Europe the Council of Europe and the European Union When it comes to explaining peace in Europe opinions differ widely Some argue that it was only because the West refused to give in to Soviet threats that the latter eventually gave up or that the long peace in Europe was due to the combination of a bipolar alliance structure pitting the North Atlantic Treaty Organisation NATO against the Warsaw Pact with the presence of nuclear weapons on both sides Others point instead to the extraordinarily dense network of international institutions and organisations in Europe offering a wide panoply of fora in which to handle disputes peacefully or to the web of interdependence in economic and other affairs tying together all states in Europe in relations which militate strongly against war Still others believe that the external peace between the states in Europe is simply a reflection of a convergence of cultures democracies with marked economies that are open towards the world market These questions are the focal point of this book which concentrates on security albeit not in the sense of being a treatise on military matters but security obtainable by much more indirect and non military means It will be required reading for all students and scholars of European security and the organisations which underpin it      *Negotiating Flexibility in the European Union* A. Stubb, 2002-04-15 Alexander Stubb a participant in the 1996 97 and 2000 Intergovernmental Conferences analyzes the evolution of flexible integration from the early 1970s to the present day and beyond He focuses in the process of negotiations which led to the institutionalisation of flexibility in the Amsterdam and Nice Treaties This book provides a valuable insider's view on historical decisionmaking in the European Union      **New Environmental Policy Instruments in the European Union** Ian Bailey, 2017-07-05 The use of legislation by EU governments to define environmental standards for industry has been criticised for its poor track record in arresting the decline in the quality of Europe's environment Environmental economists in particular have proposed that legislation should be supplemented or replaced by New Environmental Policy Instruments NEPIs such as eco taxes environmental charges tradable permits and voluntary agreements This book focuses on practical experiences with NEPIs in the EU and tests their application using the case study of the Packaging and Packaging Waste Directive It traces the ways in which member states have adapted NEPIs to suit their preferred styles of environmental policy then assesses their performance and how NEPIs have both assisted and hindered the EU environmental programme It suggests options for ensuring that the environmental programme does not become fragmented by the use of NEPIs and discusses the implications of EU enlargement      *Federalism and the European Union* Michael Burgess, 2002-09-11 A revisionist interpretation of the post war evolution of European integration and the European Union EU this book reappraises and reassesses conventional explanations of European integration It adopts a federalist approach which supplements state based arguments with federal political ideas influences and strategies By exploring the philosophical and historical origins of federal ideas and tracing their influence throughout the whole of the EU's evolution the

book makes a significant contribution to the scholarly debate about the nature and development of the EU The book looks at federal ideas stretching back to the sixteenth century and demonstrates their fundamental continuity to contemporary European integration It situates these ideas in the broad context of post war western Europe and underlines their practical relevance in the activities of Jean Monnet and Altiero Spinelli Post war empirical developments are explored from a federalist perspective revealing an enduring persistence of federal ideas which have been either ignored or overlooked in conventional interpretations The book challenges traditional conceptions of the post war and contemporary evolution of the EU to reassert and reinstate federalism in theory and practice at the very core of European integration      **Leadership in Disguise** Remco

Vahl, 2018-10-26 First published in 1997 this volume is situated within a general discussion in which the European Commission is the subject of much myth and speculation While the political debate on its role in EC decision making continues there is still little consensus among academics on the basic nature of the institution is the Commission an independent supranational body or is it dominated by intergovernmental influences Leadership in Disguise enters this general discussion by providing an original empirical analysis of the Commission's role during the Uruguay Round of trade negotiations 1986-93 Focusing on the controversial agricultural issue the book sets out to discover how decisions were made within the European Community This is a systematic and thorough study of how the Commission can play a leading role in Community decision making and will appeal to policy makers students and all those seeking an insight into the Commission's role and EC decision making      The Role of Small States in the European Union Baldur Thorhallsson, 2017-03-02 A fully documented text which addresses a key issue of EU decision making which is surfacing again in proposed institutional reforms It looks at the role of smaller states deals with the important criteria of distribution and redistribution of EU budgetary expenditures in the key areas of agriculture and structural funds and explains how smaller states promote their interest more effectively than larger states It focuses on the administrations of small states their relations with the Commission and their negotiation tactics in the Council This is the first attempt to empirically test Peter Katzenstein's thesis on the role of smaller states in international relations by making important recommendations on how the core assumptions of Katzenstein need to be modified especially when applied to the EU context This work is a good supplementary text book for courses on European studies comparative politics and international relations It is particularly suitable for advanced undergraduates and graduate students      **Autonomous Policy Making By International Organisations** Bob

Reinalda, Bertjan Verbeek, 2003-12-16 This volume assesses the importance of international organisations in global governance during the last ten years The prestigious team of international contributors seek to determine the ways in which IOs contribute to the solution of global problems by influencing international decision making in ways that go beyond the lowest common denominator of national interests      **Understanding the European Union's External Relations** Michèle Knodt, Sebastiaan Princen, 2003-09-02 The European Union is one of the world's biggest economies However its role as an

international actor is ambiguous and it's not always able to transform its political power into effective external policies. The development of an assertive European Union challenges the image of an internal project aimed at economic integration and international relations theories based on unitary state actors. This book systematically links the EU's external relations to existing political theories showing how existing theories need to be modified in order to deal with specific characteristics of the EU as an international actor.

**Decision-Making in the European Union** John Peterson, Elizabeth

Bomberg, 1999-05-25 Based on exhaustive research this book explains how the European Union makes decisions in seven major policy sectors. Written in a clear user friendly style it brings the EU alive for a student and non specialist audience. The book's central themes are that informal norms often matter more than formal rules, agency often matters more than structure and abrupt change often punctuates deadlock. It offers a theoretically based introduction to the lively, humorous and fascinating politics of a unique experiment in modern governance.

European Union Enlargement Thomas

Mehlhausen, 2015-08-11 The continuous expansion of the European Union has transformed its very own self conception. While Eastern enlargement was widely celebrated as the reuniting of Europe, the sheer number of applicants, their low economic development and the need for new states to transform in accordance with EU values required considerable adjustments to the EU's self image. By examining the European Council's contentious approval of the Mediterranean and Central and Eastern European countries in the 1970s and 1990s, this book investigates why the European Union enlarges. Based on new and hitherto not analysed data, it introduces the concept of anomie to the discourse and in doing so makes a timely contribution to the literature of constitutional politics and enlargement of the European Union. This text will be of key interest to scholars and students of the European Union area studies, European studies, central and east European studies, Mediterranean studies and more broadly comparative politics and constitutional politics.

**Theory and reform in the EU**

Dimitris N. Chrysoschoou, Michael J. Tsinisizelis, Stelios Stavridis, Kostas Ifantis, 2013-07-19 This electronic version has been made available under a Creative Commons BY-NC-ND open access license. This substantially updated and revised edition offers a comprehensive overview of the challenges confronting the political system as well as the international politics of the European Union. It draws from a spectrum of regional integration theories to determine what the Union actually is and how it is developing, examining the constitutional politics of the European Union from the Single European Act to the Treaty of Nice and beyond. The ongoing debate on the future of Europe links together the questions of democracy and legitimacy, competences and rights and the prospects for European polity building. The aim is to contribute to a better understanding of the emerging European polity and the questions that further treaty reform generates for the future of the regional system. The authors also assess the evolving European security architecture, the limits and possibilities of a genuine European foreign security and defence policy and the role of the EU in the post Cold War international system. Common themes involve debates about stability and instability, continuity and change, multipolarity and leadership, co-operation and discord, power

capabilities and patterns of behaviour The book traces the defining features of the new order in Europe and incorporates an analysis of the post September 11th context *The Politics of European Union Enlargement* Frank Schimmelfennig, Ulrich Sedelmeier, 2005-11-16 This is a key reference text presenting the latest first rate approaches to the study of European enlargement Developed and significantly expanded from a special issue of the leading Journal of European Public Policy this new volume draws on the insights from the recently emerging theoretically informed literature on the EU's eastern enlargement and complements these studies with original articles that combine a theoretical approach with comparative analyses These expert contributors focus on the broader theoretical debates and their implications for the enlargement of the EU as well as placing the enlargement of the EU within the broader context of the expansion of international organisations and the study of institutions in international relations

**Regional Behaviour** Dimitrios C. Christopoulos, 2018-02-06 This title was first published in 2001 In the framework of the EU a number of policies have been devised for regions in order to facilitate their balanced economic development The author argues that the focus on regional planners and their actions in academic literature has obscured the importance of regional elites in this process The author compares Western Scotland and the west of Crete focusing on the wider regional political and business elites within these regions and attempting a comparison of elite attitudes within regions and between regions

**The Politics of German Defence and Security** Tom Dyson, 2008-03-01 The post Cold War era has witnessed a dramatic transformation in the German political consensus about the legitimacy of the use of force However in comparison with its EU and NATO partners Germany has been reticent to transform its military to meet the challenges of the contemporary security environment Until 2003 territorial defence rather than crisis management remained the armed forces core role and the Bundeswehr continues to retain conscription The book argues that strategic culture provides only a partial explanation of German military reform It demonstrates how domestic material factors were of crucial importance in shaping the pace and outcome of reform despite the impact of international structure and adaptational pressures from the EU and NATO The domestic politics of base closures ramifications for social policy financial restrictions consequent upon German unification and commitment to EMU's Stability and Growth Pact were critical in determining the outcome of reform The study also draws out the important role of policy leaders in the political management of reform as entrepreneurs brokers or veto players shifting the focus in German leadership studies away from a preoccupation with the Chancellor to the role of ministerial and administrative leadership within the core executive Finally the book contributes to our understanding of the Europeanization of the German political system arguing that policy leaders played a key role in uploading and downloading processes to and from the EU and that Defence Ministers used Atlanticization and Europeanization in the interests of their domestic political agendas
