**Rethinking Economic Policy for Social Justice** Radhika Balakrishnan, James Heintz, Diane Elson, 2016-03-31 The dominant approach to economic policy has so far failed to adequately address the pressing challenges the world faces today extreme poverty widespread joblessness and precarious employment burgeoning inequality and large scale environmental threats This message was brought home forcibly by the 2008 global economic crisis Rethinking Economic Policy for Social Justice shows how human

rights have the potential to transform economic thinking and policy making with far reaching consequences for social justice. The authors make the case for a new normative and analytical framework based on a broader range of objectives which have the potential to increase the substantive freedoms and choices people enjoy in the course of their lives and not on narrow goals such as the growth of gross domestic product. The book covers a range of issues including inequality, fiscal and monetary policy, international development, assistance, financial markets, globalization and economic instability. This new approach allows for a complex interaction between individual rights, collective rights and collective action as well as encompassing a legal framework which offers formal mechanisms through which unjust policy can be protested. This highly original and accessible book will be essential reading for human rights advocates, economists, policy makers and those working on questions of social justice.

*Legal Cultures and Human Rights* Kirsten Hastrup, 2021-08-04 Cultural diversity as expressed for instance in different normative orders or legal cultures poses both a practical and a theoretical challenge to the idea of universal human rights. In the present volume the authors seek to address and contain this challenge with a view to the changing nature of the global society. While culture is sometimes signposted as an obstacle to human rights on the ground, this volume suggests that in so far as the global culture of human rights is primarily seen as a formal and institutional order based on a particular view of equal human worth, local cultures cannot trump it. The main point is that the culture of human rights is inclusive of all and must maintain a standard by which all peoples and cultures can measure their own performances. Further, and as demonstrated in the present volume from a range of disciplines such as law, literature, history and anthropology, culture is not a mental prison but a particular outlook upon the world for ever changing in response to new experiences and insights.

Research Handbook on International Law and Social Rights Christina Binder, Jane A. Hofbauer, Flávia Piovesan, Amaya Úbeda de Torres, 2020-08-28 This comprehensive Research Handbook offers a comparative overview of the history, nature and current status of social rights at the universal and regional level. Tracing their evolution from rather modest beginnings to becoming the category of rights responding most accurately to the 21st century's policy objectives of poverty eradication and equitable resource allocation, this Research Handbook assesses the mechanisms used to enhance the implementation and enforcement of social rights.

**Globalization, Development and Social Justice** Ann El Khoury, 2015-03-27 Are there existing alternatives to corporate globalization? What are the prospects for and commonalities between communities and movements such as Occupy the World, Social Forum and alternative economies? Globalization, Development and Social Justice advances the proposition that another globalization is not only possible but already exists. It demonstrates that there are multiple pathways towards development with social justice and argues that enabling propositional agency rather than oppositional agency such as resistance is a more effective alternative to neoliberal globalization. El Khoury develops a theory of infraglobalization that emphasizes creative constitution, not just contestation of global and local processes. The book features case studies and examples of diverse economic practice and innovative

emergent political forms from the Global South and North These case studies are located in the informal social economy and community development as well as everyday practices from prefigurative politics to community cooperatives and participatory planning This book makes an important contribution to debates about the prospects for and practices of a transformative grassroots globalization and to critical debates about globalization and development strategies It will be of interest to students and scholars of international relations globalization social movement studies political and economic geography sociology anthropology and development studies

*Need-Based Distributive Justice* Stefan Traub,Bernhard Kittel,2020-04-29 This book explores the foundations and potential of a theory of need based distributive justice supported by experimental evidence The core idea is that need based distributive justice may have some legitimacy advantages over other important principles of distribution like equality and equity and therefore involves less dispute over the distribution and redistribution of scarce resources In seven chapters eleven scholars from the fields of philosophy psychology sociology political science and economics outline the normative and positive building blocks of such a theory by critically reviewing the literature on distributive justice from their respective disciplinary perspectives They address important theoretical and practical issues concerning the rationality of needs identification at the individual level and the recognition of needs at the societal level They also investigate whether and how

the dynamics of distribution procedures that allocate resources according to the need principle leads to social stability focusing on the economic incentives that arise from need based redistribution The final chapter provides a synthesis and outlines a framework for a theory of justice based on ten hypotheses derived from the insights presented
