Economic Barbarism And Managerialism:

Economic Barbarism and Managerialism David S. Pena, 2001 Challenging the view that managerialism is a form of capitalism and that capitalism has eclipsed socialism Pena shows that the managerial or new class is an exploiting class The work of Thorstein Veblen James Burnham John Kenneth Galbraith and Kevin Phillips he suggests forms a little known century long tradition of reflection on the managerial revolution as well as on the conflux of values and socioeconomic practices that Pena dubs economic barbarism Building on the work of these thinkers he argues that industrial barbarism and the managerial revolution led to the decline of U S capitalism and its replacement by managerialism a form of nationalistic socialism in which educated white collar personnel employed by the state and corporate bureaucracies have become a new exploiting class that receives the bulk of the national wealth Thus managerialism replaced industrial barbarism with a new form of economic barbarism This managerial barbarism has fostered an unequal distribution of wealth that has penalized the middle and lower classes with stagnant or declining incomes growing job insecurity unemployment and underemployment Unless managerialism can find a way out of persistent poverty and declining living wage job opportunities these problems are likely to continue afflicting a sizable portion of the population If managers put an end to economic barbarism they have a chance to create a society characterized by generalized prosperity leisure and opportunity It is more likely however that economic barbarism will continue to be an integral part of managerialism and consequently managerialism will face a sudden social upheaval or a gradual decline

Globalization and Capitalist Geopolitics Daniel Woodley, 2017-11-27 Globalization and Capitalist Geopolitics is concerned with the nature of corporate power against the backdrop of the decline of the West and the struggle by non western states to challenge and overcome domination of the rest of the world by the West This book argues that although the US continues to preside over a quasi imperial system of power

based on global military preponderance and financial statecraft and remains reluctant to recognize the realities global economic convergence the age of imperial state hegemony is giving way to a new international order characterized by capitalist sovereignty and competition between regional and transnational concentrations of economic power This title seeks to interrogate the structure of world order by examining leading approaches to globalization and political economy in international relations and international political economy Breaking with the classical school Woodley argues that geopolitics should be understood as a transnational strategic practice employed by powerful state actors which mirrors predatory corporate rivalry for control over global resources and markets reproducing the structural conditions for corporate power through the transnational state form of capital In a period of increasing geopolitical insecurity and economic instability this title provides an authoritative yet accessible commentary on debates on capitalism and globalization in the wake of the financial crisis It is valuable resource for students and scholars seeking to develop a deeper understanding of the historical determinants of the changing dynamics of neoliberal capitalism and their implications for world order

situated in the gender class racial and sexual hierarchies of a specific region in the world system while the coloniality of power additionally situates our knowledge The volume further argues that the postcolonial era retains the hierarchy of colonialism and the possibility of national development without global structural changes is one of the greatest 20th century myths Taking these perspectives into consideration the contributors examine and help to refine classic world system theory

Iraq's Burdens Abbas Alnasrawi, 2002-11-30 Oil revenue has been an economic curse for Iraq In the second half of the 20th century the international oil sector shaped Iraq's economy forcing it to rely too heavily on revenue brought in by oil production and exports Iraq's failure to use copious oil rents to diversify the economy has proven disastrous for its people and economy Its over reliance on oil revenues coupled with the consequences of its war with Iran the Gulf War and the ensuing economic sanctions have led the country to economic destruction sanctions and enormous debt Iraq is a major oil producing country a founding member of OPEC and possesses the world's second

highest amount of oil reserves Yet few studies exist on Iraq's oil industry and its impact on the economic and political fortunes of the country Alnasrawi remedies this by helping us understand this important Arab Middle Eastern oil exporting country that has been a constant focus of U S foreign policy since 1990 Alnasrawi concludes that the availability of capital is an insufficient condition for economic development and may in fact retard it as it did in this now reviled and wrecked country
