Harris, 1983 **Handbook of Contemporary Behavioral Economics** Morris Altman, Offering the comprehensive articulation of behavioral economics theory, this book includes coverage of critical areas such as the Economic Agent, Context and Modeling Decision Making

Experiments and Implications Labor Issues Household and Family Issues Life and Death Taxation Ethical Investment and Tipping and more **The Psychology of Economic Decisions** Isabelle Brocas, Juan D. Carrillo, 2003 Psychologists and economists often ask similar questions about human behaviour This volume brings together contributions from leaders in both disciplines The editorial introduction discusses methodological differences between the two which have until now limited the development of mutually beneficial lines of research Psychologists have objected to what they see as an excessive formalism in economic modelling and an unrealistic degree of sophistication in the behaviour of individuals while economists criticize the absence of a general psychological framework into which most results can be fitted and the lack of welfare implications in their theories The editors encourage scholars to exploit the strengths of each discipline the ability of psychologists to understand the feelings and motivation of individuals and the experience of economists to develop normative frameworks The editors then highlight the links between the contributions by grouping them according to central themes in the study of rationality and well being 1 The causes and consequences of irrational behaviour 2 The role of anticipatory feelings and imperfect self knowledge on decision making 3 The way in which memory of past events and cost of thinking affect current decisions 4 The interaction between anticipated and remembered utility and its effects on the welfare of individuals 5 Experimental practice on how to perform controlled experiments to test hypotheses This exciting volume provides an excellent point of entry for anyone interested in the interface between economics and psychology *Economic Decision Making Using Cost Data* Daniel Marburger, 2013-08-01 A firm maximizes profits if each decision adds more to the firm's revenue than to its costs Although the concept sounds rather simple it is difficult to do in practice To ease this difficulty the authors are giving you the inside knowledge to economic theory This book will help you understand economic theory and much more to accurately infer changes in revenues that may be associated with a decision And since economic theory suggests that the costs reported by accountants rarely reflect the true cost associated with the decision this book will help you understand how to assess the changes in revenues and costs Demand and price sensitivity analysis allow you to infer revenue changes and this book helps you reconcile the economic theory of cost with common accounting practices so the differences can be reconciled and better decisions can be made **Fascinating economy** Larissa Zaplatinskaia, 2020-12-23 This book is an academic course in international economics for university students The study of economics is important because the economy global national local and personal effects what you do every day Economics influences the work you do where you live what you eat how you dress whether there is gas available for your car and more Economics also influences government policy and international relations including wars **Consumer Neuroscience** Moran Cerf, Manuel Garcia-Garcia, 2017-11-16 A comprehensive introduction to using the tools and techniques of neuroscience to understand how consumers make decisions about purchasing goods and services Contrary to the assumptions of economists consumers are not always rational actors who make decisions in their own best interests The new

field of behavioral economics draws on the insights of psychology to study non rational decision making The newer field of consumer neuroscience draws on the findings tools and techniques of neuroscience to understand how consumers make judgments and decisions This book is the first comprehensive treatment of consumer neuroscience suitable for classroom use or as a reference for business and marketing practitioners After an overview of the field the text offers the background on the brain and physiological systems necessary for understanding how they work in the context of decision making and reviews the sensory and perceptual mechanisms that govern our perception and experience Chapters by experts in the field investigate tools for studying the brain including fMRI EEG eye tracking and biometrics and their possible use in marketing The book examines the relation of attention memory and emotion to consumer behavior cognitive factors in decision making and the brain s reward system It describes how consumers develop implicit associations with a brand perceptions of pricing and how consumer neuroscience can encourage healthy behaviors Finally the book considers ethical issues raised by the application of neuroscience tools to marketing Contributors Fabio Babiloni Davide Baldo David Brandt Moran Cerf Yuping Chen Patrizia Cherubino Kimberly Rose Clark Maria Cordero Merecuana William A Cunningham Manuel Garcia Garcia Ming Hsu Ana Iorga Philip Kotler Carl Marci Hans Melo Kai Markus M ller Brendan Murray Ingrid L C Nieuwenhuis Graham Page Hirak Parikh Dante M Pirouz Martin Reimann Neal J Roese Irit Shapira Lichter Daniela Somarriba Julia Trabulsi Arianna Trettel Giovanni Vecchiato Thalia Vrantidis Sarah Walker
