Economic History Of Britain Vol 2 Reformation To Industrial Revolution 1530 178:

The Origins of Economic Inequality Between Nations Carlos Ramirez-Faria, 2012-07-26 First published in 1991 this text provides an incisive analysis of theories concerning the origins of economic inequality between nations Central to the author's investigation is the concept of underdevelopment and a focus on successive Western systems of conceptualisation of the relationship between the west and the rest of the world The first part of the book concerns the Marx Engels theory of the Asiatic mode of production and the anti Imperialist reaction against Eurocentrism initiated by the theoretical synthesis of J A Hobson This is followed by an examination of the post World War II era particularly the evolution of development studies and the differing versions of dependency theory The author concludes with an analysis of the most recent reactions against economic imperialism and dependency theory and concludes with an assessment of their implications for the further economic development of today's Third World

Enlightenment and Romance Robert P. Irvine, 2000 This study places the novels of Tobias Smollett and Walter Scott in two critical contexts the rise from the middle of the eighteenth century of the discourses of the human or social sciences and the dominance of the novel by women writers throughout the eighteenth century It argues that both authors so often seen as paradigmatically masculine in fact use the discourses of feminine romance or the domestic novel to figure authorial control over narrative structure It suggests that they do so in order to combine utopian plot endings enacting a nostalgic Tory ideology with an essentially deterministic account of history and society borrowed from the human sciences of the Scottish Enlightenment

Writing and the Rise of Finance Colin Nicholson, 1994-07-14 The early eighteenth century saw a far reaching financial revolution in England whose impact on the literature of the period has hitherto been relatively unexplored In this original study Colin Nicholson reads familiar texts such as Gulliver's Travels The Beggar's Opera and The Dunciad as capital satires responding to the social and political effects of the installation of capitalist financial institutions in London The founding of the Bank of England and the inauguration of the National Debt permanently altered

the political economy of England the South Sea Bubble disaster of 1721 educated a political generation into the money markets While they invested in stocks and shares Swift Pope and Gay conducted a campaign against the civic effects of these new financial institutions Conflict between these writers inherited discourse of civic humanism and the transformations being undergone by their own society is shown to have had a profound effect on a number of key literary texts The Pelican Economic History of Britain Christopher Hill,1971 The Pelican Economic History of Britain Christopher HILL,1975
