Greatness and Decline Srdjan Vucetic,2021-02-18 Exceptionalist ideas have long influenced British foreign policy As Britain begins to confront the challenges of a post Brexit era in an increasingly unstable world a re examination of the nature and causes of this exceptionalist bent is in order Arguing that Britain s search for greatness in world affairs was and still is a matter of habit Srdjan Vucetic takes a closer look at the period between Clement Attlee s New Jerusalem and Tony Blair s New Labour Britain s tenacious pursuit of global power was never just a function of consensus among policymakers or even political elites more broadly Rather it developed from popular everyday and gradually evolving ideas about identity circulating within British and more specifically English society as a whole To uncover these ideas Vucetic works with a unique archive of political speeches newspapers history textbooks novels and movies across colonial Cold War and post Cold War periods Greatness and Decline sheds new light on Britain s interactions with the rest of the world while demonstrating new possibilities for constructivist foreign policy analysis      **The Forging of the Modern State** Eric J. Evans,2014-06-06 In this hugely ambitious history of Britain Eric Evans surveys every aspect of the period in which the country was transformed

into the world's first industrial power. This was an era of revolutionary change unparalleled in Britain yet one in which transformation was achieved without political revolution. The unique combination of transition and revolution is a major theme in the book which ranges across the embryonic empire, the Church, education, health, finance, and rural and urban life. Evans gives particular attention to the Great Reform Act of 1832. The Third Edition includes an entirely new introductory chapter and is illustrated for the first time.

**Nineteenth-century Britain, 1815-1914** David Nicholls, 1978

**Greek Society in the Making, 1863-1913** Philip Carabott, 2018-12-21. First published in 1997. Carabott creates a volume exploring the struggle between the forces of modernity and those who resisted and denied it, providing the underlying theme of this volume. Using a wide array of sources and drawing parallels with processes elsewhere in Europe, the contributors focus on such topics as secularization and the church, education and irredentism, shifts in the language of political contention, the feminist awareness in prose. Historical writing on Greece in this era has tended to concentrate on facts and on the roles of individuals and foreign powers. The papers here, which derive from research presented to a conference at King's College London in 1995, aim rather to look at the potency of social forces and groupings and offer a critical and often revisionist account of the fundamental changes in society that marked the period from the 1860s to the start of the present century.

**Flesh in the Age of Reason** Roy Porter, 2004. Starting with the grim Britain of the Civil War era with its punishing sense of the body as a corrupt vessel for the soul, Roy Porter charts how, through figures as diverse as Locke, Swift, Johnson, and Gibbon, ideas about medicine, politics, and religion fundamentally changed notions of self. He shows how the Enlightenment, with its explosion of rational thinking and scientific invention of the eighteenth and nineteenth centuries, provided a lens through which we can best see the profound shift from the theocentric, otherworldly Dark Ages to the modern, earthly, body-centered world we live in today. As man made in God's image gave way to the Enlightenment's notion of the Self-made man, the body moved center stage. Porter writes brilliantly on the ways in which men and women flaunted, decorated, tanned, and dieted themselves, activities that we find familiar but that a Puritan divine would have considered satanic. And he explores how, at the end of the century, the human soul took on a new significance in the works of Godwin, Blake, and Byron.

**Nineteenth Century Prose**, 1997 *The American and British Debate Over Equality, 1776-1920* James L. Huston, 2017-10-16 Historians have long contested the degree to which the central tenet of the Declaration of Independence that all men are created equal has manifested itself in American society and national policy According to James L Huston many historians have focused too intently on class differences slavery and inequalities arising from ethnicity sexuality and gender while overlooking important areas where notions of equality flourished during the century and a half after the Declaration's signing In *The American and British Debate Over Equality 1776 1920* Huston examines the egalitarian communities in rural northern America particularly those enclaves that differed from the openly aristocratic cities and towns of the British Isles In the aftermath of the American Revolution British and American writers alike recognized that a growing philosophical rift divided the two nations whereas Great Britain continued to embrace the inequality of its hierarchical class system the United States professed allegiance to democratic ideals of equality limited though these were by racial and gender norms of the day Huston argues that the two countries engaged in an intellectual debate during the next century and a half over which ideal equality or inequality worked best in promoting social stability political hegemony and economic success Exploring the effects of equality and inequality on many aspects of American life he examines civil behavior social customs treatment of others politics education religion economic opportunity and general public optimism Drawing from decades of publications by American and British writers Huston reveals the rhetorical strategies contemporary observers employed in defending or rejecting the organization of a society around broader notions of human equality *The American and British Debate Over Equality 1776 1920* informs the modern debate over equality and inequality not by theorizing and philosophizing but by offering a glimpse into the practical applications of a functioning egalitarian society as compared to one that extolled monarchy and institutionalized inequality

**Tropical Medicine in the Twentieth Century** Helen J. Power, 2012-11-12 First published in 1998 Despite the upsurge of interest in the history of tropical medicine international public health and the provision of health care in colonial and post colonial tropical countries no major text discusses the history of the academic discipline in the twentieth century In Britain the two Schools of Tropical Medicine opened within six months of each other in the final year of the nineteenth century They have played a pivotal role in developing tropical medicine as an academic discipline in postgraduate medicine with an active research profile The Schools also affected the development of health care in the tropical colonies They trained the Medical Officers of the Colonial Medical Service and the indigenous doctors whose training failed to include infectious endemic diseases and lacked an emphasis on community health The Schools also contributed to a body of knowledge applied by the

colonial powers international agencies and independent nation states as part of their health care programmes Ultimately the Schools helped the developing world to establish its own priorities for health This volume charts the history of the Liverpool School of Tropical Medicine from 1898 to 1990 *British Drama of the Industrial Revolution* Frederick Burwick, 2015-07-28 Between the advent of the French Revolution and the short lived success of the Chartist Movement overworked and underpaid labourers struggled to achieve solidarity and collective bargaining That history has been told in numerous accounts of the age but never before has it been told in terms of the theatre of the period To understand the play lists of a theatre it is crucial to examine the community which that theatre serves In the labouring class communities of London and the provinces the performances were adapted to suit the local audiences whether weavers or miners or field workers Examining the conditions and characteristics of representative provincial theatres from the 1790s to 1830s Frederick Burwick argues that the meaning of a play changes with every change in the performance location As contributing factors in that change Burwick attends to local political and cultural circumstances as well as to theatrical activities and developments elsewhere **The British Gentry, the Southern Planter, and the Northern Family Farmer** James L.
