Cohen, Giovanni

Federico, 2001-09-06 This volume in the New Studies in Economic and Social History series examines Italy's transformation from a largely rural state in the nineteenth century to today's industrial powerhouse At the time of unification in 1861 much of the country was backward poor and agrarian few would have believed that a hundred years later Italy would become one of the seven largest industrial countries its people among the wealthiest in the world This process of development and structural change has generated an enormous and evolving literature alive with controversies and compelling insights New research and reinterpretation of existing data have led to a reevaluation of the nature of Italian Dualism while revisions to national income accounts are modifying the traditional picture of economic growth Jon Cohen and Giovanni Federico provide a concise up to date account of this literature highlighting new views on old issues and signalling areas in need of further

Determinants in the Evolution of the European Chemical Industry, 1900-1939 Anthony S. Travis, Harm G. Schröter, Ernst Homburg, Peter J.T. Morris, 2013-04-17 The editors wish to thank the European Science Foundation for its support of the programme on the Evolution of Chemistry in Europe 1789 1939 as well as for sponsoring the publication of this volume Through the subdivision of this initiative that deals specifically with chemical industry it has been possible for historians of science technology business and economics to share often widely differing viewpoints and develop consensus across disciplinary and cultural boundaries The contents of this volume are based on the third of three workshops that have considered the emergence of the modern European chemical industry prior to 1939 the first held in Liege 1994 the second in Maastricht 1995 and the third in Strasbourg 1996 All contributors and participants are thanked for their participation in often lively and informative debates The generous hospitality of the European Science Foundation and its staff in Strasbourg is gratefully acknowledged

Introduction Emerging chemical knowledge and the development of chemical industry and particularly the interaction between them offer rich fields of study for the historian This is reflected in the contents of the three workshops dealing with

the emergence of chemical industry held under the aegis of the European Science Foundation's Evolution of Chemistry in Europe 1789-1939 programme. The first workshop focused mainly on science for industry 1789-1850 and the second on the two-way traffic between science and industry 1850-1914. The third workshop dealing with the period 1900-1939 covers similar issues but within different and wider contexts.

An Economic History of the First German Unification Ulrich Pfister, Nikolaus Wolf, 2023-03-27. There is a striking chronological parallel between Germany's transition from a post-Malthusian regime to modern economic growth and the formation of a modern nation state between the late 1860s and the early 1880s which culminated in the events of 1871. The central question of this book is whether and how such state formation did in fact contribute to economic development. Twenty chapters written by leading experts in their respective fields deal with various aspects of the book's main question. Together they identify three channels by which national unification contributed to Germany's economic development:

1. Creation of a nation state completed a process of institutional Unification of a large inland area and thereby increased the integration of domestic markets.
2. Unification raised the capacity of the political system with respect to regulating complex domains such as stock companies, patenting and social insurance.
3. The emerging political regime of market-preserving federalism promoted the quality of economic institutions.

Moreover, a set of chapters dealing with the experience of other European economies apart from Germany during the second half of the nineteenth century highlight additional factors in nineteenth-century economic development, most notably the first wave of modern globalization and economic geography. Readers interested in the history of state building and the economic history of Germany and of Europe in general during the age of industrialization and globalization and students of the economic effects of political integration and decentralized state growth will all gain much from this book.

Italy Spencer M. DiScala, 2018-04-17. This essential book fills a serious gap in the field by synthesizing modern Italian history and placing it in a fully European context. Emphasizing globalization, Italy traces the country's transformation from a land of emigration to one of immigration and its growing cultural importance. Including coverage of the April 2008 elections, this updated edition offers expanded examinations of contemporary Italy's economic, social and cultural development, a deepened discussion on immigration and four new biographical sketches. Author Spencer M. DiScala discusses the role of women, gives ample attention to the Italian South and provides a picture of how ordinary Italians live. Cast in a clear and lively style that will appeal to readers, this comprehensive account is an indispensable addition to the field.

The Interwar World Andrew Denning, Heidi J.S. Tworek, 2023-08-29. The Interwar World collects an international group of over 50 contributors to discuss, analyze and interpret this crucial period in twentieth-century history. A comprehensive understanding of the interwar era has been limited by Euro-American approaches and strict adherence to the temporal limits of the world wars. The volume's contributors challenge the era's accepted temporal and geographic framings by privileging global processes and interactions. Each contribution takes a global thematic approach, integrating world regions into a shared narrative. Three central questions

frame the chapters First when was the interwar Viewed globally the years 1918 and 1939 are arbitrary limits and the volume explicitly engages with the artificiality of the temporal framework while closely examining the specific dynamics of the 1920s and 1930s Second where was the interwar Contributors use global history methodologies and training in varied world regions to decenter Euro American frameworks engaging directly with the usefulness of the interwar as both an era and an analytical category Third how global was the interwar Authors trace accelerating connections in areas such as public health and mass culture counterbalanced by processes of economic protectionism exclusive nationalism and limits to migration By approaching the era thematically the volume disaggregates and interrogates the meaning of the global in this era As a comprehensive guide this volume offers overviews of key themes of the interwar period for undergraduates while offering up to date historiographical insights for postgraduates and scholars interested in this pivotal period in global history

Europe's Advantage Francesca Carnevali, 2005-09-15 This is the first book to explore the causes of the decline of British manufacturing in the 20th century by focusing on the troubled relationship between banks and small firms in a comparative historical perspective Since the mid 1970s the rediscovery of small firms and of the important role they have played in the economies of continental Europe have occupied a substantial part of the literature on the sources of economic competitiveness In Britain the relationship between banks and industry has been the object of intense speculation since before the First World War Since then banks have been accused by the business community academics and politicians of neglecting industrial finance and by doing so of reducing the competitiveness of British firms By comparing the rise of small firms in France Germany and Italy and their decline in Britain this book analyses how the structure of these countries banking systems has affected small firms growth This analysis is placed in the historical context of the political economy of these four countries to show how banking and industrial structures developed over the century as a consequence of the state s need to mediate between different social and economic groups This approach allows the author to show why British banking came to be so concentrated and the negative impact that this had on the supply of finance to small firms The experiences of France Germany and Italy show alternative structures and policy responses towards small firms

Creating Wine James Simpson, 2011-09-26 Today s wine industry is characterized by regional differences not only in the wines themselves but also in the business models by which these wines are produced marketed and distributed In Old World countries such as France Spain and Italy small family vineyards and cooperative wineries abound In New World regions like the United States and Australia the industry is dominated by a handful of very large producers This is the first book to trace the economic and historical forces that gave rise to very distinctive regional approaches to creating wine James Simpson shows how the wine industry was transformed in the decades leading up to the First World War Population growth rising wages and the railways all contributed to soaring European consumption even as

many vineyards were decimated by the vine disease phylloxera At the same time new technologies led to a major shift in production away from Europe s traditional winemaking regions Small family producers in Europe developed institutions such as regional appellations and cooperatives to protect their commercial interests as large integrated companies built new markets in America and elsewhere Simpson examines how Old and New World producers employed diverging strategies to adapt to the changing global wine industry Creating Wine includes chapters on Europe s cheap commodity wine industry the markets for sherry port claret and champagne and the new wine industries in California Australia and Argentina The World Economy between the Wars Peter Temin,Gianni Toniolo,2008-02-12 The European Economy between the Wars OUP 1997 has become the definitive economic history of Europe in the inter war period Placing the Great Depression of 1929 33 and the associated financial crisis at the center of the narrative the authors comprehensively examined the lead up to and consequences of the depression and recovery The authors now expand their scope to include the entire world economy and have created a new edition The World Economy between the Wars New material focuses on the structure of the world economy in the 1920s including a special focus on the United States Japan and Latin America Report of the Commissioners on Agricultural, Commercial, Industrial, and Other Forms of Technical Education New South Wales.
