Economic Geography Key Thems In Geography:

Introducing Human Geographies Kelly Dombroski, Mark Goodwin, Junxi Qian, Andrew Williams, Paul Cloke, 2024-07-09
Introducing Human Geographies is a travel guide into the academic subject of human geography and the things that it studies. The coverage of the new edition has been thoroughly refreshed to reflect and engage with the contemporary nature and direction of human geography. This updated and much extended fourth edition includes a diverse range of authors and topics from across the globe with a completely revised set of contributions reflecting contemporary concerns in human geography. Presented in four parts with a streamlined structure it includes over 70 contributions written by expert international researchers addressing the central ideas through which human geographers understand and shape their subject. It maps out the big foundational ideas that have shaped the discipline past and present, explores key research themes being pursued in human geography's various sub-disciplines and identifies emerging collaborations between human geography and other disciplines in the areas of technology, justice and environment. This comprehensive, stimulating and cutting-edge introduction to the field is richly illustrated throughout with full-colour figures, maps and photos. The book is designed especially for students new to university degree courses in human geography across the world and is an essential reference for undergraduate students on courses related to society, place, culture and space. Routledge Handbook of Evolutionary Economics Kurt Dopfer, Richard R Nelson, Jason Potts, Andreas Pyka, 2023-11-27 While dating from post-Classical economists such as Thorstein Veblen and Joseph Schumpeter, the inception of the modern field of evolutionary economics is usually dated to the early 1980s. Broadly speaking, evolutionary economics sees the economy as undergoing continual evolutionary change. Evolutionary change indicates that these changes were not planned but rather were the result of innovations and selection processes. These often involved winners and losers but most importantly they resulted in actors learning what was and was not working. Evolutionary economics, in contrast to mainstream economics, emphasises the relevance of variables such as technology, institutions, decision rules, routines or consumer preferences for explaining the complex evolutionary changes in the economy. In so doing, evolutionary economics significantly broadens the scope of economic analysis and sheds new light on key concepts and issues of the discipline. This handbook draws on a stellar cast list of international contributors ranging from the founders of the field to the newest voices. The volume explores the current state of the art in the field of evolutionary economics at the levels of the micro (e.g. firms and households), meso (e.g. industries and institutions) and macro (e.g. economic policy, structure and growth). Overall, the Routledge Handbook of Evolutionary Economics provides an excellent overview of current trends and issues in this rapidly developing field. **Contemporary Economic Geographies** Jennifer Johns, Sarah Marie Hall, 2025-05-20 The subdiscipline of economic geography has a long and varied history and recent work has pushed the field to diversify even further. This collection takes this agenda forward by showcasing inspiring critical and plural perspectives for contemporary economic geographies. Highlighting the contributions

of global scholars the thirty chapters showcase fresh ways of approaching economic geography in research teaching and praxis With sections on thought leaders contemporary critical debates and future research agendas this collection calls for greater openness and inclusivity

Stranded Assets and the Environment Ben Caldecott, 2018-05-11 Drawing on the work of leading researchers and practitioners from a range of disciplines including economic geography economics economic history finance law and public policy this edited collection provides a comprehensive assessment of stranded assets and the environment covering the fundamental issues and debates including climate change and societal responses to environmental change as well as its origins and theoretical basis The volume provides much needed clarity as the discourse on stranded assets gathers further momentum In addition to drawing on scholarly contributions there are chapters from practitioners and analysts to provide a range of critical perspectives While chapters have been written as important standalone contributions the book is intended to systematically take the reader through the key dimensions of stranded assets as a topic of research inquiry and practice The work adopts a broad based social science perspective for setting out what stranded assets are why they are relevant and how they might inform the decision making of firms investors policymakers and regulators The topic of stranded assets is inherently multi disciplinary cross sectoral and multi jurisdictional and the volume reflects this diversity This book will be of great relevance to scholars practitioners and policymakers with an interest in include economics business and development studies climate policy and environmental studies in general

Spaces of Danger Heather Merrill,Lisa M. Hoffman,2015-12-01 These twelve original essays by geographers and anthropologists offer a deep critical understanding of Allan Pred s pathbreaking and eclectic cultural Marxist approach with a focus on his concept of situated ignorance the production and reproduction of power and inequality by regimes of truth through strategically deployed misinformation diversions and silences As the essays expose the cultural and material circumstances in which situated ignorance persists they also add a previously underexplored spatial dimension to Walter Benjamin s idea of moments of danger The volume invokes the aftermath of the July 2011 attacks by far right activist Anders Breivik in Norway who ambushed a Labor Party youth gathering and bombed a government building killing and injuring many Breivik had publicly and forthrightly declared war against an array of liberal attitudes he saw threatening Western civilization However as politicians and journalists interpreted these events for mass consumption a narrative quickly emerged that painted Breivik as a lone madman and steered the discourse away from analysis of the resurgent right wing racisms and nationalisms in which he was immersed The Breivik case is merely one of the most visible recent examples say editors Heather Merrill and Lisa Hoffman of the unchallenged production of knowledge in the public sphere In essays that range widely in topic and setting for example brownfield development in China a Holocaust memorial in Germany an art gallery

exhibit in South Africa this volume peels back layers of situated practices and their associated meaning and power relations Spaces of Danger offers analytical and conceptual tools of a Predian approach to interrogate the taken for granted and make visible and legible that which is silenced Geographies of Practice Transfer Judith Wiemann, 2022-04-13 Employing a practice theoretical approach this study centers on how German multinational enterprises transfer three selected production related training practices to their subsidiaries in emerging economies onboarding of new employees shop floor inducting of machine operators and German style dual apprenticeship training for specialized technicians Empirical findings are drawn from three research regions Greater Shanghai Area China Metropolitan Areas Mumbai Pune Bangalore India and Central Mexico Mexico In doing so this study contributes to debates about the internationalization of multinational enterprises conceptualizing internationalization through the lens of practice transfer Practice transfer is still an understudied phenomenon in economic geography while international business studies have a long standing research interest in this area This study provides a bridge between these two disciplinary fields connecting debates in economic geography on proximity distance and knowledge transfer with organization studies based research in international business studies all the while providing a unique new perspective by developing a practice theoretical approach to explain practice transfer across distance and between territories **Geographies of Developing Areas** Glyn Williams, Paula Meth, Katie Willis, 2014-03-21 Geographies of Developing Areas is a thought provoking and accessible introductory text presenting a fresh view of the Global South that challenges students pre conceptions and promotes lively debate Rather than presenting the Global South as a set of problems from rapid urbanization to poverty this book focuses on the diversity of life in the South and looks at the role the South plays in shaping and responding to current global change The core contents of the book integrate traditional concerns of development geographers such as economic development and social inequality with aspects of the global South that are usually given less attention such as cultural identity and political conflict This edition has been fully updated to reflect recent changes in the field and highlight issues of security risk and violence environmental sustainability and climate change and the impact of ICT on patterns of North South and South South exchange It also challenges students to think about how space is important in both the directions and the outcomes of change in the Global South emphasizing the inherently spatial nature of political economic and socio cultural processes Students are introduced to the Global South via contemporary debates in development and current research in cultural economic and political geographies of developing areas The textbook consider how images of the so called Third World are powerful but problematic It explores the economic political and cultural processes shaping the South at the global scale and the impact that these have on people s lives and identities Finally the text considers the possibilities and limitations of different development strategies The main arguments of the book are richly illustrated through case study material drawn from across the Global South as well as full colour figures and photos Students are supported throughout with clear examples explanations of key terms ideas and debates and

introductions to the wider literature and relevant websites in the field The pedagogical features of the book have been further developed through discussion questions and activities that provide focused tasks for students research including investigation based around the book s case studies and in depth exploration of debates and concepts it introduces **The Routledge Handbook of Mapping and Cartography** Alexander Kent, Peter Vujakovic, 2017-10-04 This new Handbook unites cartographic theory and praxis with the principles of cartographic design and their application It offers a critical appraisal of the current state of the art science and technology of map making in a convenient and well illustrated guide that will appeal to an international and multi disciplinary audience No single volume work in the field is comparable in terms of its accessibility currency and scope The Routledge Handbook of Mapping and Cartography draws on the wealth of new scholarship and practice in this emerging field from the latest conceptual developments in mapping and advances in map making technology to reflections on the role of maps in society It brings together 43 engaging chapters on a diverse range of topics including the history of cartography map use and user issues cartographic design remote sensing volunteered geographic information VGI and map art The title s expert contributions are drawn from an international base of influential academics and leading practitioners with a view to informing theoretical development and best practice This new volume will provide the reader with an exceptionally wide ranging introduction to mapping and cartography and aim to inspire further engagement within this dynamic and exciting field The Routledge Handbook of Mapping and Cartography offers a unique reference point that will be of great interest and practical use to all map makers and students of geographic information science geography cultural studies and a range of related disciplines **The Economy As An Evolving Complex System**

II W. Brian Arthur, 2018-05-04 A new view of the economy as an evolving complex system has been pioneered at the Santa Fe Institute over the last ten years This volume is a collection of articles that shape and define this view a view of the economy as emerging from the interactions of individual agents whose behavior constantly evolves whose strategies and actions are always adapting The traditional framework in economics portrays activity within an equilibrium steady state The interacting agents in the economy are typically homogenous solve well defined problems using perfect rationality and act within given legal and social structures The complexity approach by contrast sees economic activity as continually changing continually in process The interacting agents are typically heterogeneous they must cognitively interpret the problems they face and together they create the structures markets legal and social institutions price patterns expectations to which they individually react Such structures may never settle down Agents may forever adapt and explore and evolve their behaviors within structures that continually emerge and change and disappear structures these behaviors co create This complexity approach does not replace the equilibrium one it complements it The papers here collected originated at a recent conference at the Santa Fe Institute which was called to follow up the well known 1987 SFI conference organized by Philip Anderson Kenneth Arrow and David Pines They survey the new study of complexity and the economy They apply this approach to real economic

problems and they show the extent to which the initial vision of the 1987 conference has come to fruition The First British-Soviet Geographical Seminar F. E.
