Economic Nematology:

Nematology E. I. Jonathan, 2009-08 The book is written for under graduate students of agriculture horticulture and post graduates specializing in Nematology and Entomology dealing with plant parasitic nematodes This book covers historical background including the developments in India and abroad details of morphology anatomy and taxonomy of plant parasitic nematodes relevant nematological techniques and focus on nematode problems in important crop plants and their management

Economic Botany G.E. Wickens, 2012-12-06 The strength of this book is that it is written by someone who has spent a lifetime devoted to the science of economic botany The author has brought together his vast experience in the field in Africa with his studies of arid land plants at the Royal Botanic Gardens Kew The result is an informative and reliable text that covers a vast range of topics It is also firmly based upon the author's research and interest in plant taxonomy and therefore fully acknowledges the importance of correct naming and classification in the field of science of economic botany The coverage is of economic botany in its broadest sense I was delighted to find such topics as ecophysiology plant breeding the environment and conservation are included in the text This gives the book a much more comprehensive coverage than most other texts on the subject I was also glad to see that the book covers the use of various organisms that are no longer considered part of the plant kingdom such as various species of fungi and algae It is indeed a broad ranging book that will be of use to many people interested in the uses of plants and fungi Economic botany is once again being given more prominence as a discipline because of its enormous relevance to both conservation and sustainable development Those people involved in those topics should find this a most useful resource

Economics of

Banana Production and Marketing in the Tropics Esendugue Gregory Fonsah, S. A. N. D. Chidebelu, 2011 In most African countries banana production has been consigned to subsistence production However a few countries especially in Francophone West Africa have recognised the commercial importance of banana and have used their special relationship with France to export bananas This has led to the dualization of the banana sector with the traditional system existing side by side with a modern sector geared towards export trade This book is one of the few comprehensive studies that have incorporated both the agronomic and economic aspects of banana production and marketing in Africa It looks at all facets of banana production from an historical perspective to the various traditional and modern technologies involved The marketing aspect covers both the domestic and international trade with emphasis on the preferential ACP DOM Lome Convention and the open markets of the European Union The book is a major contribution to understanding the internationalisation of the banana trade and to its ever increasing investment portfolio as the backbone of many a developing tropical economy Although the emphasis is placed on Cameroon other relevant African tropical and subtropical banana producing countries

are mentioned where necessary especially in the export sector where a degree of competition existed Further agricultural practices soils meteorological and climatological characteristics pests and diseases personnel and banana varieties grown mean that findings in Cameroon are of relevance to other banana producing countries especially in Africa Meanwhile other African and tropical countries still contemplating entry into banana exports would benefit from the Cameroon experience The book is of especial relevance to agronomists entomologists economists farm managers government policy makers large medium and small scale banana growers and students and teachers in universities and schools of agriculture
