Economics Of Franchising:

The Economics of Franchising Roger D. Blair, Francine Lafontaine, 2005-04-11 This 2005 book describes in much detail both how and why franchising works. It also analyses the economic tensions that contribute to conflict in the franchisor franchisee relationship. The treatment includes a great deal of empirical evidence on franchising its importance in various segments of the economy the terms of franchise contracts and what we know about how all these have evolved over time especially in the US market. A good many myths are dispelled in the process. The economic analysis of the franchisor franchisee relationship begins with the observation that for franchisors franchising is a contractual alternative to vertical integration. Subsequently the tensions that arise between a franchisor and its franchisees who in fact are owners of independent businesses are examined in turn. In particular the authors discuss issues related to product quality control tying arrangements pricing location and territories advertising and termination and renewals.

The Economics of Franchising Roger D. Blair, Francine Lafontaine, 2009 Franchising combines the comparative advantages of a business chain's brand recognition and economies of scale with the local drive and knowledge of the franchisee. This book describes how and why franchising works and examines the economic tensions that bring conflict to the franchisor and franchisees. Drawing on economic literature of the past twenty years or more it focuses on the different needs and goals of the franchisor and franchisee. There are two main sources of conflict: 1. some franchises are not suited for the uniformity entailed by being part of a chain and 2. lack of alignment between the needs of the franchisor and franchisee. After the introductory chapter, chapter 2 examines myths regarding the extent of growth financial security afforded by franchising size of franchised chains and extent of single unit franchisee ownership. Chapter 3 discusses the financial components of contracts: royalty rates franchise fees and advertising fees. Chapter 4 examines franchising as a contractual alternative to vertical integration for franchisors. Franchisors typically mix franchised and company owned vertically integrated outlets. A set of vertical constraints that can replicate vertical integration are examined. Arguments used to explain variation in the terms of franchise contracts are examined and it is shown how they can explain why franchisors use different levels of vertical integration. Remaining chapters examine economic motives for areas of conflict between franchisors and franchisees. Relevant court cases and legislation are examined. Chapter 5 examines quality control and quality decisions. Chapter 6 discusses purchase requirements. Chapter 7 explores pricing decisions and price constraints. Chapter 8 considers outlet location decisions and encroachment problems. Chapter 9 focuses on conflicts of interest arising from advertising and promotions and chapter 10 examines terminations renewals and transfers of franchised units. In conclusion, chapter 11 emphasizes that franchising is a well established organizational form that has proven efficient especially for the fast food hotel and motel industries. TNM

Economics and Management of Networks Gérard Cliquet, George Hendrikse, Mika Tuunanen, Josef Windsperger, 2007-03-20 Previous research on the institutional structure of franchising networks Bri ley et al 1991 Lutz 1995 Shane 1998 Lafontaine and Shaw 1999 2005 fuso 2002 Penard et al 2003a b does not explain the governance structure of the franchising firm as an institutional entity that consists of two interrelated parts Residual decision rights and ownership rights The latter includes not only residual income rights of franchised outlets but also residual income rights of franchisor owned outlets Previous studies primarily examines the incentive signalling and screening effects of fees royalties and other contractual provisions from the point of view of organizational economics see Dnes 1996 for a review without taking into account the interactions between residual decision

and residual income rights as interrelated parts of the governance structure This paper fills this gap in the literature According to the property rights view de sion rights should be allocated according to the distribution of intangible kno edge assets between the franchisor and franchisee and ownership rights should be assigned according to the residual decision rights Since ownership rights are diluted in franchising networks the dilution of residual income rights of fr chised outlets is compensated by residual income rights of company owned o lets Under a dual ownership structure company owned outlets compensate the disincentive effect of low royalties for the franchisor and low royalties strengthen the investment incentives for the franchisee **The Regulation of Franchising in the New Global Economy** Elizabeth Crawford
