Economics Of Joan Robinson:

The Economics of Joan Robinson Maria Cristina Marcuzzo, Luigi Pasinetti, Alessandro Roncaglia, 2005-08-12 Joan Robinson is widely regarded as the greatest female economist and the most important figure in the post Keynesian tradition. In this volume a distinguished international team of scholars analyses her extraordinary wide ranging contribution to economics. Various contributions address her work on the economics of the short period and her critique of Pigou her contribution to the development of the Keynesian tradition at Cambridge her response to Marx and Sraffa her analysis of growth development and dynamics her comments on technical innovation and capital theory her preference for history rather than equilibrium as a basis for methodology. Her published work spanned six decades and the volume includes a bibliography of her work including some 450 items which will be a major resource for students of the development of modern economic analysis. *Joan Robinson: Writings on Economics* J. Robinson, 2001-12-19 Joan Robinson was one of the most prominent economists of the century. She made fundamental contributions to many different areas of economic thought. She studied economics at Girton College Cambridge graduating in 1925. During the 1930s she published three books and participated in Keynes Circus. Her early contributions to economics were extensions of neo classical theory and in 1933 she introduced the theory of imperfect competition. She became an ardent follower of Keynes and produced expositions of his theory. She was one of the first economists to take Marx seriously as an economist. She became Reader in Economics at Cambridge in 1956 and in the same year she published *The Accumulation of Capital* in which she began to extend Keynes theory in particular to take into consideration long run issues of growth and capital accumulation. Her work on growth theory in 1962 alongside Nicholas Kaldor led to them developing the Cambridge Growth Theory. She became the first ever female Fellow of Kings College Cambridge in 1979. This collection of her writings is an excellent testament to the depth and breadth of the impact she had on economic theory as a whole. *Joan Robinson and Modern Economic Theory* George R. Feiwel, 1989-06-18 This and its companion volume *The Economics of Imperfect Competition and Employment* are about Joan Robinson her impact on modern economics her challenges and critiques and the advances made in the science and art of economics. **Joan Robinson and Modern Economic Theory** George R. Feiwel, 1989-02-01 *Joan Robinson and the Americans* Marjorie Shepherd Turner, 2017-07-05 Employees with valuable skills and a sense of their own worth can make their jobs pay perks and career opportunities different from those of their coworkers in subtle and not so subtle ways. This book shows how such individual arrangements can be made fair and acceptable to coworkers and beneficial to both the employee and the employer. *Economics of Imperfect Competition and Employment* George R. Feiwel, 1989-06-18 This study and its companion *Joan Robinson and Economic Theory* looks at Joan Robinson her impact upon modern economics her challenges and critiques and the advances made in the science and art of economics. It studies her ideas themes and concerns from many different perspectives. **Joan Robinson** James Cicarelli, Julianne Cicarelli, 1996-08-23 Among the most imaginative

Making Sense of Joan Robinson on China Pervez Tahir,2019-12-11 Joan Robinson was a member of the famous Keynes Circus of young economists at Cambridge in the 1930 s She was a theorist par excellence making outstanding contributions to the understanding of competition aggregate demand and capital At the same time she developed an interest in underdeveloped economies and alternatives to capitalism that eventually produced a long list of writings on China between the 1950 s to the 1970 s These writings were neither theoretical nor empirical but a series of opinion pieces and reports Yet it is these writings that arguably cost Joan Robinson the Nobel Memorial Prize in economics This short book reviews those

writings and comments on what has happened since with regard to China's development Joan Robinson's interpretation and predictions and how her 1950s lectures in China match up to China's policies since Mao This book will be of interest to students and scholars interested in how the history of economic thought can inform and progress development economics
