The Economic Regulation of Airports Peter Forsyth, David W. Gillen, Andreas Knorr, Otto G. Mayer, David Starkie, 2017-09-29 This tour d'horizon book reviews airport regulation and competition in different regions of the world and contrasts different policy perspectives Organized in four parts the first three examine in turn Australasia North America and Europe while the last section looks at the institutional reforms that have taken place in these regions The book covers the regulation of airports and competition in different regions as well as privatization policy the interaction between airports and airlines and regional economic impacts It also examines the linkages between governance structures and forms of regulation The book's global sweep embraces all the large aviation markets bringing together the ideas and challenges of academic economists airlines airport managers consultants and government regulators As well as looking at different methods degrees and paradigms of regulation it also spells out the stress points in a way that makes essential reading for airport operators airline operations staff as well as academic economists concerned with transport studies It also offers interesting reading and important lessons for those concerned with regulation of the utility industries such as telecommunications water and power generation and distribution where infrastructure can be subject to natural monopoly characteristics and where firms competing in downstream markets are dependent on the investment and operational strategies of the upstream infrastructure operator

The Future of Insurance Regulation in the United States Martin F. Grace, Robert W. Klein, 2009-12-01 A Brookings Institution Press and Georgia State University publication Important changes have buffeted the insurance industry over the past decade The 1999 repeal of key provisions of the Glass Steagall Act unleashed a wave of conglomeration in financial services as bank holding companies acquired insurance and securities businesses and to a much lesser degree insurance companies acquired securities firms and banks Rivalry within the sector has intensified insurance companies have developed products that compete directly with the offerings of banks and securities firms and vice versa In addition the industry has become increasingly global Against this backdrop pressure has been building for fundamental changes to the structure of insurance regulation in the United States Despite several court challenges over the years insurance continues to be regulated by the states Many insurance companies view state regulation as an increasing drag on their efficiency and competitiveness and support a federal regulatory system However powerful stakeholders including state officials state and regional insurance companies and many insurance agents oppose federal regulation As a result proposals to establish an optional federal charter OFC for insurance companies and agents remain mired in fierce debate The Future of Insurance Regulation in the United States gathers some of the country's leading experts on financial regulation to assess the case for an enhanced federal role in the insurance sector They pay particular attention to the merits of an OFC and how it might be designed They also consider the principles that should guide insurance regulatory policies regardless of the institutional framework and

examine the implications of financial convergence and the internationalization of insurance markets for an optimal regulatory structure The debate over insurance regulation has only grown in complexity and intensity since the financial crisis began in the fall of 2008 This book will both inform and help to shape those critical discussions Contributors John A Cooke International Financial Services London Robert Detlefsen National Association of Mutual Insurance Companies Martin F Grace Georgia State University Robert W Klein Georgia State University Robert E Litan Ewing Marion Kauffman Foundation and Brookings Institution Phil O Connor PROactive Strategies Hal S Scott Harvard Law School Harold D Skipper Georgia State University Peter J Wallison American Enterprise Institute

The Economics of Telecommunications Systems Noel D. Uri, 2004 The process of formulating and implementing telecommunications policy in the United States often seems chaotic and disorganised with overlapping responsibility and frequent conflicts among federal and state regulators Congress the Administration and the Federal judiciary There has never been a consensus on what should change and what should remain unaltered Telecommunications policy has evolved gradually over a relatively long period of time resulting in a cumulative major transformation It is still tied however to the Communications Act of 1934 Actions have been taken that have gradually moved policy from traditional public utility regulation of a monopoly to greater reliance on market forces and encouragement of competition The policies are an amalgam incorporating elements from a wide range of political and economic views There is nothing endemic in this transformation process to guarantee that the resulting policies have led to greater economic efficiency or that they are better in some subjective sense than alternatives that are available policies that have been implemented in order to evaluate their impact An objective evaluation of the impact of a policy affords an opportunity to make adjustments to it based on the realised economic consequences This approach to policy making can be looked upon as a learning by doing exercise In this book a number of objective studies based on data from various telecommunications systems are presented These studies discuss and evaluate policies that have been implemented In a number of instances the policies have been misguided Recommendations to correct the most egregious problems are offered

Global Markets and Government Regulation in Telecommunications Kirsten Rodine-Hardy, 2013-03-25 In recent years liberalization privatization and deregulation have become commonplace in sectors once dominated by government owned monopolies In telecommunications for example during the 1990s more than 129 countries established independent regulatory agencies and more than 100 countries privatized the state owned telecom operator Why did so many countries liberalize in such a short period of time For example why did both Denmark and Burundi nations differ along so many relevant dimensions liberalize their telecom sectors around the same time Kirsten L Rodine Hardy argues that international organizations not national governments or market forces are the primary drivers of policy convergence in the important arena of telecommunications regulation they create and shape preferences for reform and provide forums for expert discussions and the emergence of policy standards Yet she also shows that international convergence leaves room for substantial variation

among countries using both econometric analysis and controlled case comparisons of eight European countries

Regulating Agricultural Biotechnology Richard E. Just, Julian M. Alston, David Zilberman, 2006-12-26 This book presents the first thorough economic analysis of current agricultural biotechnology regulation The contributors most of whom are agricultural economists working either in universities or NGOs address issues such as commercial pesticides the costs of approving new products liability benefits consumer acceptance regulation and its impacts transgenic crops social welfare implications and biosafety

Handbook for Evaluating Infrastructure Regulatory Systems Ashley C. Brown, Jon Stern, Bernard William Tenenbaum, Defne Gencer, 2006-01-01 More than 200 new infrastructure regulators have been created around the world in the last 15 years They were established to encourage clear and sustainable long term economic and legal commitments by governments and investors to encourage new investment to benefit existing and new customers There is now considerable evidence that both investors and consumers the two groups that were supposed to have benefited from these new regulatory systems have often been disappointed with their performance The fundamental premise of this book is that regulatory systems can be successfully reformed only if there are independent objective and public evaluations of their performance Just as one goes to a medical doctor for a regular health checkup it is clear that infrastructure regulation would also benefit from periodic checkups This book provides a general framework as well as detailed practical guidance on how to perform such regulatory checkups

Business Liability and Economic Damages, Second Edition Scott D. Gilbert, 2020-06-25 This book covers the subject of economic damages and its role in insurance claims lawsuits and injunctions against businesses Businesses exist to provide goods and services to customers and in doing so they take risks Among these risks is the chance of losing money in lawsuits filed by customers employees and others negatively impacted by the business Insurance provides some protection against these liabilities but lawsuits still take their toll This book covers the subject of economic damages and its role in insurance claims lawsuits and injunctions against businesses This book will help the reader to identify economic damages as a component of business liability describe the business risk posed by economic damages explain some key determinants of economic damages and estimate economic damages and business loss in a variety of cases

Economic and Societal Impacts of Tornadoes Kevin Simmons, Daniel Sutter, 2013-01-22 For almost a decade economists Kevin M Simmons and Daniel Sutter have been studying the economic effects and social consequences of the approximately 1 200 tornadoes that touch down across the United States annually During this time they have compiled information from sources such as NOAA and the U S Census Bureau to examine the casualties caused by tornadoes and to evaluate the National Weather Service NWS s efforts to reduce these casualties Their unique database has enabled this fascinating and game changing study for meteorologists social scientists emergency managers and everyone studying severe weather policy disaster management or applied economics
