**George Argyrous, Frank J. B. Stilwell**

## **Economics As A Social Science Readings In Political Economy:**

Economics as a Social Science Frank J. B. Stilwell, George Argyrous, 2003 A comprehensive collection of classical and contemporary readings in this field from leading local and international scholars The release of this new edition provides up to date analysis of economic theory grounded in case studies that are applicable to our current social and political climate

**Economics as a Social Science** George Argyrous, Frank J. B. Stilwell, 1996      **Readings in Political Economy** George Argyrous, Frank J. B. Stilwell, 2011 Economic ideas are influential in restructuring society for better or worse An understanding of economics is important in the pursuit of progressive social change even more than in the pursuit of personal enrichment      **Readings in Political Economy** Edward Lawrence Wheelwright, J. B. Stilwell, 1976

**Alternative Political Economy Models of Transition** John Marangos, 2017-07-05 The collapse of centrally administered socialism in Russia and Eastern Europe resulted in what is commonly referred to as the transition problem the transformation from a centrally administered socialist economic system to one that is market based Economic science has been faced with the challenge of developing an appropriate body of analysis advice and direction to help other nations that may be undergoing this process In this volume John Marangos adopts a political economy approach that yields alternative models of transition The volume develops transition models from what Marangos defines as the primary elements of six variables 1 economic analysis 2 definitions of the Good Society 3 speed of transition 4 political structure 5 ideological structure and 6 initial conditions The models developed include the shock therapy model the neoclassical gradualist model of transition the post Keynesian model the pluralistic market the socialist model and the non pluralistic market socialist model After identifying the primary elements of each transition model Marangos considers the elements of each model with respect to the desirable reforms An essential element of the transition process is not only to identify the necessary reforms but also a sequence in which the reforms should be introduced For each transition model developed in this book a set of primary and secondary elements were provided in conjunction with a sequence of reforms Analyzing the transition problem from a political economy perspective Marangos shows that it is possible to have inconsistencies within each transition model and between transition models yet be able to identify the potential for implementation and maintenance of necessary reforms each model recommends This volume contributes to the understanding of the process of transition with the objective of identifying an optimal model of transition      Common Foundations of American and East Asian Modernisation Ian Patrick Austin, 2009

*Alternative Political Economy Models of Transition* Marangos,      **Consistency and Viability of Islamic Economic Systems and the Transition Process** J. Marangos, 2013-08-27 Consistency and Viability of Islamic Economics Systems and the Transition Process outlines the transition problem for non market economies and creates an analytic framework for understanding the cause and effect of these economies      *From Political Economy to Economics* Dimitris Milonakis, Ben Fine, 2009 Shows how economics was once rich diverse multidimensional and pluralistic Details how political

economy became economics through the desocialisation and dehistoricisation of the dismal science      *Consistency and Viability of Capitalist Economic Systems* J. Marangos,2013-05-08 Consistency and Viability of Capitalist Economic Systems develops an original analytical framework to understand the relationship between the economic political and ideological structures the external environment and the process of reform that give rise to certain economic systems by establishing consistency      International Development and the Washington Consensus John Marangos,2020-07-16 In this book John Marangos offers an insightful analytical and theoretical review of the Washington Consensus and its successors among the mainstream Following an intuitive structure it explores international development and the Washington Consensus as a critique through the lenses of Neoclassical economics Post Keynesian economics Institutional economics and Marxist economics Ultimately it provides a compelling alternative perspective to the dominant development paradigm and enables readers to identify the interconnections interrelationships and intercontradictions between different frameworks and policies It will be a valuable supplementary reading for students researchers and policymakers in international development development economics heterodox economics and the history of economic thought      The Reader's Guide in Economic, Social and Political Science Richard Rogers Bowker,George Iles,1891      **Consistency and Viability of Socialist Economic Systems** J. Marangos,2013-07-03 Economic systems and the reforms processes examined in Consistency and Viability of Socialist Economics Systems are the centrally administered socialist economics system of the Soviet Union the Liberman Kosygin reforms the Gorbachev reforms and market socialism of Yugoslavia      Clinton and Blair Flavio Romano,2006 In this important and timely book Flavio Romano identifies and clarifies the economic implications of Clinton and Blair s Third Way approach to public governance in a book of great interest to students and practitioners of economics and politics      *From Political Economy to Economics* Dimitris Milonakis,Ben Fine,2009-01-13 Economics has become a monolithic science variously described as formalistic and autistic with neoclassical orthodoxy reigning supreme So argue Dimitris Milonakis and Ben Fine in this new major work of critical recollection The authors show how economics was once rich diverse multidimensional and pluralistic and unravel the processes that lead to orthodoxy s current predicament The book details how political economy became economics through the desocialisation and the dehistoricisation of the dismal science accompanied by the separation of economics from the other social sciences especially economic history and sociology It is argued that recent attempts from within economics to address the social and the historical have failed to acknowledge long standing debates amongst economists historians and other social scientists This has resulted in an impoverished historical and social content within mainstream economics The book ranges over the shifting role of the historical and the social in economic theory the shifting boundaries between the economic and the non economic all within a methodological context Schools of thought and individuals that have been neglected or marginalised are treated in full including classical political economy and Marx the German and British historical schools American institutionalism Weber and Schumpeter and

their programme of Social konomik and the Austrian school At the same time developments within the mainstream tradition from marginalism through Marshall and Keynes to general equilibrium theory are also scrutinised and the clashes between the various camps from the famous Methodenstreit to the fierce debates of the 1930s and beyond brought to the fore The prime rationale underpinning this account drawn from the past is to put the case for political economy back on the agenda This is done by treating economics as a social science once again rather than as a positive science as has been the inclination since the time of Jevons and Walras It involves transcending the boundaries of the social sciences but in a particular way that is in exactly the opposite direction now being taken by economics imperialism Drawing on the rich traditions of the past the reintroduction and full incorporation of the social and the historical into the main corpus of political economy will be possible in the future

**Economics as Worldly Philosophy** R. Blackwell,J. Chatha,E. Nell,2016-07-27 These essays written by students of Robert Heilbroner develop central themes in his work the importance of historical perspective in economics the connection with the great questions of philosophy and the immediacy of politics They begin by criticizing the rational maximizing foundations of conventional theory finding no place there for history The essays first explore methodology then technology in relation to history the politics inherent in economics and finally turn to the great Classics interpreted in relation to modern questions

**Innovation, Evolution and Economic Change** Blandine Laperche,James K. Galbraith,Dimitri Uzunidis,2006-01-01 John Kenneth Galbraith was an eminent economist and proponent of change The contributors to the book further his analysis on the evolution of capitalism taking into account changes to the general economic climate since the publication of J K Galbraith s main thesis they outline new ideas which form fertile ground for new research The book begins with a penetrating analysis of the main features of today s capitalism and in particular the conflict between shareholders and managers It moves on to focus on the consequences of globalization in the decision making processes of large corporations and represents an important step in the development of a theory of fraud and corruption within corporations In the final part the authors address and explore the consequences of the domination of influential groups over major social and political decisions on the blurred boundaries between the public and the private sectors and its consequences in the fields of technological regulation and the evolution of public services In so doing the authors question the meaning and power of democracy in today s society Innovation Evolution and Economic Change will appeal to a wide readership and audience of economists policy makers and political organization

**The Social Sciences**,1914 **The Balkans: Foreign Direct Investment and EU Accession** Aristidis Bitzenis,2016-03-23 The fall of communism and subsequent developments have put a renewed spotlight on the potential of the Balkan economies Bulgaria Albania Serbia Montenegro Romania and the Former Yugoslav Republic of Macedonia are countries which have attracted low levels of investment and poor political leadership in most of the countries has delayed much needed reforms However there are now signs of improvement and this timely book fills a significant gap in the available literature Demonstrating that these

countries must engage as fully as possible with the world economy via EU accession this book explores the implications of the specific characteristics of these countries which have made the transition process more difficult This exciting new volume is valuable reading for students academics and business professionals interested in international development in the Balkans

**The Best Books** William Swan Sonnenschein,1887

## Reviewing **Economics As A Social Science Readings In Political Economy**: Unlocking the Spellbinding Force of Linguistics

In a fast-paced world fueled by information and interconnectivity, the spellbinding force of linguistics has acquired newfound prominence.
