Economies Beyond Agriculture In The Classical World:

Economies Beyond Agriculture in the Classical World David J. Mattingly, John Salmon, 2002-03-11 This book presents a challenge to the long held view that the predominantly agricultural economies of ancient Greece and Rome were underdeveloped It shows that the exploitation of natural resources manufacturing and the building trade all made significant contributions to classical economies It will be an indispensable resource for those interested in the period The Ancient City Arjan Zuiderhoek, 2017 This book provides a survey of modern debates on Greek and Roman cities and a sketch of the cities chief characteristics **The ^ADynamics of Ancient Empires** Ian Morris, Walter Scheidel, 2009-01-13 The Dynamics of Ancient Empires is designed to address the deficit in the comparative study of ancient empires in the western Old World and to encourage dialogue across disciplinary boundaries by examining the fundamental features of the successive and partly overlapping imperial states that dominated much of the Near East and the Mediterranean in the first millennia BCE and CE

The Ancient Economy Joseph Gilbert Manning, Ian Morris, 2005 Historians and archaeologists normally assume that the economies of ancient Greece and Rome between about 1000 BC and AD 500 were distinct from those of Egypt and the Near East However very different kinds of evidence survive from each of these areas and specialists have as a result developed very different methods of analysis for each region This book marks the first time that historians and archaeologists of Egypt the Near East Greece and Rome have come together with sociologists political scientists and economists to ask whether the differences between accounts of these regions reflect real economic differences in the past or are merely a function of variations in the surviving evidence and the intellectual traditions that have grown up around it The contributors describe the types of evidence available and demonstrate the need for clearer thought about the relationships between evidence and models in ancient economic history laying the foundations for a new comparative account of economic structures and growth in the ancient Mediterranean world **The Power of Individual and Community in Ancient Athens and Beyond** Zosia Archibald, Jan Haywood, 2018-12-31 The pioneering ideas of John Kenyon Davies one of the most significant Ancient

Historians of the past half century are celebrated in this collection of essays A distinguished cast of contributors who include Alain Bresson Nick Fisher Edward Harris John Prag Robin Osborne and Sally Humphreys focus tightly on the nexus of socio political and economic problems that have preoccupied Davies since the publication of his defining work Athenian Propertied Families in 1971 The scope of Davies interest has ranged widely in conceptual and chronological as well as geographical terms and the essays here reflect many of his long term concerns with the writing of Greek history its methods and materials

interactions identity and funerary monuments in ancient Italy migration and social identity in the Roman Near East theoretical approaches to Roman small finds formation processes of in fills in urban sites and new reflections on Roman glass This volume contains a selection of papers from the conference sessions **Paul as an Administrator of God in 1 Corinthians** John Goodrich,2012-05-10 Elucidates the nature of Paul s authority by investigating the metaphorical portrayal of apostles in 1 Corinthians as divinely appointed administrators Contextualizing Pompeiopolis Lâtife Summerer,Peri Johnson,Julia M. V. Harris,2008-02-14 This collection of new essays presents a set of debates about what money was in antiquity and how it functioned The focus is mainly on the Greeks who were not the original inventors of coinage but were responsible for its widespread adoption and on the Roman Empire which developed one of the most complex of known pre modern economies Money in the Late Roman Republic David B. Hollander,2007-02-26 Like coinage bullion financial instruments and a variety of commodities played an important role in Rome s monetary system This book examines how the availability of such assets affected the demand for coinage and the development of the late Republican economy Broken Cities Martin Devecka,2020-09-01 A comparative study of cities that fell into ruin through human involvement We have been taught to think of ruins as historical artifacts relegated to the past by a catastrophic event Instead Martin Devecka argues that we should see them as processes taking place over a long present In Broken Cities Devecka offers a wide ranging comparative study of ruination the process by which monuments architectural sites and urban centers decay into ruin over time Weaving together four case studies of classical Athens late antique Rome medieval Baghdad and sixteenth century Mexico City Devecka shows that ruination is a complex social process largely contingent on changing imperial control rather than the result of immediate or natural events Drawing on literature legal texts epigraphic evidence and the narratives embodied in monuments and painting Broken Cities is an expansive and nuanced study that holds great significance for the field of historiography Polis Mogens Herman Hansen,2006-10-05 An accessible introduction to the polis plural poleis or ancient Greek city state Mogens Herman Hansen addresses such topics as the emergence of the polis its size and population and its political culture ranging from famous poleis such as Athens and Sparta through more than 1 000 known examples *Herod and Augustus* David M.
