Hannelore Rex:

Hannelore Rex Walter Stern, 2005-07 Hannelore Rex is the story of a young refugee from Nazi Germany her promiscuous life as a single her loveless marriage and her adulterous affair with an American general during World War II Her nagging ambivalence about being Jewish heightens the conflict A refugee from Nazi Germany contemplates an affair with a gentile while asserting herself in business and in marriage during World War II Shipped off by her parents with companion Brigitte young Hannelore starts a new life in New York City Through Brigitte s new American husband Hannelore meets strapping rich Rick Albright She s also introduced to awkward Marvin Rosenbaum whom Hannelore marries after he gets her pregnant The strongest aspect of the narrative is the realistic intense relationship between girlfriends Brigitte and Hannelore though an eventual revelation about their past rings false

The Hand that Feeds Alexander Mullan, Riley Smallman, Herre de Bondt, Juliette Waterman, 2025-05-13 Food plays a major part in shaping human animal relations from nurturing farm and zoo animals to bringing wild birds into suburban gardens Food mediated interactions create personal interspecies bonds enrich and alter environments change species distributions enable new relationships and reconfigure social perspectives but also lead to many concerns over health and disease for example as well as conflicts over spaces and resources However previous attention has almost exclusively focused on the purpose driven utilitarian and economic aspects of feeding rather than the affective and emotional encounters that motivate many feeding practices Presenting new research and interdisciplinary case studies The Hand that Feeds considers animal feeding from historic to modern times The volume explores the nuances and complexity of non utilitarian feeding relationships across urban and rural divides in the wild on the farm at the zoo and in the garden and how our feeding relationships have altered animal distributions and behaviours The authors scrutinise contrasts between which species are promoted and which are persecuted and how the species we choose to feed reflects broader world views and cultural values Ultimately this volume engages in the discussion of how we feed why we feed which animals we deem worthy of feeding and the widespread impacts of feeding relations Praise for The Hand that Feeds An innovative and exciting collection of studies exploring the cultural phenomenon of animal feeding Drawing on cutting edge approaches and case studies from wild raptors to livestock and zoo animals The Hand that Feeds has started a new conversation on this fundamental relationship between other species and ourselves Aleks Pluskowski University of Reading This fascinating book explores the how why and consequences of people feeding other species drawing on perspectives from the historical life and social sciences Different voices bring diverse observations and viewpoints to a refreshingly lively and informative discussion of a topic that is anything but simple Terry O Connor University of York This is a fantastic interdisciplinary collection interrogating how human animal relations are mediated by food Food can be an enticement a medicine or a poison it can be a vehicle for protection and bonding or distance and killing Dolly J rgensen University of Stavanger

Minerva Meets Vulcan: Scientific and Technological Literature - 1450-1750 Wolfgang

Lefèvre,2021-06-16 This book offers a comprehensive study and account of the co evolution of technological and scientific literature in the early modern period 1450 1750 It examines the various relationships of these literatures in six areas of knowledge Architecture Chemistry Gunnery Mechanical Engineering Mining and Practical Mathematics which represent the main types of advanced technological and scientific knowledge of the era These six fields of technologically advanced knowledge and their interrelations and interactions with learned knowledge are investigated and discussed through a specific lens by focusing on the technological literature Among present day historians of science it hardly remains controversial that contact and exchange between educated and practical knowledge played a significant role in the development of the natural sciences and technology in early modern Europe Several paths for such exchange arose from the late Middle Ages onward due to the formation of an economy of knowledge that fostered contacts and exchange between the two worlds How can this development be adequately described and how on the basis of such a description can the significance of this process for the early modern history of knowledge in the West be assessed These are the overarching questions this book tries to answer There exists a considerable amount of literature concerning several stations and events in the course of this long development process as well as its various aspects As meritorious and indispensable as many of these studies are none of them tried to portray this process as a whole with its most essential branches What is more many of them implicitly or explicitly took physics as a model of science and thus highlighted mechanics and mechanical engineering as the model of all interrelations of practical and learned knowledge By contrast this book aims at a more complete portrait of the early modern interrelations and interactions between learned and practical knowledge It tries to convey a new idea of the variety and disunity of these relations by discussing and comparing altogether six widely different fields of knowledge and practice The targeted audience of this book is first of all the historians of science and technology As one of the peer reviewers suggested the book could very well become a textbook used for teaching the history of science and technology at universities Furthermore since the book addresses fundamental aspects of the significance emergence and development of modern science has for the self image of the West it can be expected that it will attract the attention and interest of a wider readership than professional historians

Antike Erzähl- und Deutungsmuster Simone Finkmann, Anja Behrendt, Anke Walter, 2018-11-19 Dieser Sammelband beinhaltet fortschrittliche und dem neuesten Stand der Forschung entsprechende Studien zur Tradition der epischen Dichtung von Homer bis in die frühe Neuzeit zu Erzähl- und Deutungsmustern in Prosa und Poesie zur Intertextualität und Narratologie zur Exemplarität zur Lehrdichtung und Fachschriftstellerei sowie zur Wissenschaftsgeschichte und zur Rezeption der Antike in Text und Bild *Spaliere für Silvinus* Lars Mielke, 2024-01-22 Gehen die Ziele die Columella mit seiner *Res rustica* verfolgt über die Ausbildung des Lesers zum erfolgreichen Gutsbesitzer hinaus Das Buch findet einen neuen Zugang zu dieser in der Forschung schon häufig behandelten Frage indem es die Charakterschulung die der Agronom dem Gutsbesitzer bietet in ihrer Funktionsweise und in ihrem Anspruch untersucht

Gezeigt wird dass die moralisierenden und naturphilosophischen Thesen des Lehrwerks oftmals für Widersprüche sorgen und vage sind Ihre Funktion ist vielmehr pragmatischer Natur insofern sie insbesondere durch die Steigerung des Stilniveaus im Sinne einer emotionalen Beeinflussung des Lesers zur Vermittlung von tätigkeitsrelevanten Einstellungen wie Sorgfalt und Optimismus beitragen Wer das Gras wachsen hört Simona Boscani Leoni, Martin Stuber, 2017-12-11 In der Frühen Neuzeit entwickelte sich ein technisch-konomischer Blick auf die Natur Seit dem späten 17. Jahrhundert begannen sich naturhistorische Beschreibungen mit kameralistischen Ideen zu verbinden In weiterer Folge intensivierte die Bewegung der konomischen Aufklärung den nutzenorientierten Umgang mit der Natur und machte diesen zum Gegenstand der öffentlichen Debatte Diese spezifische Innovationskultur war von entscheidender Bedeutung für die folgenreiche Neuordnung agrarischen Wissens im 19. und 20. Jahrhundert Die einzelnen Beiträge stellen je eine unterschiedliche Pflanzengruppe Gemüse Obst Tabak Futter Heil oder Textilpflanzen ins Zentrum Im Fokus stehen Fragen nach der Interaktion zwischen den verschiedenen Akteuren wie Bauern Gelehrte Gutsbesitzer Magistrate oder Pfarrherren Besonders interessiert das Verhältnis der unterschiedlichen praktischen administrativen gelehrten usw. Wissensbestände Gerade in der Perspektive der *longue durée* lassen sich dabei die einfachen Dichotomien auf vielmehr erscheinen vielfältige Wechselbeziehungen etwa zwischen agrarwissenschaftlicher Theorie und agrarischer Praxis *Frühmittelalterliche Studien. So spannend und kurzweilig kann eine Chronik sein. *Artifizialität und Agon* Jan Stellmann, 2022-11-07. Die Studie entfaltet die These, dass das Wiederdichten wie es in den Poetologien deutschsprachiger historischer Romane des 12. und 13. Jahrhunderts reflektiert wird, nicht nur als artifizielle Poiesis, sondern auch als Praxis der Nachahmung und des Wettstreits verstanden werden muss. Diese doppelte Dimensionierung des Wiederdichtens wird historisch aus der *Ars poetica* des Horaz sowie der *Poetria nova* Galfrids von Vinsauf hergeleitet und konzeptionell mit den Begriffen Artifizialität und Agon erfasst. *Vom Buch aufs Feld - vom Feld ins Buch* Stephan F. Ebert, Gerrit Jasper Schenk, 2024-12-04. Heute bewirkt der Klimawandel ein Ueberdenken globaler Ernährungsweisen. Wie Forschungen zu klimaresistenten Getreidesorten, In-vitro-Fleisch und vegane Konsumtrends zeigen, Internet, Social Media und neuartige Lieferangebote erweitern das Wissensangebot über Nahrungsmittel und deren Bezugsmöglichkeiten. Der Sammelband historisiert ähnliche Prozesse beschleunigten Wandels am Beispiel der Phase von ca. 1300-1600 mit Phänomenen wie der Kleinen Eiszeit, der Pest, dem Renaissance Humanismus und der Medienrevolution des 15. Jahrhunderts. Sie veränderten Anbauzonen, machten Wissen über Agronomie, Botanik und Diätetik, aber auch zugänglicher und anwendbarer. Die interdisziplinär ausgerichteten Beiträge fragen in welchem Verhältnis Tradition, Konsum und praktisches Erfahrungswissen zueinander standen und legen wechselwirkende Dynamiken zwischen Theorie und Praxis zwischen Buch und Feld offen. Entgegen anderslautenden Prognosen ist die Begriffsgeschichte heute aktueller, denn je. Ihre Relevanz verdankt sie so, die These dieses interdisziplinären Bandes, einer Entwicklung, durch die sie sich aus der Bindung an die großen Schulen und Theorien des 20. Jahrhunderts befreit hat, um ihre Vorgehensweise konsequent an der Heterogenität ihres Materials auszurichten und sich damit ihrer eigentlichen Aufgabe zu widmen: der Erforschung der das Wissen strukturierenden Begriffssemantiken und ihrer Wanderungsbewegungen zwischen den unterschiedlichsten Disziplinen der Natur und Geisteswissenschaften. Die vorliegenden Studien und auch zu Begriffen wie Funktion, Katastrophe, Triebfeder und Pfropfen belegen einmal mehr die Leistungsfähigkeit dieses Ansatzes. **Münchener Stadtadreßbuch**, 1967.
